FROM BUTTERWORTHS

THE LATEST IN NUTRITION SCIENCE

RECENT ADVANCES IN ANIMAL NUTRITION - 1982

W Haresign, PhD University of Nottingham School of Agriculture

The continuing evaluation of animal feedstuffs and feeding methods and of their ability to fulfil the nutritional requirements of farm livestock is essential to the efficiency of animal production.

Recent Advances in Animal Nutrition - 1982 is based on the proceedings of the 16th Nutrition Conference for Feed Manufacturers which brought together academic experts and those from industry to present recent work on various aspects of livestock nutrition.

The analysis of the raw ingredients of feedstuffs is the subject of the first section of the book, topics including the importance of moulds and mycotoxins in feeds, the effects and likely occurrence of anti-nutritive factors in raw ingredients and the use of oilseeds.

Chapters on the protein, energy and vitamin requirements of pigs elucidate the recommendations of the recently-published ARC working party report.

The prediction of the nutritive value of feeds from simple, cheap and reliable chemical measurements is of much current interest. The relative merits of alternative methods of analysis of the energy content of ruminant feedingstuffs and the prediction of energy content of compound feeds are discussed, and a further chapter presents information on the energy evaluation of poultry rations.

All those in the feedstuffs industry as well as research workers, technical advisers and students of livestock nutrition will find this book a valuable source of information.

A title in the Studies in Agricultural and Food Sciences series.

November 1982 256 pages 234×156 mm
0 408 71015 2 Hardcover £25.00

For further information about the series please write to Nicholas Cunningham at the address below.

Order from your bookseller, or from

BOROUGH GREEN, SEVENOAKS, KENT TN15 8PH

Butterworths

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished figure, on Bristol board, stout tracing paper or plastic film. Photographed diagrams are also accepted. *Lettering inside the framework of the diagram should be avoided as far as possible but if unavoidable it should be included on a fly-leaf. Marginal lettering should be inserted lightly in pencil on the original diagram or on a fly-leaf.*
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

Tables should be as simple and as few as possible. Each table should be typed on a separate sheet.

Abstract. Every article should have a short abstract (not more than **250** words) complete in itself and understandable without reference to the paper. *The abstract will be printed at the beginning of the paper.*

References. Only papers closely related to the author's work should be referred to; exhaustive lists should be avoided. The arrangement of references should be as in recent papers in *Animal Production*; details are given in the notes for guidance.

Proofs are supplied once and must be returned corrected to the Editors *within 3 days*. Only essential corrections should be made.

Reprints. Twenty-five reprints of each paper will be supplied free to authors on request. Further copies may be purchased if the order is sent at the proof-stage.

Animal Production is published six times a year in two volumes. Annual subscription is £49·00 (or \$112·00 in the USA and Canada) and the price for a single part is £9·00 (or \$21·00) net.

Proceedings of the British Society of Animal Production (New Series) ceased publication in 1975 and the material is now published as a separate section in the June issue of *Animal Production*.

Business matters, including regular subscriptions and sales (current and back numbers of the Journal and the Proceedings), should be addressed to: Longman Group Limited Subscriptions (Journals) Department, Fourth Avenue, Harlow, Essex, England CM19 5AA.
