Aims & Scope

Politics and the Life Sciences (PLS) is a biannual, interdisciplinary peer-reviewed journal with a global audience. PLS is the official journal of the Association for Politics and the Life Sciences, an American Political Science Association (APSA) Related Group and an American Institute of Biological Sciences (AIBS) Member Society. PLS publishes original scholarly research at the intersection of political science and the life sciences. The topic range includes evolutionary and laboratory insights into political behavior; from decision-making to leadership, cooperation, and competition; evolutionary analysis of political intolerance and violence, from group conflict to warfare, terrorism, and torture; political and political-economic analysis of life-sciences research, health policy, agricultural and environmental policy, and biosecurity policy; philosophical analysis of bioethical controversies; and historical analysis of currently misunderstood issues at the intersection of the social and biological sciences. Contributors include political scientists, political psychologists, life scientists, clinicians, health-policy scholars, bioethicists, biosecurity and international-security experts, environmental scientists and ecological economists, moral and evolutionary philosophers, political and environmental historians, communications and public-opinion researchers, and legal scholars.

Association for Politics and the Life Sciences

The Association for Politics and the Life Sciences (APLS) is an international and interdisciplinary association of scholars, scientists, and policymakers concerned with generating, disseminating, and using evolutionary, genetic, and ecological knowledge related to political behavior, public policy and ethics.

Do pandemics spawn extremism? <i>Spanish flu deaths and the Ku Klux Klan</i> Adam Chamberlain and Alixandra B. Yanus	289
LETTER	
Sleeping giant: <i>A research agenda for politics and chronobiology</i> Aleksander Ksiazkiewicz	298

Welcome to *PLS*

POLITICS AND THE LIFE SCIENCES is an interdisciplinary peer-reviewed journal with a global audience. *PLS* is owned by the ASSOCIATION FOR POLITICS AND THE LIFE SCIENCES, the APLS (www.aplsnet.org), and has been published since 1982, with the first issue published by Cambridge University Press in Spring 2016.

PLS publishes original scholarly research at the intersection of politics and the life sciences. The topic range includes evolutionary and laboratory insights into political behavior, from decision-making to leadership, cooperation, and competition; evolutionary analysis of political intolerance and violence, from group conflict to warfare, terrorism, and torture; political and political-economic analysis of life-sciences research, health policy, agricultural and environmental policy, and biosecurity policy; philosophical analysis of bioethical controversies; and historical analysis of currently misunderstood issues within the range described above. Contributors include political scientists, political psychologists, life scientists, clinicians, health-policy scholars, bioethicists, biosecurity and international-security experts, environmental scientists and ecological economists, moral and evolutionary philosophers, political and environmental historians,

communications and public-opinion researchers, and legal scholars.

PLS is published online (www.cambridge.org/pls) twice annually, in the spring and fall, by Cambridge University Press. Papers succeeding in peer review, once emerging from revision and prepress routines, may be published online-before-print for access by subscribers, requesting journalists, and, in featured instances, the public.

PLS is indexed comprehensively in full text, from its first to its latest issue, on Cambridge Core (www.cambridge.org/pls). *PLS* is indexed comprehensively from March 2004, issue 23(1), at BioOne.2 (www.bioone.org). All titles and abstracts are indexed in MEDLINE at PubMed (www.pubmed.gov). Back issues are archived in full text at JSTOR (www.jstor.org). *PLS* is also included in Academic Search Alumni Edition, Academic Search Premier, Academic Search Product Family, International Political Science Abstracts, Psychology & Behavioral Sciences Collection, and Social Sciences Abstracts all aggregated for institutions by EBSCOhost®, a commercial service. All submissions to *PLS* should be made online through ScholarOne at: mc.manuscriptcentral.com/pls.
