

RE-ISSUE, WITH ADDITIONS

## SCIENTIFIC INFERENCE

By HAROLD JEFFREYS. 10s. 6d. net

"A book of importance...may be recommended to everyone who is interested in the structure of our knowledge of the external world."

*The Oxford Magazine*

## ELASTICITY, PLASTICITY AND STRUCTURE OF MATTER

By R. HOUWINK. 21s. net

With a chapter on the Plasticity of Crystals, by W. G. BURGERS

The physicist's, the chemist's, and the technologist's approach to the phenomena of the deformation of matter are here co-ordinated, so that each may understand the others' aims, and all contribute to the advancement of the study as well as to the improvement of existing materials and the discovery of new ones.

## PRINCIPLES OF QUANTUM MECHANICS

By A. LANDÉ. 7s. 6d. net

This book develops the principles of quantum mechanics on the basis of a few standard observations. Thus it eliminates from the customary interpretation of the theory some unphysical ideas that have no counterpart in empirical facts.

## RANDOM VARIABLES AND PROBABILITY DISTRIBUTIONS

By H. CRAMER. 6s. 6d. net

*Cambridge Tracts in Mathematics and Mathematical Physics, No. 36*

The Mathematical Theory of Probability has lately become of growing importance owing to the great variety of its applications, and also to its purely mathematical interest. The subject of this Tract is the development of the purely mathematical side of the theory, without reference to the applications.

# CONTENTS

	PAGE
BABBAGE, D. W. A symmetrical configuration of $n + 1$ rational normal curves in $[2n]$ . . . . .	293
ROTH, L. The postulation of a multiple surface . . . . .	301
MAXWELL, EDWIN A. Regular canonical surfaces of genus three and four . . . . .	306
PEDOE, D. On the canonical systems of certain algebraic surfaces . . . . .	311
COXETER, H. S. M. Abstract definitions for the symmetry groups of the regular polytopes, in terms of two generators. Part II: the rotation groups . . . . .	315
LEGGETT, D. M. A. The effect of two isolated forces on the elastic stability of a flat rectangular plate. (With 3 Figures in the Text) . . . . .	325
LARMOR, SIR JOSEPH. On temperature in relation to quantal phenomena . . . . .	340
ROWLAND, E. N. The theory of the shot effect. II. (With 2 Figures in the Text) . . . . .	344
BURNETT, D. The numerical calculation of $\int_0^\infty x^m e^{-xf(x)} dx$ . . . . .	359
BURNETT, D. The determination of intermolecular forces in gases from their viscosity . . . . .	363
WILSON, A. H. The second order electrical effects in metals . . . . .	371
BLACKMAN, M. The effect of temperature on the reflexion of X-rays . . . . .	380
BAND, WILLIAM. A critical examination of Benedicks' homogeneous electro- thermal effect . . . . .	385
BARTLETT, M. S. Note on the derivation of fluctuation formulae for statistical assemblies . . . . .	390
BOSWORTH, R. C. L. A study of the properties of hydrogen films on tungsten by the method of contact potentials. (With 4 Figures in the Text). . . . .	394
BINNIE, A. M. and POOLE, E. G. C. The theory of the single-pass cross-flow heat interchanger. (With 3 Figures in the Text) . . . . .	403
