THE WORKING MODEL OF DOCTORS SHOULD BE CHANGED IMMEDIATELY

X. Han-You

Department of Internal and Emergency Medicine, Clinical Institute, Workers Hospital of Nanyang Textile Corporation, Nanyang City, China

Purpose: The paper is to improve the quality of life and health of the peoples of the world by fostering and maintaining high standards of care in general practice/family medicine and other clinicians.

Method: By comparing the general practitioners/family physicians with the other clinicians of specialities, summarizing the shortcomings of present health care services of clinicians of specialities, the proposals for promoting health care services and the working model of doctors around the world were suggested.

Results: The article initiates that the values of general practice/family medicine should be fostered into other clinicians when all the clinicians take care of the patients in any conditions, critical or ordinary, by adopting to the values of general practice/family medicine. While the clinicians also take into account of their own specialities. The author outlines how the working model of doctors will be changed.

Conclusions: In applying these proposals, a healthy world and high quality of life of the peoples of the world will come soon after the working model of doctors is changed into right. So the quality of life and health of the peoples of the world can be promoted and enhanced.
