

QUARTERLY REVIEWS OF BIOPHYSICS

VOLUME 9 1976

Editors: A. Engström [*Sweden*], A. Ehrenberg [*Sweden*],
R. D. Keynes [*United Kingdom*],
G. Felsenfeld [*U.S.A.*]

Council of IUPAB

B. Chance [*U.S.A.*], *President*

S. Ebashi [*Japan*] *Vice-President*

P. G. Kostyuk [*U.S.S.R.*] *Vice-President*

F. Lynen [*Fed. Rep. Germany*], *Hon Vice-President*

R. D. Keynes [*United Kingdom*], *Secretary-General*

J. Coursaget [*France*]

M. Errera [*Belgium*]

A. R. Gopal-Ayengar [*India*]

V. S. Gurfinkel [*USSR*]

O. Maaløe [*Denmark*]

M. Montal [*Mexico*]

D. C. Phillips [*United Kingdom*]

F. M. Richards [*U.S.A.*]

M. Sela [*Israel*]

J. Tigyi [*Hungary*]

H. T. Witt [*Fed. Rep. Germany*]

K. Wuthrich [*Switzerland*]

Published for the International Union for
Pure and Applied Biophysics

CAMBRIDGE UNIVERSITY PRESS

CAMBRIDGE · LONDON · NEW YORK

Contents

No. 1. FEBRUARY 1976

RUDOLF RIGLER and MANS EHRENBERG. Fluorescence relaxation spectroscopy in the analysis of macromolecular structure and motion	I
JOSEF EISINGER. Energy transfer and dynamical structure	21
D. MAGDE. Chemical kinetics and fluorescence correlation spectroscopy	35
WATT W. WEBB. Applications of fluorescence correlation spectroscopy	49
MANS EHRENBERG and RUDOLF RIGLER. Fluorescence correlation spectroscopy applied to rotational diffusion of macromolecules	69
L. DE MAEYER, K. GNADIG, J. HENDRIX and B. SALEH. Photon correlation spectroscopy of molecular processes in solution	83
J. MICHAEL SCHURR. Relaxation of rotational and internal modes of macromolecules determined by dynamic scattering	109
News from IUPAB	131

No. 2. MAY 1976

D. BEALE and A. FEINSTEIN. Structure and function of the constant regions of immunoglobulins	135
M. M. MALTEMPO and T. H. MOSS. The spin $3/2$ state and quantum spin mixtures in haem proteins	181
D. R. TRENTHAM, J. F. ECCLESTON and C. R. BAGSHOT. Kinetic analysis of ATPase mechanisms	217

N. M. EMANUEL. Free radicals and the action of inhibitors of radical processes under pathological states and ageing in living organisms and in man	283
News from IUPAB	309
No. 3. AUGUST 1976	
W. REICHARDT and T. POGGIO. Visual control of orientation behaviour in the fly.	
I. A quantitative analysis	311
II. Towards the underlying neural interactions	377
RECOMMENDATIONS FOR MEASUREMENT AND PRESENTATION OF BIOCHEMICAL EQUILIBRIUM DATA	439
News from IUPAB	457
No. 4. NOVEMBER 1976	
G. F. BAHR, W. F. ENGLER and H. M. MAZZONE. Determination of the Mass of Viruses by Quantitative Electron Microscopy	459
L. GOLDMAN. Kinetics of channel gating in Excitable Membranes	491
D. A. BRANT. Conformational theory applied to polysaccharide structure	527
News from IUPAB	597

INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origin of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* **1**, 3-33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.

QUARTERLY REVIEWS OF BIOPHYSICS

Reviews on the following topics will appear in forthcoming issues:

Biological and model membrane studied by nuclear magnetic resonance of spin one half nuclei

H. WENNERSTRÖM and GÖRAN LINDBLOM

Structural basis for the specificity of antibody-antigen reactions and structural mechanisms for the diversification of antigen-binding specificities

EDUARDO A. PADLAN

Electrically gated ionic channels in lipid bilayers

GERALD EHRENSTEIN and HAROLD LECAR
