

OTHER PAPERS PRESENTED AT THE SYMPOSIUM

- Hot Spots in 3C 153, 3C 196, and 3C 268.4 / *I. Morison* (poster)
- Strong Radio Sources in Bright Spiral Galaxies / *J. Condon, M. Condon, G. Gisler & J. Puschell* (poster)
- Supersonic Jets / *M. Norman, L. Smarr, K. Winkler & M. Smith*
- Einstein Observations of M87 / *E. Schreier, E. Feigelson & P. Gorenstein*
- Flux Density Variations in Complete Samples of Radio Sources: Results of a Fourteen-Year Study / *G. Nicolson* (poster)
- Superluminal Motions in 3C 120 / *R. Walker* (poster)
- Optical Observations of QSOs from the UTRAO Survey / *D. Wills & B. Wills* (poster)
- The Radio Structures of BL Lac Type Objects / *D. Stannard*
- A Supernova Remnant in the Galaxy, NGC 4449 / *R. Bignell* (poster)
- The Texas Survey / *J. Douglas* (poster)
- Observations of a Selected Sample of Southern Radio Galaxies / *R. Smith* (poster)
- Structures, Spectra and Optical Identifications of Radio Sources from the GB 20 cm Surveys and the NRAO/MPI 6 cm Surveys / *J. Machalski, J. Masłowski, J. Condon & M. Condon* (poster)
- The Jodrell Bank Multi-Telescope Linked Interferometer / *J. Davis* (poster)
- RADIO OBSERVATIONS OF THE DOUBLE QUASAR / *B. Burke* (invited talk)
- Nobeyama mm-Wave Telescopes / *M. Inoue & H. Tanaka* (poster)
- Deep CCD Photography of Radio Sources / *C. Mackay, D. Astill, M. Batty, D. Jauncey, A. Wright, R. Hunstead, D. Morton & J. Robertson* (poster)
- A VLBI Search for Compact Components in Distant Extended Quasars / *P. Barthel* (poster)
- New Approach to Detection of Transient Radio Sources: Phased Array Telescope with Large Field of View / *T. Daishido, R. Oka, T. Ohkawa, T. Maruyama, T. Yokoyama, K. Nagane & H. Hirabayashi* (poster)
- Quasar Variability Data: An Alternate Presentation Mode / *E. Epstein & E. Schneider* (poster)
