UNIVERSAL DRAFTING MACHINES.

When time presses, the Universal Drafting Machine proves its greatest worth. It is a remarkable aid to clearness of thought, accuracy and rapidity of expression. It considerably increases the efficiency of a draftsman owing to its accuracy and easy sensitive motion.

All our draftsmen use them; we could not afford to have our drawings made by the old method.

May we send YOU particulars?

B.S.A. Twist Drill Points

POINT THREE.
RIGID INSPECTION.

Every B.S.A. Twist Drill in its Progress from raw material to the finished production, has to pass through a series of inspections of the utmost severity. Expert viewers equipped with instruments capable of detecting variations of less than one thousandth part of an inch, test, gauge and scrutinise every B.S.A. drill not only when finished, but at every stage of manufacture. Nothing "almost correct" can pass this rigorous examination, and the detection of the slightest flaw or inaccuracy results in the immediate rejection of the drill.

The illustration is framed by a decorative border with a repeating geometric pattern. At the top center, a winged figure with spread wings is positioned above the words "TRADE MARK". Below this, a biplane is shown in flight, angled towards the right. The background features stylized, fluffy clouds. In the lower portion of the frame, a detailed landscape is depicted, showing a stone wall on the left, a path leading through a village with various buildings and a church spire, and a large rock formation on the right. The overall style is characteristic of early 20th-century technical or industrial advertising.

“SCEPTRE” supersedes “SUPER”

ANNOUNCEMENT

The SCEPTRE AVIATION Co., Ltd.

CONTRACTORS TO THE AIR MINISTRY.

Dudden Hill Lane, Willesden, N.W. 10

MANAGING DIRECTOR - N. LEWIN.

Telephone:—WILLESDEN 642 & 643 (2 lines)

Telegrams:—“SUPAVICOL, CRICK, LONDON.”

When we adopted the name of the Super Aviation Co., Ltd., we had no idea it was likely to clash with another Company's name, but it having been suggested some confusion has arisen by reason of the adoption of the word “Super,” and having no desire that this should be the result, we immediately offered to change our name on the matter being brought to our notice.

We therefore publish this announcement to acquaint our many customers that in future this business will be known as THE SCEPTRE AVIATION CO., LTD., and feel sure you will realise that though changed in name—the nature of the organisation remains the same—The Sceptre Aviation Co., Ltd., is as keenly anxious as ever to give you satisfactory service and to preserve your valued good-will.

99%
Ninety-nine per cent of the Magnetos fitted to Rotary Engines for fighting, scouting, and observation planes are of 'M-L' manufacture.

M-L Magnetos are lighter and smaller (yet stronger) than any pre-war magnetos of same electrical capacity. They are of British design and built by British labour in a British-owned factory. They have been supplied in large numbers for work of national importance.

The M-L Magneto, Type A.D.S., is designed for use on rotary or other engines in which the distributor is carried on the engine itself and does not form a part of the magneto. It is fitted with an "H" armature and gives two sparks per revolution.

"Better be Sure than Sorry"

A TRITE TRIPLEX TRUISM.

Many an air fighter has cause to be thankful for TRIPLEX SAFETY GLASS. Ordinary glass gives clear visibility—but it is fraught with danger. Mica is safe—but blurs the vision and is easily scratched. TRIPLEX SAFETY GLASS combines the advantages of these while eliminating the bad points. That is why on land, in the air, on sea, Triplex is forging to the front—the acknowledged best because it is consistently dependable. Write for the Triplex Catalogue, wherein the Triplex secret is frankly disclosed.

An Airman who has made sure writes:

My aeroplane was set on fire by a German shell at a considerable height, and I think I would have lost my sight and consequently my life if I had not been wearing your Triplex Goggles. As it was, I was able to effect a landing in spite of the flames. The machine was completely destroyed in a very short time.

PLEASE SEND ME ANOTHER PAIR OF GOGGLES. . .
