Food Information Regulation

Commentary on Regulation (EU) No. 1169/2011
on the provision of food information to consumers

Moritz Hagenmeyer

The new Regulation (EU) No. 1169/2011 on the provision of food information to consumers, the Food Information Regulation (FIR), recently came into force and established important rules, requirements and responsibilities regulating food information and in particular food labelling. The FIR replaces all existing general European as well as national legislation on labelling and nutrition declaration. A major new provision is the mandatory nutrition declaration. Which other specifications are compulsory? What rules apply to voluntary declarations? This book is a guide for food business operators as well as lawyers in food law practice who quickly need to identify and solve these problems. The commentary on the FIR will help you to better understand European food labelling law.

Moritz Hagenmeyer is a qualified lawyer (Rechtsanwalt) in Germany and was called to the Bar of England and Wales. He is a partner of the food law firm KROHN Rechtsanwälte in Hamburg and a lecturer at the universities of Hamburg and Hanover.

Food Information Regulation – Commentary on Regulation (EU) No. 1169/2011 on the provision of food information to consumers
Moritz Hagenmeyer · June 2012 (estimated) · approx. 400 pages
Print: € 128.00 · ISBN: 978-3-86965-206-1

A JOURNAL AT THE INTERSECTION OF LAW,
SCIENCE AND POLICY

Today the most important and widespread form of EU regulation in the internal market is concerned with the government of risk to individuals' health and safety. The European Journal of Risk Regulation (EJRR) provides an innovative forum for informed discussion on how these risks are regulated across policy domains in Europe and beyond. The central focus of the journal is the European Law and Policy regulating *inter alia* product (chemicals, food, pharma), financial, insurance and lifestyle risks (nutrition, alcohol, tobacco) as well as risks emerging from technology and third-party threats such as terrorism. The journal adopts a wide definition of regulation, including also innovative forms such as self-, co-regulation and nudges. Its methods extend to disciplines such as law, sociology, political science, risk analysis, economics as well as psychology and cognitive studies.

EJRR strikes a balance between the interests of the practitioners, notably those increasingly engaged in regulatory drafting and advice to the industry, and a more theoretical focus, combining normative articles with timely contributions on legislative and judicial developments, new literature and relevant events.
