the International Society
of Technology Assessment
in Health Care

International Journal of **TECHNOLOGY ASSESSMENT IN HEALTH CARE**

EDITORS

Stanley J. Reiser, *University of Texas*
Egon Jonsson, *Karolinska Institute*

This quarterly journal has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal fills the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology. In an age where technology plays so great a role in the shaping of health care systems all over the world, the journal is timely and vitally important.

International Journal of Technology Assessment in Health Care (ISSN 0266-4623) is published quarterly. Subscription to Volume 9, 1993: \$118.00 for institutions; \$86.00 for individuals; \$30.00 for single issues.

THE MILBANK QUARTERLY

EDITOR

Paul D. Cleary
Harvard Medical School

The Milbank Quarterly is devoted to scholarly analysis of significant issues in health and healthcare policy. It presents original research, policy analysis, and commentary from academics, clinicians, and policy makers; including work sponsored by the Milbank Memorial Fund. The in-depth, multidisciplinary approach of the journal permits contributors to explore fully the social origins of health in our society and to examine in detail the implications of different health policies.

Topics addressed by *The Milbank Quarterly* include the impact of social factors on health, prevention, allocation of health care resources, legal and ethical issues in health policy, hospital administration, and the organization and financing of health care. *The Milbank Quarterly* is indispensable reading for all those involved in health services research or health policy.

Subscription to *The Milbank Quarterly* (ISSN 0887-378X) for Volume 71, 1993: \$66.00 for institutions; \$33.00 for individuals; \$18.00 for single issues.

The aim of the journal is to contribute to the development of scientific knowledge in the field of Health Sciences.

Health Sciences are defined as the research area in which the influences of environmental, behavioural and physical factors on the health of the population and the individual are studied, as well as the way in which health care can be organized based on this knowledge.

The journal is of an interdisciplinary nature and includes such fields as epidemiology, health economics, medical sociology, public health, health education, social oncology and other medical disciplines in relation with the subject of Health Sciences.
