The challenge  
for science  
and technology

International Trade Fair  
and Congress for  
the Geosciences  
and Geotechnology

Cologne, 2 – 5 May

# 1995

**T**he preservation of the natural habitats of the earth – both for ourselves and for our descendants – has for some time provided a common global objective for the fields of economics, science and politics and geotechnology. The earth sciences and geopolitics now have a true international forum – geotechnica. geotechnica presents the complete world spectrum of currently available earth science – and geotechnical-related specialist know-how under one roof – from mining to environmental technology, from detection of former waste disposal sites to redevelopment, from waste disposal to recycling. geotechnica presents it all. In parallel with this specialists event the geotechnica congress will take place once again from 3rd to 5th May. The general theme of the congress will be “Geosciences and geotechnology poised between ecology and economics – from resources to recycling” and will cover in-depth the essential life elements for continued human existence on planet Earth – soil and water, air and climate.

**geotechnica '95: A forum for the world  
at the heart of Europe**

- 500 exhibitors
- 20,000 professional visitors
- 25,000 sq. metres of exhibiting space
- 2,000 congress participants

## **New Views on an Old Planet**

A History of Global Change  
Second Edition  
TJEERD H. VAN ANDEL

In this revised edition of his award winning book on the earth's history, Professor van Andel updates and expands his earlier text drawing on a wealth of new knowledge. In concise and compelling prose, this book provides a historical account of the global change.

£40.00 net HB 0 521 44243 5 400 pp.  
£16.95 net PB 0 521 44755 0

## **The Seismicity of Egypt, Arabia and the Red Sea**

A Historical Review  
N. N. AMBRASEYS, C. P. MELVILLE and R. D. ADAMS  
A detailed and intensive study of historical sources and a review of the instrumental data from this century have led to this detailed catalogue of earthquakes.

£60.00 net HB 0 521 39120 2 201 pp.

## **Benthic Foraminiferal Biostratigraphy of the South Caribbean Region**

H. M. BOLLI, J. P. BECKMANN and J. B. SAUNDERS  
Benthic foraminifera from the classic southern Caribbean region are presented in this book, complete with detailed illustrations. Around 1000 species are assembled – from the Cretaceous to the Miocene.

£90.00 net HB 0 521 41521 7 420 pp.

## **Hydrology and Water Management in the Humid Tropics**

Hydrological Research Issues and Strategies for Water Management

Edited by M. BONELL, M. M. HUFSCHMIDT and J. S. GLADWELL

This book considers all aspects of hydrology in the humid tropics. It covers climatology, meteorology, process hydrology, sedimentation, water quality and freshwater ecology.

£70.00 net HB 0 521 45268 6 624 pp.

## **Mineralogical Applications of Crystal Field Theory**

Second Edition  
ROGER G. BURNS

The second edition of this classic book looks at crystal field theory and its applications. Useful as an advanced textbook as well as a reference work.

£50.00 net HB 0 521 43077 1 560 pp.  
*Cambridge Topics in Mineral Physics and Chemistry 5*

## **Earth's Glacial Record**

Edited by M. DEYNOUX, J. M. G. MILLER, E. W. DOMACK, N. EYLES, I. FAIRCHILD and G. M. YOUNG

Glacial deposits provide a record of climate and eustatic change on Earth. This book presents new work on ancient glacial rocks from the International Geological Correlation Project 260.

£60.00 net HB 0 521 42022 9 284 pp.  
*World and Regional Geology Series*

## **Pleistocene History of the Lower Thames Valley**

PHILIP L. GIBBARD  
The Lower Thames Valley includes some of the most important palaeolithic archaeological sites and fossiliferous localities in the country. These are reviewed in a regional context for the first time, providing a unique insight into this classic area for British Pleistocene studies.

£60.00 net HB 0 521 40209 3 235 pp.

## **Global Geological Record of Lake Basins**

Volume 1  
Edited by E. GIERLOWSKI-KORDESCH and K. KELTS  
This series of books will assess, for every geological time window, key lacustrine sequences worldwide in the form of short summaries of specific deposits.

£80.00 net HB 0 521 41452 0 440 pp.  
*World and Regional Geology Series 4*

## **The Nile: Sharing a Scarce Resource**

An Historical and Technical Review of Water Management and of Economic and Legal Issues  
Edited by the late P. P. HOWELL and J. A. ALLAN  
The environmental element of the complex matter of evaluating and managing the international water resource of the Nile is addressed in this volume.

£40.00 net HB 0 521 45040 3 426 pp.

## **A History of the Earth**

JOHN J. W. ROGERS  
This book surveys the history of the Earth and the nature of the processes that controlled its history. The book focuses on the geological record, historical topics, the development of modern ocean basins and the nature of cratonic sedimentary cover sequences.

£50.00 net HB 0 521 39480 5 325 pp.  
£22.95 net PB 0 521 39782 0

## Journals in the Earth Sciences...

# MODERN GEOLOGY

Co Editors-in-Chief

Dr N. Fraser, Virginia Museum of Natural History, 1001 Douglas Avenue,  
Martinsville VA 24112, USA

Dr W. Wimbledon, Countryside Council for Wales, Plas Penrhos, Fford Penrhos,  
Bangor, Gwynedd LL57 2LQ, UK

*Modern Geology* reports experimental and theoretical findings at the frontier of geological research. Original papers, reviews and short communications afford comprehensive coverage of important developments in the earth and planetary sciences. The editors aim to preserve a balanced perspective of the physical, chemical and biological spheres and to identify major trends and areas of growth in the field. To complete its far-ranging coverage, the journal offers discussion and comments on previous contributions, as well as book reviews.

4 Issues per Volume • ISSN: 0026-7775 • Current Subscription: Volume 20 (1993)

# PALAEOCLIMATES

## DATA AND MODELLING

Editors-in-Chief

Paul J. Valdes, Department of Meteorology, University of Reading, 2 Earley Gate,  
Whiteknights, Reading, Berkshire, RG6 2AU, UK

Judith Totman Parrish, Department of Geosciences, Gould-Simpson Building,  
The University of Arizona, Tucson, Arizona 85721, USA

*Palaeoclimates* will publish a balance of high quality papers on both the geological and climatological aspects of palaeoclimate research. It will be unique in bringing together palaeoclimate modelling and data studies in a single publication and by making geologists and modellers each aware of the details, strengths and limitations of the others' approaches will enhance and further joint research. *Palaeoclimates* will include original research papers on all aspects of the climate and environment of the Quaternary and earlier times. Discussion and review papers will also be included, concerning new aspects of research and special topics of current and widespread interest to the palaeoclimate community.

# HISTORICAL BIOLOGY

## AN INTERNATIONAL JOURNAL OF PALEOBIOLOGY

Co Editors

E. Buffetaut, Laboratoire de Paléontologie des Vertébrés, Case 106, 4 Place Jussieu,  
75252, Paris Cedex 05, France

A. Hallam, The School of Earth Sciences, University of Birmingham, Edgbaston,  
Birmingham, B15 2TT, UK

*Historical Biology* provides a vehicle for developments in the sciences concerned with the history of life through geological time and the biology of past organisms, and seeks to encourage a diversity of approaches in this rapidly expanding field. It emphasizes modern and controversial topics. Its range includes paleobiology, paleoethology, paleobiogeography, evolutionary processes and patterns, molecular paleontology, extinction, phenomena, taphonomy, and aspects of geology, geochemistry and geophysics that have a direct bearing on paleobiological questions.

4 Issues per Volume • ISSN: 0891-2963 • Current Subscription: Volume (7-8) 1993

# New Zealand Journal of Geology and Geophysics

- An international journal of the Earth Sciences of the Pacific and Antarctic regions
- Welcomes review articles, letters to the editor, book reviews and preliminary notes
- Includes papers on geology, geophysics, geomorphology, soil science and the atmospheric sciences
- Has regular special issues of topical thematic importance
- Accepts papers from authors worldwide. Every paper is internationally refereed and distributed
- Is published quarterly in large A4 format, about 500 pages per year
- Has an established international reputation of over 35 years

*Abstracted in:* Aquatic Sciences & Fisheries Abstracts; Bibliography & Index of Geology; Signaletique; Chemical Abstracts; Current Contents; Geo Archive; GeoRef; Geological Abstracts; INIS Atomindex; Meteorological & Geostrophysical Abstracts; Mineralogical Abstracts; Oceanic Abstracts; Pollution Abstracts; Research Alert; Science Citation Index; Scisearch; SIRIS/STIX.

Editor Mr R. P. Lynch

Manuscripts, advertising, enquiries, and requests for "Information for authors" should be addressed to:

## NOTES FOR CONTRIBUTORS

**Contributions** for publication should be addressed to The Editors, *Geological Magazine*, Department of Earth Sciences, Downing Street, Cambridge CB2 3EQ, England, or may be submitted through a member of the Editorial Advisory Board (addresses inside front cover). Rapid Communications should be clearly marked as such on the envelope. Submission implies that the manuscript has not been published previously nor currently submitted for publication elsewhere. Upon acceptance of a manuscript, the author will be asked to transfer copyright to the publisher.

All **contributions**, whether articles, correspondence or reviews, must be sent in triplicate and typed on one side of the paper, with wide margins and double-line spacing throughout. Any minor corrections should be made neatly in the typescript, leaving the margins clear. Contributions should follow the general style of papers in recent issues of the *Magazine*. The author is invited to nominate up to five possible referees, who will not necessarily be used.

**Articles** must be accompanied by a brief, informative rather than indicative, abstract. Headings should be set out clearly but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; subheadings should be numbered 2.a., 2.b., etc., and tertiary headings 2.a.1., 2.a.2. No cross-references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.2. The SI system of units should be used. The author should mark in the margin of the manuscript where figures and tables may be inserted. References to points in larger works should, where possible, quote the page reference, e.g. Ager, 1981, p. 102. Authors alone are responsible for the correctness of their references.

**Rapid Communications** should follow the style of articles and must be no more than four printed pages of the *Magazine* (approximately 5000 word-equivalents) including an abstract of no more than 100 words. These contributions will be dealt with by a streamlined schedule and should appear within six months from receipt. To meet this schedule, authors will be required to make revisions with minimal delay.

**Discussions** of papers which have already appeared in the *Magazine* are welcomed, subject to the four-page limit.

**Tables** should be typed with double-line spacing on sheets separate from the running text. Each table must have a caption that will make the data in the table intelligible without reference to the text.

**Illustrations** should be submitted at 1½ × size to be published. The Author's name and figure number should be clearly marked on the

back of each piece of artwork. Figures will preferably be either single column (80 mm) or double column (169 mm) width when printed. The height of figure can vary in either width up to full print area height (240 mm). Illustrations should have **scale bars**, not '× 40'. Redrafting may be required by the editors if major savings in print area can be achieved without loss of information. **Detailed maps** or **multiple logs** may well require a whole page and the size of the lettering should match the necessary reduction. Where necessary break a figure into two facing pages; **folding figures** will not be accepted. **Landscape figures** should have no lettering upside down on the final printed page. Avoid where possible gross disparities in lettering size on the drawing. See figure below for optimum size of original and final lettering size. Boxes of ornament should be explained within the figure, not in the caption. Figures composed of **photographs** should be glossy prints presented at publication scale. Each component part should be named with a lower-case letter and given a scale bar. Photographic artwork is numbered as part of the sequence of figures, not as separate plates. The *Magazine* will be able to publish a limited number of free **colour plates** each year; the editors will decide which plates to accept on their scientific merit. Authors submitting colour plates are asked to give detailed reasons why colour is necessary. Duplicates of illustrations should be sent, and may be prints or, preferably, photocopies reduced to final size. Figure captions must be typed with double-line spacing on sheets separate from the running text.

**References** must be double-spaced and spelt out in full, e.g.

BROOKS, M. & JAMES, D. G. 1975. The geological results of seismic refraction surveys in the Bristol Channel, 1970–73. *Journal of the Geological Society, London* **131**, 163–82.

Books should be cited as:

AGER, D. V. 1981. *The Nature of the Stratigraphical Record*, 2nd ed. London: Macmillan, 122 pp.

BOTT, M. H. P. 1973. The evolution of the Atlantic north of the Faroe Islands. In *Implications of Continental Drift to the Earth Sciences*, vol. 1 (eds D. H. Tarling and S. N. Runcorn), pp. 175–89. London, New York: Academic Press.

Unpublished work should normally be referred to in the text in parentheses as, for example, 'private communication' or 'unpub. Ph.D. thesis, Univ. London, 1988', and not included in the reference list unless in the press.

Fifty offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges if ordered when the proofs are returned.

## CONTENTS

- Fluid supersaturation and crystallization in porous media  
PUTNIS, A., PRIETO, M. & FERNANDEZ-DIAZ, L. 1-13
- A revision of Ordovician series and stages from the historical type area  
FORTEY, R. A., HARPER, D. A. T., INGHAM, J. K., OWEN, A. W.  
& RUSHTON, A. W. A. 15-30
- Pterosaur fossils from the Cretaceous of Chile: evidence for a pterosaur  
colony on an inland desert plain  
BELL, C. M. & PADIAN, K. 31-38
- Podiform chromitite-bearing ultrabasic rocks from the Bragança Massif,  
northern Portugal: fragments of island arc mantle?  
BRIDGES, J. C., PRICHARD, H. M. & MEIRELES, C. A. 39-49
- Sedimentology of the Permian Radok Conglomerate in the Beaver Lake  
area of MacRobertson Land, East Antarctica  
FIELDING, C. R. & WEBB, J. A. 51-63
- Palaeomagnetism of Late Ordovician igneous intrusions from the  
northern Welsh Borderlands: implications to motion of Eastern  
Avalonia and regional rotations  
PIPER, J. D. A. 65-80
- Mylonitic mafic granulite in fault megabreccia at Clarke Head, Nova  
Scotia: a sample of Avalonian lower crust?  
GIBBONS, W. & MURPHY, J. B. 81-90
- Major northwest-directed Caledonian thrusting and folding in  
Precambrian rocks, northwest Mayo, Ireland  
JOHNSTON, J. D. 91-112
- RAPID COMMUNICATIONS**
- The durations of Silurian graptolite zones  
HUGHES, R. A. 113-115
- Phosphatized soft tissues in bivalves from the Portland Roach of Dorset  
(Upper Jurassic)  
WILBY, P. R. & WHYTE, M. A. 117-120
- DISCUSSION**
- Comment on physical properties of carbonatite magmas inferred from  
molten salt data, and application to extraction patterns from  
carbonatite-silicate magma chambers  
JONES, A. P., DOBSON, D. P. & GENGE, M. 121
- REVIEWS** 123-133
- PUBLICATIONS RECEIVED** 135
- NOTICES** 137
