**AVES BRASILEIRAS**  
**BIRDS OF BRAZIL IDENTIFICATION GUIDE**

Now it's easy to discover the name of any Brazilian bird. In this book, J.D. Frisch gives the scientific name, the popular names (in Portuguese, Spanish and English) along with the habits and more than 1,560 drawings that facilitate identification by illustrating the original colors. Printed in Italy by Mondadori, this bestseller in its field, now includes an Addendum translating the major parts of the text into English.

Size 6" x 9" - 356 pages

**ORDER FORM**

Clip this coupon and send it, together with a check payable to:  
 Editora Dalgas-Ecolec Ltda. 01416 - Rua da Consolação, 3095 - São Paulo - SP - Brasil, to receive your copy by mail.

Deluxe Edition for libraries - £ 27,75       Special Edition for field research - £ 16,64

Please add £ 4,72 for air shipment.

## Wildfowl of Britain and Europe

M.A. Ogilvie

The ducks, geese, and swans are colourful birds, evocative of wild places. Their variety and beauty are illustrated in this book. The colour plates are by Peter Scott and N.W. Cusa and are from Volume I of the authoritative *Handbook of the Birds of Europe, the Middle East, and North Africa*. The text, specially written for this volume, draws on the *Handbook*. £6.96

## Birds of Prey of Britain and Europe

Ian Wallace

The magnificent birds of prey are a group of perennial fascination. Ian Wallace here provides a short but authoritative account, drawing on the *Handbook*. The illustrations are from Ian Willis's paintings of perched and flying birds from the *Handbook*, and the book provides a unique combination of superb illustrations and the latest scientific information. £6.95

# The River Wolf

Keith and Liz Laidler

The result of three years' extensive research in the forests and swamps of South America, this fascinating book presents the first in-depth study of the world's largest and most endangered otter, *pteronura brasiliensis*, known in the local language as "the river wolf". Keith and Liz Laidler make new discoveries about the giant otter's behaviour and the ecology of its habitat, and gather valuable information towards its preservation. At the same time they give a delightful account of the Guyana Rain Forests and the other inhabitants – from anacondas to killer bees, and from howler monkeys to piranha fish.

*"A real life adventure of two young zoologists in the forests of Guyana, studying the giant otter to help save it from extinction. Read it and enjoy it, as I did, and then take up the cause of conservation with the authors."*

David Bellamy
