## THE MANUFACTURE OF PROPELLERS.

ALL who have seen propellers being carved out by hand will have realised the need of a machine for this work.

The Defiance Patent Propeller Forming Machine dispenses with all hand work except the final finishing operation. It will reduce the total time of production 50 per cent.

The machine works on the copying principle, the model rotating in the back centres while the blank is turned in the front centres. A roller moving over the surface of the model gives the necessary motion to the slide carrying the cutter head operating on the work.

In addition to turning propellers the machine will also deal with struts and other irregular shaped work up to 12in. diameter by 14ft. long.

As sole agents for the Defiance Machine Works we shall be pleased to place the services of a woodworking specialist at the disposal of anyone interested in propeller manufacture.

Guarantees of production can be given together with advice on the best method of operating the machine.

**“Done some very good work.”**

*“I am pleased to state that the car (Belsize 3 Tonner) is running fine, and has done some very good work this last six months.”*

*Extract from letter from Motor Driver in A.S.C.*

**I**N producing this series of pictorial testimonials we endeavour to lend the weight of user's opinion to our oft repeated claims.

During the awful weather of last winter the Belsize Three Tonner stood up to the test of war service day after day during the most severe winter for many years.

□ □ □

At present Belsize production has ceased—the whole of our up-to-date plant being devoted to Government service—but the after-war Belsize will still carry out our well-defined policy of strength and reliability.

# B.L.I.C.

THE BRITISH LIGHTING & IGNITION CO. LTD.

MODERN WARFARE is the supreme test of all mechanism—whatever the circumstances, it must not fail. And under these strenuous conditions the "B.L.I.C." Magneto has fully demonstrated its unrivalled superiority. Built in a British factory by British workmen, it is the most reliable Magneto yet constructed—British or foreign.
