RADIOSURGERY. 1999. Edited by E. Alexander III., D. Kondziolka, C. Lindquist, J.S. Loeffler, R. Smee. Published by S. Karger AG, Basel. 294 pages. C\$372.00 approx.

This book is a selection of papers presented at the 4th International Stereotactic Radiosurgery Society (ISRS) Meeting in Sydney, February, 1999. The papers are grouped into the following sections: advances in technology, imaging and radiosurgery,

radiobiology, arteriovenous malformations, benign tumors, malignant tumors, and other indications.

The first paper is an excellent historical review of the development of the Gamma Knife at the Karolinska Institute in Stockholm and included some long term results on cohorts of patients treated in Sweden for arteriovenous malformations, vestibular schwannomas, and trigeminal neuralgia.

The technology section includes papers addressing dosimetric
