

Acta Numerica 2023

Volume 32

CONTENTS

- Low-rank tensor methods for partial differential equations 1
Markus Bachmayr
- The virtual element method 123
*Lourenço Beirão da Veiga, Franco Brezzi, L. Donatella Marini
and Alessandro Russo*
- Floating-point arithmetic 203
*Sylvie Boldo, Claude-Pierre Jeannerod, Guillaume Melquiond
and Jean-Michel Muller*
- Compatible finite element methods for geophysical fluid
dynamics 291
Colin J. Cotter
- Control of port-Hamiltonian differential-algebraic systems
and applications 395
Volker Mehrmann and Benjamin Unger
- Overcoming the timescale barrier in molecular dynamics:
Transfer operators, variational principles and machine
learning 517
Christof Schütte, Stefan Klus and Carsten Hartmann
- Linear optimization over homogeneous matrix cones 675
Levent Tunçel and Lieven Vandenbergh

Acta Numerica is an annual publication containing invited survey papers by leading researchers in numerical mathematics and scientific computing. The papers present overviews of recent developments in their area and provide ‘state of the art’ techniques and analysis.
