CONTENTS

Articles

UK pension changes in 2015: some mathematical considerations	<i>John Stubbs and Jacob Adetunji</i>	193
The mean-square value of the divisor function	<i>Peter Shiu</i>	203
Properties of Pythagorean quadrilaterals	<i>Martin Josefsson</i>	213
A simple approach to solving cubic equations	<i>Fleur T. Tehrani</i>	225
An alternative recursive formula for the sums of powers of integers	<i>José Luis Cereceda</i>	233
Circles in areals	<i>Geoff C. Smith</i>	239
What is Bayesian statistics?	<i>Osvaldo Marrero</i>	247
Using double integrals to solve single integrals	<i>G. J. O. Jameson</i>	257
Euler, the clothoid and $\int_0^{\infty} \frac{\sin x}{x} dx$	<i>Nick Lord</i>	266
An infinite product of nested radicals for $\log x$ from the Archimedean algorithm	<i>Thomas J. Osler, Walter Jacob and Ryo Nishimura</i>	274
A simple proof of Euler's continued fraction of $e^{1/M}$	<i>Joseph Tonien</i>	279
Cyclotomy and the heptadecagon	<i>Peter Shiu</i>	288
The incomplete gamma functions	<i>G. J. O. Jameson</i>	298
Obituary		
Sir Erik Christopher Zeeman (1925–2016)	<i>Ian Stewart</i>	307
Notes 100.16 to 100.27		
The Diophantine equation $n(x + y + z) = xyz$	<i>Stan Dolan</i>	314
The vector triple product and planar vector algebra	<i>Boyko B. Bantchev</i>	314

Notes 100.16 to 100.27 (continued)

Newton's semicircle and the probability integral	<i>Hsuan-Chi Chen</i>	317
A quick evaluation of $\lim_{m \rightarrow \infty} \sum_{k=0}^m \left(\frac{k}{m}\right)^m$	<i>Nick Lord</i>	321
Outside the box	<i>Jim Simons</i>	323
Generalising the arbelos	<i>Andrew Jobbings</i>	329
The maximal area property of cyclic quadrilaterals	<i>Mowaffaq Hajja</i>	335
A quartet of isogonal conjugates	<i>Gerry Leversha</i>	336
A synthetic proof of Dao's generalisation of the Simson line theorem	<i>Nguyen Le Phuoc and Nguyen Chuong Chi</i>	341
Normals to the Fermat line for a scalene triangle	<i>J. A. Scott</i>	345
An example of Aitken acceleration	<i>Martin Griffiths</i>	347
Proof without words: $\arcsin x + 2 \arcsin \sqrt{\frac{1-x}{2}} = \frac{\pi}{2}$	<i>David Miles</i>	351
Feedback		352
Problem Corner	<i>Nick Lord</i>	356
Student Problems	<i>Stan Dolan</i>	364
Reviews		367
