

## AUTHOR INDEX FOR VOLUME 92

ABDO, H. and DIMITROV, D.; Nonregular graphs with minimal total irregularity	1
ABTAHI, F. and GHAFARPANAH, A.; A note on cyclic amenability of the Lau product of Banach algebras defined by a Banach algebra morphism	282
ALI, K.; see RIZVI, S. T. R.	11
ALMEIDA, J. and COSTA, A.; A note on pseudovarieties of completely regular semigroups	233
AN, M. and XIONG, L.; Some results on the difference of the Zagreb indices of a graph	177
BROERSMA, H.; see ZHANG, Y.	19
BROWN, P. G.; see IZADI, F.	187
CAICEDO, A. and VIANA, A.; A diffusive logistic equation with memory in Bessel potential spaces	251
CAO, X. and XU, G.; A note on some character sums over finite fields	32
CHAND, A. K. B.; see NAVASCUÉS, M. A.	405
CHEN, J.; see LI, P.	420
CHEN, J. X. and LI, L.; On a question of Bouras concerning weak compactness of almost Dunford–Pettis sets	111
CHEN, L.; Quasi Riesz transforms, Hardy spaces and generalised sub-Gaussian heat kernel estimates	508
CHEN, Y.; see ZHANG, Y.	19
CHOULLI, M., KAYSER, L. and OUHABAZ, E. M.; Observations on Gaussian upper bounds for Neumann heat kernels	429
CHRISTENSEN, O., FORSTER, B. and MASSOPUST, P.; Directional time–frequency analysis via continuous frames	268
CHUNG, J. and SAHOO, P. K.; Heat kernel method for the Levi–Civita equation in distributions and hyperfunctions	77
COSTA, A.; see ALMEIDA, J.	233
CRINGANU, J.; Better bounds in Chen’s inequalities for the Euler constant	94
CRISP, T.; Fredholm modules over graph $C^*$ -algebras	302
DARAFSHEH, M. R., GHORBANI, M. and PRAJAPATI, S. K.; On maximal subsets of pairwise noncommuting elements in finite $p$ -groups	380
DIMITROV, D.; see ABDO, H.	1
DONG, Z. and WANG, Y. Y.; Fixed point characterisation for exact and amenable action	228
DRAGOMIR, S. S.; see RAÏSSOULI, M.	57
DRIESSEN, T.; see HOU, D.	488
FARROKHI D. G., M. and MOGHADDAM, M. R. R.; On the centre of the automorphism group of a group	390
FINN, C.; One-dimensional stochastic models with open boundaries: integrability, applications and $q$ -deformed Knizhnik–Zamolodchikov equations	520

FISHMAN, L., MANCE, B., SIMMONS, D. and URBAŃSKI, M.; Shrinking targets for nonautonomous dynamical systems corresponding to Cantor series expansions	205
FORSTER, B.; see CHRISTENSEN, O.	268
GHAFAHPANAH, A.; see ABTAHI, F.	282
GHOBBER, S.; Shapiro's uncertainty principle in the Dunkl setting	98
GHOORBANI, M.; see DARAFSHEH, M. R.	380
GILES, J. R.; A weakly uniformly rotund dual of a Banach space	457
GILES, J. R.; On a weakly uniformly rotund dual of a Banach space – retraction	176
GŁAZOWSKA, D. and MATKOWSKI, J.; Uniformly bounded composition operators	463
HANAFI, R.; Modelling and optimisation of railway crew scheduling	348
HARLEY, K.; Canards in advection–reaction–diffusion systems in one spatial dimension	342
HASSANZADEH, M. and HATAMIAN, R.; An approach to capable groups and Schur's theorem	52
HATAMIAN, R.; see HASSANZADEH, M.	52
HEARD, D.; Morava modules and the $K(n)$ -local Picard group	171
HOU, D. and DRIESSEN, T.; Determining the nucleolus of compromise stable games	488
HUANG, Y.; Moduli spaces of surfaces	168
IZADI, F., NAGHDALI, R. F. and BROWN, P. G.; Some quartic Diophantine equations in the Gaussian integers	187
JO, J. H.; On algebraic invariants for free actions on homotopy spheres	478
KALANTAR, M.; On iterated powers of positive definite functions	440
KARAVARSAMIS, N.; Methods for estimating occupancy	518
KASPRZAK, P. and MAĆKOWIAK, P.; Local boundedness of nonautonomous superposition operators in $BV[0, 1]$	325
KATIYAR, S. K.; see NAVASCUÉS, M. A.	405
KAYSER, L.; see CHOULLI, M.	429
KHALID, M.; see RIZVI, S. T. R.	11
KUZMAN, B.; On graphs of prime valency admitting a solvable arc-transitive group	214
LANGFORD, M.; Motion of hypersurfaces by curvature	516
LI, D.-H.; see WU, F.-G.	496
LI, H.-X.; see ZHANG, L.-L.	238
LI, J.-Z.; see LIU, L.	123
LI, L.; see CHEN, J. X.	111
LI, P., CHEN, J. and WANG, X.; Quasiconformal solutions of Poisson equations	420
LINDNER, S.; Resolvability properties of similar topologies	470
LING, D. and TANG, M.; On minimal asymptotic $g$ -adic bases	374
LITA DA SILVA, J.; Limiting behaviour for arrays of upper extended negatively dependent random variables	159

LITA DA SILVA, J.; Correction to ‘Limiting behaviour for arrays of upper extended negatively dependent random variables’	524
LIU, L. and LI, J.-Z.; Quotient and pseudo unit in nonunital operator system	123
LOUIS, J.; A formula for the number of spanning trees in circulant graphs with nonfixed generators and discrete tori	365
LU, J. and LV, X.; Toeplitz operators between Fock spaces	316
LV, X.; see LU, J.	316
MAĆKOWIAK, P.; see KASPRZAK, P.	325
MANCE, B.; see FISHMAN, L.	205
MARCHENKO, V.; Stability of unconditional Schauder decompositions in $\ell_p$ spaces	444
MASSOPUST, P.; see CHRISTENSEN, O.	268
MATKOWSKI, J.; see GŁAZOWSKA, D.	463
MILLER, M.; see RIZVI, S. T. R.	11
MOGHADDAM, A.; An integrable and exactly solvable non-Hermitian BCS Hamiltonian and generalised exclusion statistics	346
MOGHADDAM, M. R. R.; see FARROKHI D. G., M.	390
NAGHDALI, R. F.; see IZADI, F.	187
NAVASCUÉS, M. A., VISWANATHAN, P., CHAND, A. K. B., SEBASTIÁN, M. V. and KATIYAR, S. K.; Fractal bases for Banach spaces of smooth functions	405
OUHABAZ, E. M.; see CHOULLI, M.	429
PEACHEY, T. C.; A sharp version of Bonsall’s inequality	397
PINELIS, I.; Exact upper and lower bounds on the difference between the arithmetic and geometric means	149
PRAJAPATI, S. K.; see DARAFSHEH, M. R.	380
PRZEŹDZIECKI, A. J.; Every countable group is the fundamental group of some compact subspace of $\mathbb{R}^4$	145
QU, Z.; On a partition problem of finite abelian groups	24
RAÏSSOULI, M. and DRAGOMIR, S. S.; Refining recursively the Hermite–Hadamard inequality on a simplex	57
RIZVI, S. T. R., KHALID, M., ALI, K., MILLER, M. and RYAN, J.; On cycle-supermagicness of subdivided graphs	11
RYAN, J.; see RIZVI, S. T. R.	11
SADEK, M.; Formal groups and invariant differentials of elliptic curves	44
SAFUAN, H. M.; Mathematical analysis of population growth subject to environmental change	351
SAHOO, P. K.; see CHUNG, J.	77
SCHEUER, J.; Quantitative oscillation estimates for almost-umbilical closed hypersurfaces in Euclidean space	133
SEARSTON, I.; Nonlinear analysis in geodesic metric spaces	514
SEBASTIÁN, M. V.; see NAVASCUÉS, M. A.	405
SIMMONS, D.; see FISHMAN, L.	205

SOROSHMEHR, M.; Homomorphisms of $\ell^1$ -Munn algebras and applications to semigroup algebras	115
STUART, R. M.; Metastable sets in open dynamical systems and substochastic Markov chains	344
TANG, H.; Shifted convolution sum of $d_3$ and the Fourier coefficient of Hecke–Maass forms	195
TANG, M.; see LING, D.	374
TARR, G.; Quantile based estimation of scale and dependence	173
URBAŃSKI, M.; see FISHMAN, L.	205
VIANA, A.; see CAICEDO, A.	251
VISWANATHAN, P.; see NAVASCUÉS, M. A.	405
WANG, L.; Arithmetic properties of partition quadruples with odd parts distinct	353
WANG, X.; see LI, P.	420
WANG, Y. Y.; see DONG, Z.	228
WATERS, E. K.; Modelling crowding effects in infectious disease transmission	522
WEIGT, M. and ZARAKAS, I.; Derivations of Fréchet nuclear GB*-algebras	290
WRIGHT, P.; Dimensional characteristics of the nonwandering sets of open billiards	511
WU, F.-G. and LI, D.-H.; The restricted isometry property for signal recovery with coherent tight frames	496
XIONG, L.; see AN, M.	177
XU, G.; see CAO, X.	32
XUAN, Z. and ZHENG, J.; On the escaping set of meromorphic functions with direct tracts	68
ZARAKAS, I.; see WEIGT, M.	290
ZHANG, D.; On hyperstability of generalised linear functional equations in several variables	259
ZHANG, L.-L. and LI, H.-X.; Weighted pseudo almost periodic solutions for differential equations with piecewise constant arguments	238
ZHANG, Y., BROERSMA, H. and CHEN, Y.; A note on Ramsey numbers for fans	19
ZHENG, J.; see XUAN, Z.	68

## INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website [www.austms.org.au/Bulletin](http://www.austms.org.au/Bulletin). Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in  $\LaTeX$  using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\LaTeX$  packages and submitted as a PDF file via our journal management system, at [www.austms.org.au/Publications/Submissions/BAustMS](http://www.austms.org.au/Publications/Submissions/BAustMS). This permits authors to track their papers through the editorial process. Recent versions of  $\TeX$  are able to produce PDF files directly. A  $\LaTeX$  class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at [editor@bulletin.austms.org.au](mailto:editor@bulletin.austms.org.au).

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2010 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at [www.ams.org/msc](http://www.ams.org/msc).

**4. Abstracts of PhD Theses.** The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

## Table of Contents

<b>Arithmetic properties of partition quadruples with odd parts distinct</b> <i>Wang, L.</i>	353
<b>A formula for the number of spanning trees in circulant graphs with nonfixed generators and discrete tori</b> <i>Louis, J.</i>	365
<b>On minimal asymptotic <math>g</math>-adic bases</b> <i>Ling, D. &amp; Tang, M.</i>	374
<b>On maximal subsets of pairwise noncommuting elements in finite <math>p</math>-groups</b> <i>Darafsheh, M. R., Ghorbani, M. &amp; Prajapati, S. K.</i>	380
<b>On the centre of the automorphism group of a group</b> <i>Farrokhi D. G., M. &amp; Moghaddam, M. R. R.</i>	390
<b>A sharp version of Bonsall's inequality</b> <i>Peachey, T. C.</i>	397
<b>Fractal bases for Banach spaces of smooth functions</b> <i>Navascués, M. A., Viswanathan, P., Chand, A. K. B., Sebastián, M. V. &amp; Katiyar, S. K.</i>	405
<b>Quasiconformal solutions of Poisson equations</b> <i>Li, P., Chen, J. &amp; Wang, X.</i>	420
<b>Observations on Gaussian upper bounds for Neumann heat kernels</b> <i>Choulli, M., Kayser, L. &amp; Ouhabaz, E. M.</i>	429
<b>On iterated powers of positive definite functions</b> <i>Kalantar, M.</i>	440
<b>Stability of unconditional Schauder decompositions in <math>\ell_p</math> spaces</b> <i>Marchenko, V.</i>	444
<b>A weakly uniformly rotund dual of a Banach space</b> <i>Giles, J. R.</i>	457
<b>Uniformly bounded composition operators</b> <i>Glazowska, D. &amp; Malkowski, J.</i>	463
<b>Resolvability properties of similar topologies</b> <i>Lindner, S.</i>	470
<b>On algebraic invariants for free actions on homotopy spheres</b> <i>Jo, J. H.</i>	478
<b>Determining the nucleolus of compromise stable games</b> <i>Hou, D. &amp; Driessen, T.</i>	488
<b>The restricted isometry property for signal recovery with coherent tight frames</b> <i>Wu, F.-G. &amp; Li, D.-H.</i>	496
<b>Abstracts of PhD Theses</b>	
<b>Quasi Riesz transforms, Hardy spaces and generalised sub-Gaussian heat kernel estimates</b> <i>Chen, L.</i>	508
<b>Dimensional characteristics of the nonwandering sets of open billiards</b> <i>Wright, P.</i>	511
<b>Nonlinear analysis in geodesic metric spaces</b> <i>Searston, I.</i>	514
<b>Motion of hypersurfaces by curvature</b> <i>Langford, M.</i>	516
<b>Methods for estimating occupancy</b> <i>Karavarsamis, N.</i>	518
<b>One-dimensional stochastic models with open boundaries: integrability, applications and <math>q</math>-deformed Knizhnik–Zamolodchikov equations</b> <i>Finn, C.</i>	520
<b>Modelling crowding effects in infectious disease transmission</b> <i>Waters, E. K.</i>	522
<b>Corrigendum</b>	
<b>Correction to 'Limiting behaviour for arrays of upper extended negatively dependent random variables'</b> <i>Lita da Silva, J.</i>	524
<b>Author Index for Volume 92</b>	525
