RADIO-AID

NOTED FOR
SERVICE
AND
SATISFACTION

THE "CRYSTAL" RADIO-AID

The Radio-Aid may be used with an accumulator or standard dry battery to supply the low tension current. This is made possible by the Adaptor illustrated on the left of the instrument, and is a patented and exclusive feature of the Radio-Aid.

The Radio-Aid has an appearance of dignity and charm, but being of robust construction will stand up to many years of hard wear, and commends itself to the discerning patient. Its brilliant performance converts even the most hardened sceptic.

SPECIAL TERMS TO HOSPITALS AND CLINICS IN ACCORDANCE WITH THE HEARING AID MANUFACTURERS' ASSOCIATION AGREEMENT

A NEW AUDIOMETER

Today, your patient expects an audiometer test. The increasing use of the audiometer is likely to yield more accurate control of deafness and to bring the direction of the supply of hearing aids back to the aurist, where it belongs.

The busy aurist will appreciate the advantages of the AMPLIVOX MAICO Audiometer which is rapid in operation and accurate in calibration and so clearly satisfies the modern demand that it is already the most widely used audiometer in the world.

- Lower price
- All mains operation
- Frequency range, 128 to 11,584 c.p.s.
- Same zero for all frequencies
- Maximum intensity, 100 decibels
- Illuminated and easily read scales

We shall be glad to send you further particulars and to demonstrate the Audiometer to you on request.

AN AMPLIVOX FOR THE WAISTCOAT POCKET

- **CRYSTAL MICROPHONE**
- **STANDARD BATTERIES**
- **WEIGHT ONLY 1½ LBS.**
- **AVAILABLE IN THREE DIFFERENT TONES**
- **PRICE ONLY**

17 GNS.

The model V AMPLIVOX is designed for the gentleman who wishes to wear a high quality hearing aid. The amplifier, complete with filament battery can be placed in the waistcoat pocket; the H.T. battery goes easily into the hip pocket or inside coat pocket. It is a very powerful instrument of extreme clarity, and uses standard batteries. For those who want the best results in a hearing aid which they can wear the model V AMPLIVOX is the obvious choice.

PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

In Acute Sinusitis

it is often surprising the degree of relief which will sometimes follow the application of hot Antiphlogistine Brand Dressing over the frontal and nasal regions. Its decongestive action helps to restore drainage and relieve pain.

Otitis Media

When it is desired to apply heat, plus glycerine medication, Antiphlogistine Brand Dressing combines these agents in an ideal way.

The Hospital has **100** beds for In-patients and an annual Out-patient attendance of over **50,000**.

CLINICAL INSTRUCTION

Clinical instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is given in the Out-patient Department from 2 to 5 p.m. daily, and on Tuesdays and Thursdays from 6 to 9 p.m. also. Major operations are performed every morning and afternoon, except Saturdays, in the In-patient Operating Theatres. Minor Operations are performed in the Out-patient Operating Theatre on three mornings a week. Practitioners and Medical Students are admitted to the practice of the Hospital as Post-Graduates.

Clinical Assistants, whose duty it is to assist the staff, are appointed as vacancies occur.

For further information apply to the Dean: GILBERT H. HOWELLS.

In addition to the General Wards, there are Semi-private Wards and 11 Private Rooms. The charge for a Private Room is 7 guineas a week, plus a fee for the surgeon.

Further particulars may be obtained from F. P. CARROLL, *Secretary-Superintendent.*

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & CO., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.
