

THE JOURNAL OF ECOLOGY

EDITORS: P. J. GRUBB, A. J. WILLIS and C. H. GIMINGHAM

VOL. 63, No. 1

MARCH 1975

Heather M. Tinsley. The former woodland of the Nidderdale moors (Yorkshire) and the role of early man in its decline.

A. J. Davy and K. Taylor. Seasonal changes in the inorganic nutrient concentrations in *Deschampsia caespitosa* (L.) Beauv. in relation to its tolerance of contrasting soils in the Chiltern Hills.

M. A. Pemadasa and P. H. Lovell. Factors controlling germination of some dune annuals.

U. Safriel and Y. Lipkin. Patterns of colonization of the eastern Mediterranean intertidal zone by Red Sea immigrants.

Kusum V. Marathe and P. R. Chaudhari. An example of algae as pioneers in the lithosere and their role in rock corrosion.

C. F. Mason and R. J. Bryant. Production, nutrient content and decomposition of *Phragmites communis* Trin. and *Typha angustifolia* L.

T. W. Ashenden, W. S. Stewart and Watkin Williams. Growth responses of sand dune populations of *Dactylis glomerata* L. to different levels of water stress.

Roger Jones. Comparative studies of plant growth and distribution in relation to waterlogging. VIII. The uptake of phosphorus by dune and dune slack plants.

Mark M. Littler and Maxwell S. Doty. Ecological components structuring the seaward edges of tropical Pacific reefs: the distribution, communities and productivity of *Porolithon*.

I. D. Hodgkinson. Dry weight loss and chemical changes in vascular plant litter of terrestrial origin, occurring in a beaver pond ecosystem.

J. W. Bates. A quantitative investigation of the saxicolous bryophyte and lichen vegetation of Cape Clear Island, County Cork.

T. H. Keatinge. Plant community dynamics in wet heathland.

G. I. Forrest and R. A. H. Smith. The productivity of a range of blanket bog vegetation types in the northern Pennines.

Bruce G. Thom, L. D. Wright and J. M. Coleman. Mangrove ecology and deltaic-estuarine geomorphology: Cambridge Gulf-Ord River, Western Australia.

S. B. Chapman, J. Hibble and C. R. Rafarel. Net aerial production by *Calluna vulgaris* on lowland heath in Britain.

S. B. Chapman, J. Hibble and C. R. Rafarel. Litter accumulation under *Calluna vulgaris* on a lowland heath in Britain.

B. Gray. Size-composition and regeneration of *Araucaria* stands in New Guinea.

Douglas E. Gill. Spatial patterning of pines and oaks in the New Jersey Pine Barrens.

P. Šmíd. Evaporation from a reedswamp.

E. D. Ford. Competition and stand structure in some even-aged plant monocultures.

BIOLOGICAL FLORA OF THE BRITISH ISLES

Notice to contributors

J. R. Cross. *Rhododendron ponticum* L.

THE JOURNAL OF ANIMAL ECOLOGY

EDITORS: H. N. SOUTHERN and L. R. TAYLOR

VOL. 44, No. 2

JUNE 1975

Amyan Macfadyen. Some thoughts on the behaviour of ecologists.

G. R. Coope and R. B. Angus. An ecological study of a temperate interlude in the middle of the last glaciation, based on fossil Coleoptera from Isleworth, Middlesex.

Graham Bell and J. H. Lawton. The ecology of the eggs and larvae of the smooth newt (*Triturus vulgaris*) (Linn.).

Sarah E. Randolph. Seasonal dynamics of a host-parasite system: *Ixodes trianguliceps* (Acarina: Ixodidae) and its small mammal hosts.

Sarah E. Randolph. Patterns of distribution of the tick *Ixodes trianguliceps* Birula on its hosts.

J. M. Anderson. Succession, diversity and trophic relationships of some soil animals in decomposing leaf litter.

A. R. E. Sinclair. The resource limitation of trophic levels in tropical grassland ecosystems.

Ann C. Hurley. The establishment of populations of *Balanus pacificus* Pilsbry (Cirripedia) and their elimination by predatory Turbellaria.

I. D. Hodgkinson. A community analysis of the benthic insect fauna of an abandoned beaver pond.

Jasper Parsons. Seasonal variation in the breeding success of the herring gull: an experimental approach to pre-fledging success.

G. M. Branch. Mechanisms reducing intraspecific competition in *Patella* spp.: migration, differentiation and territorial behaviour.

Jennifer Butterfield and J. C. Coulson. Insect food of adult red grouse *Lagopus lagopus scoticus* (Lath.).

M. G. Bulmer. Phase relations in the ten-year cycle.

David Rogers. A model for avoidance of superparasitism by solitary insect parasitoids.

Carolyn M. King. The home range of the weasel (*Mustela nivalis*) in an English woodland.

Reviews; Short Notices.

THE NORTH SEA: ***Challenge and Opportunity***

edited by M. M. SIBTHORP

This report, prepared under the auspices of the **David Davies Memorial Institute of International Studies**, considers the measures required to cope with the twin threats of pollution and depletion of North Sea resources and to ensure that they are developed in the best interests of the communities and industries which depend upon them.

With sixteen pages of maps, tables and graphs.

THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

TERMS OF MEMBERSHIP

	£
Annual Members, receiving the Journal . . . per annum	10.00
Annual Members, without the Journal . . . per annum	2.00
Founders	100.00
Governors	500.00

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.
