In miniature high-precision gyros produced by BAC, separations between faces are often as little as a millionth of an inch

Sometimes our achievement is the maintenance of a gap of one-millionth of an inch...

...sometimes the halving of the distances of the world

Concorde, designed and built by BAC and Sud-Aviation, will bring New York within 3½ hours of London, Tokyo within 6½ hours of Los Angeles

In British Aircraft Corporation, a talent for microscopic perfection of detail is combined with the broad sweep of thinking which advances the state of world technology. It is this depth of ability and resource which has brought BAC technical and commercial success across the whole range of aerospace activity. This extends from supersonic and subsonic airliners to intricate instruments and from high-performance military aircraft to advanced missile systems and space satellites. Alone among Europe's aerospace companies, BAC is accepted beyond Europe's frontiers as one of the decisive influences on the patterns of development and the pace of progress.

Atkins Computing Services offers time-sharing

Our Scientific Data Systems SIGMA 5 system, the first of its kind in Britain has

- * 65K word core; 850 nanosecond cycle time with interleaved instructions.
 - * 3 high speed discs; 17 ms access; 384 KB/s transfer rate
 - * 3 nine track industry compatible tapes; 60 KB/s transfer rate
 - * 1 seven track industry compatible tape
 - * 30 inch incremental plotter
 - * remote communications facilities
- offers concurrently*
- * Interactive time sharing in foreground (16 K words of core available to the user)
 - * general purpose batch & remote batch processing in background
 - * batch job entry from time sharing consoles
- whilst the available software includes*
- * Fortran IVH with conversational debugging
 - * SDS Fortran IV with many enhancements
 - * Cobol
 - * Basic
 - * File Handling Processors

with team-sharing for problem solving

Atkins Computing Services Limited offer experience over many years in

- engineering *
 - science *
 - management controls and decision making *
 - project planning *
 - data processing *
- and by formally training and supplementing your own staff can provide*
- problem solving teams *
 - integrated systems *

We would like you to see and try the SIGMA 5 system and meet our team.

We're flying our own kite.

This aircraft is flown by members of the Shell-Mex and B.P. Aviation Unit. They fly to places as far apart as Kirkwall in the Orkneys, to Jersey in the Channel Islands; from Ipswich to Shannon. In fact, to any airport or airfield in the British Isles; to ensure our high standard of quality control and service is maintained. Like any other aircraft, whether commercial or private, this aeroplane can never be far from Shell and BP Aviation Services. You'll find us at over seventy airfields. Which all goes to show that no matter what you fly, we can take care of you. So we feel justified in flying our own kite.

Safety in the air — care of Shell-Mex and B.P.

Operators in the United Kingdom of the Shell and the BP Aviation Services.

Rolls-Royce the power in the air

Aircraft powered by Rolls-Royce turbofan, turbojet, turboprop or turboshaft engines are in service with or on order for more than 180 airlines, 250 corporate operators and 60 armed forces all over the world.

Some of these aircraft are shown below.

1. Lockheed L.1011 TriStar—RB.211
2. Concorde—Olympus 593.
3. McDonnell Douglas Phantom—Spey
4. VC10—Conway.
5. Westland Sea King—Gnome
6. Hawker Siddeley Harrier V/STOL—Pegasus.
