Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 17, 2014 (12 issues):
Internet/print package: £1063/\$2040 Americas only/€1704 EU only
Internet only: £790/\$1497 Americas only/€1256 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn.edoffice@cambridge.org

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

Nutrition in the first 500 days of life
MA Cardoso and AJ Hure 1907

HOT TOPIC – Nutrition during pregnancy

Development of a New Nordic Diet score and its association with gestational weight gain and fetal growth – a study performed in the Norwegian Mother and Child Cohort Study (MoBa)
ER Hillesund, E Bere, M Haugen and NC Øverby 1909

Adherence to nutritional guidelines in pregnancy: evidence from the Growing Up in New Zealand birth cohort study
SMB Morton, CC Grant, CR Wall, PE Atatoa Carr, DK Bandara, JM Schmidt, V Ivory, HM Inskip and CA Camargo Jr 1919

Dietary changes during pregnancy and the postpartum period in Singaporean Chinese, Malay and Indian women: the GUSTO birth cohort study
L-W Chen, YL Low, D Fok, WM Han, YS Chong, P Gluckman, K Godfrey, K Kwek, S-M Saw, SE Soh, KH Tan, MFF Chong and RM van Dam 1930

Dietary intake assessment in women with different weight and pregnancy status using a short questionnaire
Å Svensson, F Renström, L Bluck, L Lissner, PW Franksa and C Larsson 1939

Assessment of dietary fish consumption in pregnancy: comparing one-, four- and thirty-six-item questionnaires
E Oken, LB Guthrie, A Bloomingdale, MW Gillman, SF Olsen, CJ Amarasingwardena, DN Platek, DC Bellinger and RO Wright 1949

Racial/ethnic and sociodemographic factors associated with micronutrient intakes and inadequacies among pregnant women in an urban US population
KJ Brunst, RO Wright, K DiGioia, MB Enlow, H Fernandez, RJ Wright and S Kannan 1960

Status of iodine deficiency among pregnant mothers in Himachal Pradesh, India
U Kapil, S Prakash, N Sareen, AS Bhadoria, P Khenduja, S Nigam and J Vijay 1971

Monitoring and surveillance

Complementary feeding and attained linear growth among 6–23-month-old children
AW Onyango, E Borghi, M de Onis, M del Carmen Casanovas and C Garza 1975

Disadvantaged pre-schoolers attending day care in Salvador, Northeast Brazil have a low prevalence of anaemia and micronutrient deficiencies
RL Lander, KB Bailey, AG Lander, AA Alsaleh, HC Costa-Ribeiro, AP Mattos, DL Barreto, LA Houghton, IM Morison, SM Williams and RS Gibson 1984

Risk factors for childhood overweight: a 30-month longitudinal study of 3- to 6-year-old children
V De Coen, I De Bourdeaudhuij, V Verbeest, L Maes and C Vereecken 1993

Mediterranean diet adherence rates in Sicily, southern Italy
G Grosso, S Marventano, G Giorgianni, T Raciti, F Galvano and A Mistretta 2001

Epidemiology

Mother's education is the most important factor in socio-economic inequality of child stunting in Iran
MH Emamian, M Fateh, N Gorgani and A Fotouhi 2010

Prevalence and public health relevance of micronutrient deficiencies and undernutrition in pre-school children and women of reproductive age in Côte d'Ivoire, West Africa
F Rohner, C Northrop-Clewes, AB Tschannen, PE Bosso, V Kouassi-Gohou, JG Erhardt, M Bui, MB Zimmermann and CGN Mascie-Taylor 2016

Association of eating speed and energy intake of main meals with overweight in Chinese pre-school children
M Lin, L Pan, L Tang, J Jiang, Y Wang and R Jin 2029

Overweight and obesity in young Turkish, Moroccan and Surinamese migrants of the second generation in the Netherlands
H Dijkshoorn, M Nicolaou, JK Ujic-Voortman, GM Schouten, AJ Bouwman-Notenboom, MPH Berns and AP Verhoeff 2037

Physical activity, sedentary behaviours and dietary habits among Kuwaiti adolescents: gender differences
A Allafi, AR Al-Haifi, MA Al-Fayez, BI Al-Athari, FA Al-Ajmi, HM Al-Hazzaa, AO MUSAIGER and F Ahmed 2045

The contribution of mixed dishes to vegetable intake among US children and adolescents
AM Branum and LM Rossen 2053

The influence of gender, age, education and household size on meal preparation and food shopping responsibilities
LA Flagg, B Sen, M Kilgore and JL Locher 2061

Nutrition and health

Prenatal mercury exposure and infant birth weight in the Norwegian Mother and Child Cohort Study
K Vejrup, AL Brantsæter, HK Knutsen, P Magnus, J Alexander, HE Kvale, HM Meltzer and M Haugen 2071

Dietary and supplemental antioxidant and anti-inflammatory nutrient intakes and pulmonary function
TP Ng, M Niti, KB Yap and WC Tan 2081

Oestrogen levels in serum and urine of premenopausal women eating low and high amounts of meat
BE Harmon, Y Morimoto, F Beckford, AA Franke, FZ Stanczyk and G Maskarinec 2087

Marketing and communication

Influence of weaning timing advice and associated weaning behaviours in a survey of black and minority ethnic groups in the UK
AP Moore, K Nanthagopan, G Hammond, P Milligan and LM Goff 2094

Use of food label information by urban consumers in India – a study among supermarket shoppers
SR Vemula, SM Gavaravarapu, V Vardhana Rao Mendu, P Mathur and L Avula 2104

Behavioural effects of directive cues on front-of-package nutrition information: the combination matters!
J Koenigstorfer, G Wasowicz-Kirylo, M Styśko-Kunkowska and A Groeppel-Klein 2115

Special groups

Determinants of child malnutrition in rural and urban Ecuadorian highlands
J Ortiz, J Van Camp, S Wijaya, S Donoso and L Huybregts 2122

Growth faltering and recovery in children aged 1–8 years in four low- and middle-income countries: Young Lives
EA Lundeen, JR Behrman, BT Crookston, KA Dearden, P Engle, A Georgiadis, ME Penny and AD Stein, on behalf of the Young Lives Determinants and Consequences of Child Growth Project Team 2131

Health economy

Cost of childhood diarrhoea in rural South Africa: exploring cost-effectiveness of universal zinc supplementation
MK Chhagan, J Van den Broeck, K-KA Luabeya, N Mponshane and ML Bennish 2138
