

Directions to Contributors - Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of *The Proceedings* (March), or contact the Editorial Office on +44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

Page format. The *Proceedings* is printed in single-column format (column width of 135mm) with a text area of 135 x 203 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single-column or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

Illustrations. Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

References. References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Bingham, S. A. & Cummings J. H. (1985). Urine nitrogen as an independent validity measure of dietary intake: a study of nitrogen balance in individuals consuming their normal diet. *American Journal of Clinical Nutrition* 42, 1276-1289.

Haraldsdottir, J. (1989). Dietary history. In *Manual on Methodology for Food Consumption Studies*, pp. 88-92 (M. E. Cameron and W. A. van Staveren, editors). Oxford: Oxford University Press.

Underwood, E.J. (1977). *Trace Elements in Human and Animal Nutrition*, 5th ed. New York: Academic Press.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E.Sambrook, Executive Editor, The Proceedings of the Nutrition Society, The Nutrition Society, 10 Cambridge Court, 210 Shepherd Bush Road, London W6 7NJ, UK.

Manuscripts. Three complete copies of the manuscript and artwork should be submitted to:

Contents

Editorial

- Proceedings of the Nutrition Society 1942–1997.*
Kate Younger xi–xiii

Obituary

- Muriel A. K. Westland
John W. T. Dickerson xv

University of Ulster at Coleraine, 24–28 June 1996

Symposium on 'Mechanisms of energy compensation'

Chair: R. J. Stubbs, Rowett, Aberdeen

- How can energy balance be achieved by free-living human subjects?
John M. de Castro 1–14
- Control of energy balance by a wild ungulate, the kudu (*Tragelaphus strepsiceros*)
through adaptive foraging behaviour.
Norman Owen-Smith 15–24
- Human pattern of food intake and fuel-partitioning during weight recovery after
starvation: a theory of autoregulation of body composition.
A. G. Dulloo 25–40
- An energy sensor for control of energy intake.
Mark I. Friedman 41–50

Symposium on 'Nutrition and poverty in industrialized countries'

Chair: C. J. K. Henry, Oxford Brookes University

- Nutrition and poverty in Europe: an overview.
E. A. Dowler & B. M. Dobson 51–62
- Hunger, food security and welfare policies: issues and debates in First World
societies.
Graham Riches 63–74
- Socio-economic differentials in health: the role of nutrition.
George Davey Smith & Eric Brunner 75–90
- Developments in the UK: work of the Low Income Project Team.
Michael Nelson 91–100
- Nutrition and poverty in industrialized countries: report of roundtable discussion.
J. L. Buttriss 101–103

Symposium on 'The weaning process'

Chair: J. Morgan, University of Surrey

- Weaning in Britain: practice, policy and problems.
Brian A. Wharton 105–119
- Ethnic influences on weaning diet in the UK.
John James & Anita Underwood 121–130
- Weaning and dental health.
R. D. Holt 131–138
- Complementary feeding in developing countries: factors affecting energy intake.
Kenneth H. Brown 139–148
