# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY  
WALTER HOWARTH

ASSISTED BY  
W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.

4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.

8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.

9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

### *United States of America*

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

## PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

## DeVilbiss ATOMIZERS

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

# 'Mickraform'

## Sulphathiazole Suspension

### 20%

'Mickraform' sulphathiazole crystals—many hundred times smaller than the normal—have made possible a satisfactory *fluid* sulphonamide preparation for local use: a highly stable, non-irritating, non-alkaline, sterile suspension.

While new uses for 'Mickraform' Sulphathiazole Suspension are still being developed, it has already proved highly effective in the treatment of traumatic wounds, burns, gonorrhœa and pyogenic skin infections, especially impetigo. The suspension is also ideally suited for use in major and minor operative procedures, *e.g.*, in thoracic or abdominal surgery and in treating such local infections as abscesses, carbuncles, whitlows, etc.

'Mickraform' Sulphathiazole Suspension, 20%, is supplied in 25-cc. bottles, each containing 5 gm. microcrystalline sulphathiazole suspended in isotonic saline. The concentration can be reduced as desired by the addition of sterile normal saline.

*Descriptive literature is available. Requests for samples must bear the personal signature of the doctor concerned.*

**Menley & James Ltd., 123 Coldharbour Lane, London, S.E.5**
