The World Association for Disaster and Emergency Medicine

Founded in 1976 as the Club of Mainz

**Association Mondiale pour La Médecine de Catastrophe et D'Urgence
Medicina Prehospitalaria y de Catástrofes**

The management science of emergencies and disasters is evolving very rapidly. As a member of the World Association for Disaster and Emergency Medicine, you'll quickly see that we are in the exhilarating position of pioneers, ground-floor witnesses, and participants in a profound change that signals hope in today's troubled world.

Our members are involved—and informed. Our international meetings provide an excellent means for both scientific advancement, professional collaboration, and social interaction. Fellow-members are active participants in prehospital, humanitarian, disaster, and emergency medicine, from a variety of medical specialties worldwide.

WADEM Membership includes:

- Annual subscription to:
Prehospital and Disaster Medicine (PDM).
 - Membership certificate
 - Semi-annual newsletter
 - Membership directory
 - International recognition at the World Congress and other WADEM meetings
 - Preferred rates on registration at the Congress
 - Special Advantages for Affiliated Societies
- Affiliated Societies include: Association des Medecins Liberaux Disaster Relief, Sapeur (AMELISAP), Japanese Medical Team for Disaster Relief, Mediterranean Burns Club, The Society of Emergency Medicine-Singapore, Global Med-Net, Nordic Society for Emergency Medicine, and American College of Emergency Physicians (ACEP)

Upcoming World Congresses

10-13 May 1999 Osaka, Japan

2001 Lyons, France,

WADEM
3434 Fifthe Avenue, Suite 243
Pittsburgh, PA 15260
USA

At the biennial World Congress members and interested participants present and discuss scientific reports on emergency and resuscitation research, humanitarian relief for individual responses to major disasters, and differences in systems for providing prehospital care.

EQUIPMENT FOR FIELD HOSPITALS

Anaesthesia Machine MP-1

This model is designed for use with a "Draw-over" patient system. By using a resuscitator, ambient air is drawn through the vaporizer and to the patient. It also is possible to use oxygen from an oxygen concentrator.

Anaesthesia Machine MP-2

This is a MP-1 with flowmeters for O₂ and N₂O, as well as an O₂ flush valve added. The MP-2 works on the same principles as anaesthesia machines found in most hospitals. It can be used as a "Draw-over" machine if the oxygen supply fails.

Anaesthesia Machine MP-3

This is a MP-2 with a ventilator, suction, and bag-in-a-bottle system added - a very sophisticated machine. The MP-3 also can be used as a "Draw-over" machine similar to the MP-1 and MP-2.

NorHosp Stretcher Racks

For use in aircraft, trains, buses, vans, and on-board ships. The rack system is manufactured from special aluminum profiles designed to provide maximum strength and a minimum weight. The rack system makes it possible to place up to 3 stretchers above each other.

NorHosp Stretcher System

The NorHosp stretchers are stable and easy to carry. The stretcher is made of aluminum sections and a tough tarpaulin material that allows passage of x-rays. The stretcher can be supplied with short or long legs, with or without wheels. The flexibility and high quality make the NorHosp stretcher unique.

Heatpac Heating System

Heatpac is a charcoal-based, hot-air generator that serves as a personal heater. The system has been purchased by military forces around the world. It also is well-suited for civil defence and rescue organizations. A rescue-bag, infusion sleeve, medical storage container, and thermal boots can be added to the system.

NORWEGIAN MOBILE HOSPITALS AND DISASTER UNITS

**For use in tents, containers,
or already existing buildings.
More information available
on request.**
