

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

REVIEW ARTICLE

Cognitive behavioural therapy for psychosis prevention: a systematic review and meta-analysis

Hutton P & Taylor PJ 449

ORIGINAL ARTICLES

Metacognitive awareness of cognitive problems in schizophrenia: exploring the role of symptoms and self-esteem

Cella M, Swan S, Medin E, Reeder C & Wykes T 469

Neural correlates of the abolished self-referential memory effect in schizophrenia

Zhao Y, Zhang D, Tan S, Song C, Cui J, Fan F, Zhu X, Zou Y & Luo Y 477

Reduced parahippocampal cortical thickness in subjects at ultra-high risk for psychosis

Tognin S, Riecher-Rössler A, Meisenzahl EM, Wood SJ, Hutton C, Borgwardt SJ, Koutsouleris N, Yung AR, Allen P, Phillips LJ, McGorry PD, Valli I, Velakoulis D, Nelson B, Woolley J, Pantelis C, McGuire P & Mechelli A 489

Cannabis use and first-episode psychosis: relationship with manic and psychotic symptoms, and with age at presentation

Stone JM, Fisher HL, Major B, Chisholm B, Woolley J, Lawrence J, Rahaman N, Joyce J, Hinton M, Johnson S, Young AH, on behalf of the MiData Consortium 499

Neuroprotective effect of lithium on hippocampal volumes in bipolar disorder independent of long-term treatment response

Hajek T, Bauer M, Simhandl C, Rybakowski J, O'Donovan C, Pfennig A, König B, Suwalska A, Yucel K, Uher R, Young LT, MacQueen G & Alda M 507

Examination of the predictive value of structural magnetic resonance scans in bipolar disorder: a pattern classification approach

Rocha-Rego V, Jogia J, Marquand AF, Mourao-Miranda J, Simmons A & Frangou S 519

Increased body mass index makes an impact on brain white-matter integrity in adults with remitted first-episode mania

Kuswanto CN, Sum MY, Yang GL, Nowinski WL, McIntyre RS & Sim K 533

A randomized controlled comparison of integrative cognitive-affective therapy (ICAT) and enhanced cognitive-behavioral therapy (CBT-E) for bulimia nervosa

Wonderlich SA, Peterson CB, Crosby RD, Smith TL, Klein MH, Mitchell JE & Crow SJ 543

Psychological characteristics and motivation of women seeking labiaplasty

Veale D, Eshkevari E, Ellison N, Costa A, Robinson D, Kavouni A & Cardozo L 555

Prospective inter-relationships between late adolescent personality and major depressive disorder in early adulthood

Wilson S, DiRago AC & Iacono WG 567

Depression is related to an absence of optimistically biased belief updating about future life events

Korn CW, Sharot T, Walter H, Heekeren HR & Dolan RJ 579

Trajectories of functioning after remission from anxiety disorders: 2-year course and outcome predictors

Iancu SC, Batelaan NM, Zweekhorst MBM, Bunders JFG, Veltman DJ, Penninx BWJH & van Balkom AJLM 593

Biased attention to threat in paediatric anxiety disorders (generalized anxiety disorder, social phobia, specific phobia, separation anxiety disorder) as a function of 'distress' versus 'fear' diagnostic categorization

Waters AM, Bradley BP & Mogg K 607

Specificity of basic information processing and inhibitory control in attention deficit hyperactivity disorder

Salum GA, Sergeant J, Sonuga-Barke E, Vandekerckhove J, Gadelha A, Pan PM, Moriyama TS, Graeff-Martins AS, Gomes de Alvarenga P, do Rosário MC, Manfro GG, Polanczyk G & Rohde LAP 617

Drug-specific frontal laterality effects on frontal lobe activation of atomoxetine and methylphenidate in attention deficit hyperactivity disorder boys during working memory

Cubillo A, Smith AB, Barrett N, Giampietro V, Brammer M, Simmons A & Rubia K 633

The boundaries of the internalizing and externalizing genetic spectra in men and women

Kendler KS & Myers J 647

Training primary health care workers in mental health and its impact on diagnoses of common mental disorders in primary care of a developing country, Malawi: a cluster-randomized control trial

Kauye F, Jenkins R & Rahman A 657
