

CONTENTS POSTER BOOK \*

I. THE DISK-HALO INTERFACE IN OUR GALAXY

*P. Abrahám*

The “Cepheus Bubble”, Birth of a Galactic Chimney

*O. Bienamé, A. Robin, M. Crez , and V. Mohan*

The Vertical Distribution of Stars

*J.H. Grobbelaar and D.J. van der Walt*

Star Formation, Supernovae and the Longitude Distribution of Galactic Gamma Rays

*U. Haud*

Dynamics of the Outer Arm HVC

*F. Jansen, I. Halm, and D. de Niem*

Cosmic-ray Antiprotons from the Central Region of the Galaxy?

*P. Jenniskens and F.-X. D sert*

Emission and Extinction of Very Small Grains

*J.L. Jonas and E.E. Baart*

The Rhodes 2300 MHz Survey

*K.D. Kuntz and L. Danly*

The HVC/IVC Complex CII – Its Distance and Ionization

*S.E. Labov and B.H.W. Yan.*

The Anticorrelation between the Soft X-ray Background and Neutral Interstellar Material on Small Angular Scales

*H. Meyerdierks and A. Heithausen*

A Galactic-disk Loop Caused by Infalling Halo Clouds?

*J. Milogradov-Turin*

Temperature Parameter as a Proof for the Absence of an Elliptical Galactic Radio Halo

---

\* “The Interstellar Disk-Halo Connection in Galaxies – Poster Proceedings”  
(ISBN 90-72523-02-4 / available from Hans Bloemen, Space Research Leiden,  
P.O. Box 9504, 2300 RA Leiden, The Netherlands)

*S. Sakamoto, T. Hasegawa, M. Hayashi, T. Handa, K. Sunada, N. Kaifu*  
The University of Tokyo-Nobeyama CO(J=2-1) Galactic Plane  
Survey Project

*V.R. Shutenkov*  
Study of the Magnetic Field in the Galactic Halo using the Cor-  
relation Function of the Intensity of the Synchrotron Background  
Radiation

*L.V. Tóth and L.G. Balázs*  
Strip-like Structures in Cepheus on the IRAS Sky Flux Maps

## II. THE DISK-HALO INTERFACE IN OTHER GALAXIES

*A. Barteldrees and R.-J. Dettmar*  
The Large-scale Structure of Stellar Disks

*D.V. Bowen*  
The Disk-Halo Interface of NGC 4319

*C.L. Carilli, J.H. van Gorkom, and E.M. Haxthausen*  
Radio Observations of Quasar-Galaxy Pairs: A Study of Extended  
Gas in Disturbed Systems

*M. Dahlem, B. Koribalski, U. Mebold, and R. Wielebinski*  
Mass Outflow from the Nuclear Region into the Halo of NGC 1808

*R.-J. Dettmar and M. Dahlem*  
A Comparison of the Diffuse Ionized Gas and Radio Continuum  
Emission in Edge-on Galaxies

*R.-J. Dettmar, J.W. Keppel, M.S. Roberts, and J.S. Gallagher*  
Observations of the Diffuse Ionized Gas Perpendicular to the  
Plane of NGC 891

*G. Golla and R. Beck*  
Radio-continuum Emission of the Edge-on Galaxy NGC 5775

*T. Handa, R. Kawabe, S. Ishizuki, S. Ikeuchi, and Y. Sofue*  
Thickness of Molecular Gas in the Edge-on Galaxy NGC 891

*J.J. Hester, S.R. Kulkarni, R.J. Rand, and W.T. Deich*  
Warm Ionized Gas in the Edge-on Spirals NGC 891 and NGC  
3079

- J.A. Irwin and E.R. Seaquist*  
Heiles Shells in NGC 3079
- J. Kamphuis*  
High-velocity Gas and Superbubbles in the HI of M 101
- D.-W. Kim, G. Fabbiano, and G. Trinchieri*  
X-ray Spectra of Normal Galaxies and their Emission Mechanisms
- K.M. Lanzetta*  
The Evolution of High-redshift Lyman-limit Absorption Systems
- G.B. Lima-Neto, D. Gerbal, F. Durret, and M. Lachièze-Rey*  
The X-ray Analysis of Cluster A85 Revisited
- M. Prieto, E. Battaner, E. Florido, E. Mediavilla, and M.L. Saavedra*  
Star Formation at Large Galactic  $z$  and  $R$  of NGC 4013 and NGC 6504
- M. Prieto, A.M. Varela, C. Muñoz-Tuñón, J.E. Beckman, D.P. Longley*  
Photometric Studies of the Disk-Halo Interface in Sbc Galaxies
- H.-P. Reuter, U. Klein, and R. Wielebinski*  
Star Forming Regions and Relativistic Particles in M82
- D. J. Saikia, A. Pedlar, S.W. Unger, D.J. Axon, and G.J. Yates*  
The Large- and Small-scale Radio Structures of Nearby Galaxies
- H. Schulz*  
An HII Supershell in NGC 253

### III. THEORY AND MODELLING

- R.A. Benjamin and P.R. Shapiro*  
Nonequilibrium Absorption Line and Emission Spectrum Diagnostics for Radiatively Cooling Galactic Halo Gas
- R.C. Bishop and P.R. Shapiro*  
The Galactic Dynamo in the Presence of a Gaseous Halo
- A. Boulares*  
Galactic Stability by the Warm Intercloud Gas
- L. Brett and F.D. Kahn*  
Magnetic Fields and Magnetic Reconnection in the Disk and Halo

- S.P. Chakrabarti*  
Properties of Self-similar Spiral Shocks in Disks
- M.K. Dougherty, C.M. Ko, and J.F. McKenzie*  
A Static One-dimensional Galactic Halo Model, with Cosmic-ray Diffusion and Alfvén Wave Effects
- A. Ferrara and G. Einaudi*  
The Role of Instabilities in the Hydrodynamics of the Galactic Halo
- F. Ferrini, F. Matteucci, C. Pardi, and U. Penco*  
A Model for the Chemical Evolution of Halo and Disk
- M. Hattori, A. Habe, and T. Yoshida*  
Non-linear Thermal Instability in X-ray Halos of Galaxies and Cluster Cooling Flows
- M. Hernanz, E. Garcia-Berro, J. Isern, and R. Mochkovitch*  
Theoretical Halo and Disk White Dwarf Luminosity Functions
- C.M. Ko and M.K. Dougherty*  
Flux-tube Formulation of a Static Galactic Halo
- F. Li and S. Ikeuchi*  
Model Reaction Equations of the Connected Disk-Halo System
- S. Mineshige, P.R. Shapiro, K. Shibata, and T. Tajima*  
MHD Simulation of Halo Cloud Formation by Thermal Instability
- J. Palouš*  
Expanding Bubbles in 3D
- Peng Qiu-he*  
An Exponential Disk Model of 3D Galaxies and a New Method of Determining the Thickness of Galaxies
- P.R. Shapiro, S. Mineshige, and K. Shibata*  
Large-scale Explosions and Superbubbles in the Galactic Disk and Halo: MHD Simulations and Analytical Approximations
- I. Souvatzis*  
The Velocity Structure of Intermediate Negative Velocity Clouds Created by High-velocity-cloud – Disk Interaction
- M. Urbanik*  
The Parker Instability and Halo Polarization in Spiral Galaxies
