

# QUARTERLY REVIEWS OF BIOPHYSICS

---

VOLUME 5 1972

Editors: A. Engström [*Sweden*], A. Ehrenberg [*Sweden*],  
R. D. Keynes [*United Kingdom*],  
A. K. Solomon [*U.S.A.*]

Council of IUPAB

F. Lynen [*Fed. Rep. Germany*], *President*

B. Chance [*U.S.A.*], *Vice-President*

J. C. Kendrew [*United Kingdom*], *Hon. Vice-President*

R. D. Keynes [*United Kingdom*], *Secretary-General*

A. Ehrenberg [*Sweden*]

A. R. Gopal-Ayengar [*India*]

F. Hutchinson [*U.S.A.*]

L. Kayushin [*U.S.S.R.*]

E. Kellenberger [*Switzerland*]

O. Maaløe [*Denmark*]

F. Oosawa [*Japan*]

B. Pullman [*France*]

W. Reichardt [*Fed. Rep. Germany*]

M. Sela [*Israel*]

J. Tigyí [*Hungary*]

C. A. Tobias [*U.S.A.*]

Published for the International Union for  
Pure and Applied Biophysics

Cambridge University Press, 1972

PUBLISHED BY

# Contents

---

---

## No. 1. FEBRUARY 1972

B. M. JOHNSTONE and P. M. SELICK. The peripheral auditory apparatus	<i>page 1</i>
AAGE R. MØLLER. Coding of sounds in lower levels of the auditory system	59
News from IUPAB	157

## No. 2. MAY 1972

JAMES L. MCGAUGH, STEVEN F. ZORNETZER, PAUL E. GOLD and PHILIP W. LANDFIELD. Modification of memory systems: some neurobiological aspects	164
D. A. HAYDON and S. B. HLADKY. Ion transport across thin lipid membranes: a critical discussion of mechanisms in selected systems.	187
News from IUPAB	283

## No. 3. AUGUST 1972

GEORGE T. REYNOLDS. Image intensification applied to biological problems	296
STANLEY D. CARLSON. Microspectrophotometry of visual pigments	350
FRANCO CELADA and ROBERTO STROM. Antibody-induced conformational changes in proteins	396
News from IUPAB	427

CONTENTS

No. 4. NOVEMBER 1972

- B. H. LAVENDA. The theory of multi-stationary state transitions  
and biosynthetic control processes *page* 429
- O. KRATKY and I. PILZ. Recent advances and applications of  
diffuse X-ray small-angle scattering on biopolymers in dilute  
solutions 481
- News from IUPAB 539

## INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* will contain between two and five review articles in each issue. Each review article should normally consist of about 20 printed pages, including text and figures, but when necessary more space can be allowed (one page corresponds to about 400 words).

2. Normally, authors will be invited to contribute by the Editors. Authors who wish to contribute to *Quarterly Reviews of Biophysics* should write to one of the Editors, before submitting a manuscript.

3. The reviews should preferably be written in English. Two copies are required and should be typed in double spacing with a margin of  $1\frac{1}{2}$  inches (4 cm) all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed separately at the end of the manuscript. Each review must begin with a table listing the sub-headings. The summary, if necessary, will be printed at the end of each review.

4. The style of presentation should be as concise as possible and only pertinent references included. In this respect *Quarterly Reviews of Biophysics* differs from the various types of annual reviews which attempt to collect all references in a particular field. The review should be a concise essay. The references should be listed alphabetically and include the title of each paper. In the text the reference should be to author and year. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. Elsewhere customary abbreviations will be used (as, for example, in *Chemical Abstracts*).

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The arrangements with the publisher (Cambridge University Press) are such that rapid publication can be secured. The time from acceptance of a manuscript to publication can in favourable cases be  $2\frac{1}{2}$  to 3 months. The author will receive only one set of page proofs for correction.

7. The author will receive 50 reprints of his review free. Extra reprints can be ordered.

# QUARTERLY REVIEWS OF BIOPHYSICS

---

---

Reviews on the following topics will appear in forthcoming issues:

Volume 6, Number 1, due to appear in February 1973, is to be published as a Memorial to the late AHARON KATZIR KATCHALSKY. It will contain an important Review on 'Network Thermodynamics: Dynamic Modelling of Biophysical Systems', completed just before he died. His co-authors are G. F. Oster and A. S. Perelson.
