## FORTHCOMING PAPERS

R. F. DICKMAN, L. R. RUBIN and P. M. SWINGLE:	Irreducible continua and generalization of hereditarily uniconherent continua by means of membranes
A. G. MACKIE:	Gravity effects in the water entry problem
A. K. PARKIN:	On the strength of packed spheres
R. P. BAMBAH, ALAN WOODS and HANS ZASSENHAUS:	Three proofs of Minkowski's second inequality in the geometry of numbers
ARTHUR R. JONES:	On symmetry in periodic solutions of Hamiltonian systems
TENG-SUN LIU:	A note on pre-interior operators

## PREPARATION OF MANUSCRIPTS

submitted for publication in

The Journal of the Australian Mathematical Society

Authors of articles submitted for publication in the *Journal* are particularly asked to ensure that their manuscripts are in a form appropriate for sending to the printer. The necessary preparation should be done by the author before the initial submission to the Editor. We set out below a brief statement of the main points we ask authors to observe. A fuller discussion of the problems of preparing mathematical manuscripts will be found in 'The printing of mathematics', by T. W. Chaundy, P. R. Barrett and Charles Batey (O.U.P.).

1. The author should keep a complete copy of the submitted article.
2. Manuscripts should be typed, on high quality quarto bond paper, with at least double spacing, and with a margin of at least one inch all around. If possible, a duplicate copy should accompany the submitted manuscript.
3. Do not supply a separate title page. Please adopt the form of heading in use in the *Journal*, leaving a space for insertion of the date of receipt. If the title is long, supply also a shortened form of title. If the author wishes to give acknowledgements of support and the like, these should be given in the body of the article, or by footnote attached to the name of the author. If the author supplies an initial abstract, it will usually be printed in small type. Affiliation is shown at the end of the article, not at the beginning.
4. The setting out of the manuscript should imitate as closely as possible the final printed page, particularly with regard to paragraphing and use and spacing of displayed formulae. The *Journal* places headings centrally, and equation numbers on the left.
5. The ordinary forms of grammar should be observed, both in the text and in the mathematics, including the displayed formulae. In particular, please ensure that the punctuation carries through the mathematics in the proper manner. Eschew abbreviations such as 'eqn', 'etc.', 'Thm', 'w.r.t.'. Spelling and use of hyphens should be consistent.
6. Authors are particularly asked to note the following points, and carefully to mark the manuscript accordingly.
  - a. Latin italics are indicated by a single underline, thus: a, A.  
*Latin symbols which are to be in italics should be indicated in this way at every appearance other than in displayed formulae (where italics are taken for granted).*  
Formal statements of lemmas and theorems are in italics, and should be so shown in the manuscript.
  - b. Explain clearly what symbols, if any, are to be set in script and fraktur (= German) founts, and what is required with any unusual symbols. This is best done by attaching to the manuscript a separate page, entitled 'Notes to the compositor', in which the author's conventions and requirements are fully and clearly set out, and by drawing attention to particular symbols at their first appearance in the manuscript.
  - c. References in the text to other articles listed at the end are by Roman numerals in square brackets. The preferred style for listing references at the end is shown by the following examples:

[1] E. A. Clarkson and Y. Midei, 'Weakly open translation-invariant functionals', *Ann. of Math.* (2) 42 (1941), 276—285.

[2] L. Gröschen, 'Quasi-ergodic theorems', *J. Aust. Math. Soc.* 2 (1960), 2—3.

[3] I. N. Märchenmacher, *Introduction to cybernetics* (C.U.P., 2nd ed. 1962).

**THE COLLECTED MATHEMATICAL WORKS OF J. H. AND A. G. M. MICHELL** / *Michell Brothers*

*Available* Edited by F. W. Niedenfuhr and J. R. M. Radok. With a foreword by Prof. T. M. Cherry  
1965 - 340 pp. - cloth Dfl. 25.50 / \$ 7.10

**MATRIX MECHANICS** / *H. S. Green*

*Available* With a foreword by Max Born  
1965 - 118 pp. - cloth Dfl. 19.75 / \$ 5.50

**THE STRENGTH, FRACTURE AND FATIGUE OF MATERIALS**

*T. Yokobori*

*Available* Translated by S. Mhtsuo and M. Inoue. Edited by J. D. C. Crisp.  
1965 - 372 pp. - cloth Dfl. 48.50 / \$ 13.50

**THEORY OF ELASTICITY** / *M. Filonenko-Borodich*

*Available* Translated from the Russian by M. Konyaeva; edited by G. Ivanov-Mumjiev.  
1964 - 378 pp. - cloth Dfl. 27.50 / \$ 7.60

**TABLES FOR THE COMPUTATION OF TOROIDAL SHELLS**

*L. N. Osipova and S. A. Tumarkin*

*Available* Translated by Morris D. Friedman  
1965 - 128 pp. - cloth Dfl. 25.— / \$ 7.—

**THIN SHELL THEORY** / *V. V. Novozhilov*

*Available* Translated from the 2nd Russian ed. by P. G. Lowe; edited by J. R. M. Radok  
1965 - 2nd augmented and revised ed. - 433 pp. + index - cloth Dfl. 52.50 / \$ 14.60

**VECTOR SPACES** / *D. A. Raikov*

*Available* Translated from the Russian by Leo F. Boron with the assistance of H. R. Stevens and G. F. Votruba  
1965 - 202 pp. - cloth Dfl. 27.50 / \$ 7.60

**ASYMPTOTIC DISTRIBUTION MODULO ONE**

*Editors: J. F. Koksma and L. Kuipers*

*Available* Lectures given at the colloquium on Asymptotic Distribution Modulo One, held in Breukelen, the Netherlands, 1962 under the auspices of N.U.F.F.I.C. Sponsored by NATO  
1965 - 203 pp. - cloth Dfl. 10.50 / \$ 2.90

**NORMED RINGS** / *M. A. Naimark*

*Available* Translated from the first Russian edition by Leo F. Boron.  
1964 - 2nd ed. - 588 pp. - cloth Dfl. 49.75 / \$ 14.—

**LECTURES ON THE FOUNDATIONS OF GEOMETRY**

*A. V. Pogorelov*

*Publication:* Translated from the Russian by Leo F. Boron with the assistance of W. D. Bouwsma.  
*January 1966* In this work a clear view is given of the basic problems in the foundations of geometry, Euclidean, Lobachevskian and projective.
