Linguistic Play and Cultural Symbols among the Western Apache

**KEITH H. BASSO**

## **Celebrations of Death**

The Anthropology of Mortuary Ritual

**RICHARD HUNTINGTON and PETER METCALF**

The authors explore the significance of death in several cultures, focusing on elaborate uses of the corpse as a central and powerful symbol of the meaning of death and life. They examine contemporary American funeral practices in the light of these examples from other cultures which face death more openly, and conclude that these practices relate directly to important American cultural values.

## **From Student to Nurse**

A Longitudinal Study of Socialization

**IDA HARPER SIMPSON**

Professor Simpson challenges views that see occupational socialization as a matter of individual learning. Concepts of socialization which focus on individual students obscure the most significant conditions and processes. She concludes that the educational curriculum, rather than the students, should be held responsible both for failures and successes.

# THE POLITICS OF THE US SUPREME COURT

Richard Hodder-Williams

THE POLITICS OF THE US SUPREME COURT is the first introductory analysis of the Supreme Court, both as institution and as political force, to be written by by a non-American political scientist for a student readership.

It will be welcomed, both in the United States and abroad, for three main reasons. First, it presents the unique institution of the Supreme Court consciously and in manageable form for students who have not grown up within the American Judicial system. Second, the breadth and distance of the author's perspective enables him to offer an elegant and tightly argued synthesis and examination of the Court's historical and present-day role in the development of the Constitution, its decision-making processes, and its relationship with the executive and legislative branches of government and with the American people.

Finally, this text has been written from the belief that much of the literature on the Supreme Court is necessarily too legalistic, and therefore dry and unfamiliar. This book is accordingly lively and readable and firmly rooted throughout in concrete examples and in the human events and the sometimes colourful individual personalities behind the catalogues of case-names.
