2018 Line Up

CAEP CPD

AIME

This one day course will provide a practical approach for airway management in emergencies.

Apr 10 & 11 - St. John's, NL

Apr 23 & 24 - Toronto, ON

May 25 & 26 - Calgary, AB

Mainpro+: 18 Credits
Section 1: 9 Hours

EMR

This two day review consists of concise topics using the flipped classroom technique.
10 hours of pre-course videos

Act I

Mar 2-3 - Ottawa, ON

Act III

Feb 6-7 - Oshawa, ON

Apr 10-11 - St. John's NL

May 25-26 - Calgary, AB

Mainpro+: 52 Credits
Section 3: 26 Hours

AIME Advanced

A Hands-on, skill-focused advanced airway learning experience using clinical cadavers.

Jan 26 - Halifax, NS

May 18 - Halifax, NS

Mainpro+: 8 Credits
Section 3: 8 Hours

EDTU

This two day course will provide a strong foundation in emergency ultrasound. It facilitates the completion of most (if not all) of the required 50 supervised scans in each of the four areas (aorta, cardiac, abdomen and pelvis)

Jun 1-2 - Ottawa, ON

Mainpro+: 34 Credits
Section 3: 17 Hours

Toxicology

Overdoses and poisonings are sometimes familiar and sometimes frightening, and are a small but important part of the practice of emergency medicine. This course will focus on the interesting world of poisons, their nature, effects and antidotes.

April 24 - Toronto, ON

Mainpro+: 14 Credits
Section 1: 7 Hours

EDTUX Resuscitation

A one day advanced ultrasound course supporting critical care and resuscitation - advanced cardiac skills, inferior vena cava assessment, lung evaluation and US guided-central venous catheterization

May 26 - Calgary, AB

Mainpro+: 27 Credits
Section 3: 13.5 Hours

The Chase Across Asia September 10-21, 2018

14 hours of CPD over 12 days of touring and racing from Saigon through the Mekong Delta, Cambodia including Angkor Wat, ending in Bangkok.

Are you up for an Adventure?

S.T.A.R.T.T.

Simulated Trauma and Resuscitation Team Training

Taking trauma team management to the next level.

February 21, 2018

Toronto, ON

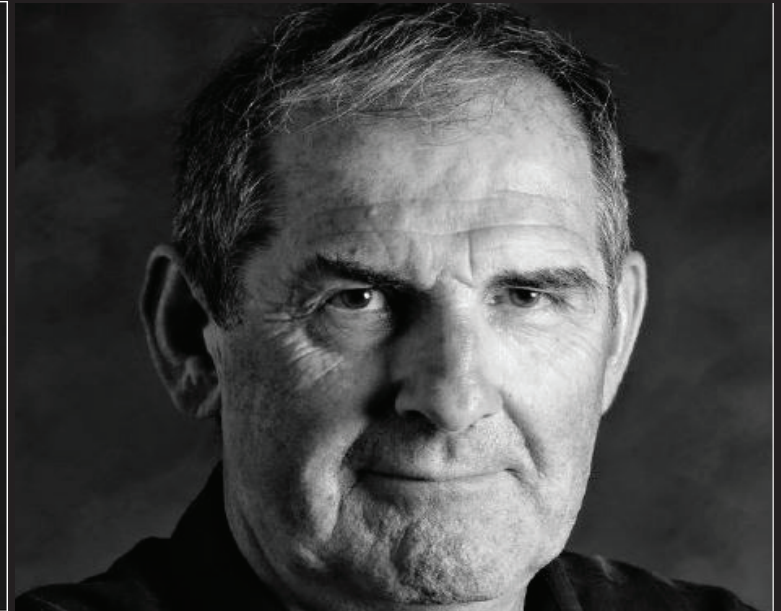

Be trained in a multidisciplinary team based environment to improve teamwork, leadership/followership, decision making and communication skills

Learn discrete tools that you can take back to your home institution to help mitigate human error

Improve patient care

Section 3: 8 Hours

Old Docs Rule!

Dr. Jane Moran
Age: 65
Victoria, BC

Emergency medicine is a specialty for those who seek a career of continued learning, countless conundrums, plenty of hard work, and endless rewards.

Dr. Alan Drummond
Age: 67
Perth, ON

Emergency Medicine is a service industry.
If each individual patient isn't your first priority, why are you working in the ED?

Wisdom. Confidence. Experience. Perspective. Swearing.

It's all here. CAEP 2018.

Calgary.

Be there.

Old Docs Rule!

CAEP celebrates our senior emergency physicians across Canada. If you are an active or retired emergency physician, age 60 or over, get your photo, info and quote in before the end of January.

(See details at <http://caepconference.ca/caep18/old-docs-rule/>)

And remember to come to the “Wisdom” track of CAEP 2018 in Calgary!

Dr. Connie LeBlanc

Age: 60ish

Halifax, NS

The practice of Emergency Medicine gives us all backstage pass to life. We see and experience things others do not and cannot. Some are terrible and soul crushing while others leave us in awe. It's a ride!

Dr. Chris Rumball

Age: 67

Nanaimo, BC

Your sidekick computer lacks initiative, empathy, understanding and wisdom. That's for you to provide. Ask your patients the right questions. Computers are useless, they only have answers.

Words that no young emergency physician has ever heard: “We can't clear his c-spine. We'll have to cric him!”

The celebration begins.

Every minute. Every hour. Every day. From coast to coast to coast, the EM community is there for Canadians.

In 1978, as the specialty of emergency medicine began to emerge, a group of pioneering physicians came together in Toronto to establish a unified voice for this community. This year will mark CAEP's 40th anniversary - we invite you to join us in celebration throughout 2018. We are asking our members to send us photos, videos, stories or anything that you feel would highlight the amazing things that have taken place in the EM community over the last forty years.

Stay tuned for several exciting highlights from the community that are sure to bring back memories while also inspiring ideas for the future.
