

# JOURNAL OF THE AUSTRALIAN MATHEMATICAL SOCIETY

Submission of research papers in all areas of pure mathematics including theoretical contributions in fields such as probability, mathematical physics and mathematical statistics are invited under the condition that the paper has not been published and is not being considered for publication anywhere else. The Journal is seeking articles of more general interest and of moderate length, preferring papers with a good introduction explaining the meaning and value of results. Articles below ten pages or much above thirty pages will usually not be accepted. In view of the pressure on space, only papers highly rated by assessors can be accepted.

For information on submission of papers, and to submit a paper, see the journal's submission system: <http://journal.austms.org.au/ojs/>. It is also possible to submit the files by emailing a PDF file to [jams@austms.org.au](mailto:jams@austms.org.au).

## PREPARATION OF MANUSCRIPTS

1. Papers should be double spaced and have a generous margin. Authors should keep copies of all files.

2. Files must be prepared using  $\text{\LaTeX}$  or another variant of  $\text{\TeX}$ , and must not contain definitions of additional commands. A style file can be downloaded by following appropriate links on the Journal website.

3. Each manuscript should include an abstract of no more than 150 words, preferably containing no formulae, a list of keywords, a 2010 Mathematics subject classification, and a short title of no more than 40 characters.

4. For the style of references consult recent issues of the journal. The current usage is either the number referencing [1], [2], [3], or the letter referencing, such as [DS1], [DS2], [DS3] if the authors are N. Dunford and J. T. Schwartz, and the reference is to the 3 volumes of their monograph. In either style, references should be ordered alphabetically by the first author's name. Abbreviations of journal names should follow Mathematical Reviews.

5. Avoid abbreviations such as Thm., Prop., Eq., Ex., iff. In the text do not use the symbols  $\forall$ ,  $\exists$ ,  $\implies$  and  $\iff$ . For more information about our stylistic requirements, see the Journal website accessible through [www.austms.org.au](http://www.austms.org.au).

6. Graphics should be prepared to professional standards, preferably using Postscript or  $\text{\LaTeX}$  drawing facilities. Charges may apply if the typesetters have to recreate a graphics file because the original is not suitable for printing.

**Copying:** This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are registered with the CCC may therefore copy material beyond the limits permitted by sections 107 and 108 of US copyright law subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional and commercial purposes. Code 1446-7887/2014 \$16.00.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions. For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

# Table of Contents

---

<b>The partial-isometric crossed products by semigroups of endomorphisms as full corners</b> <i>Adji, S. &amp; Zahmatkesh, S.</i>	145
<b>Quasiconvexity of bands in hyperbolic 3-manifolds</b> <i>Bowditch, B. H.</i>	167
<b>Holomorphic superposition operators between Banach function spaces</b> <i>Boyd, C. &amp; Rueda, P.</i>	186
<b>Coefficient estimates, Landau's theorem and Lipschitz-type spaces on planar harmonic mappings</b> <i>Chen, Sh., Ponnusamy, S. &amp; Rasila, A.</i>	198
<b>Strongly orthodox congruences on an <math>E</math>-inverse semigroup</b> <i>Fan, X. &amp; Chen, Q.</i>	216
<b>The Mahler measure of trinomials of height 1</b> <i>Flammang, V.</i>	231
<b>Polynomial equivalence of finite rings</b> <i>Grasgeger, G., Horváth, G. &amp; Kearnes, K. A.</i>	244
<b>Using ideals to provide a unified approach to uniquely clean rings</b> <i>Hiremath, V. A. &amp; Hegde, S.</i>	258
<b>Symmetric graphs with 2-arc transitive quotients</b> <i>Xu, G. &amp; Zhou, S.</i>	275
