Abstract

The Public Health Extreme Events Research (PHEER) Network is a researcher-led network that aims to advance the public health disaster science field by coordinating a community of practice that can rapidly mobilize to conduct time-sensitive research in the aftermath of disasters. This presentation will introduce PHEER to the public health emergency preparedness and response community and allow for input into the evolving public health research framework.

Learning Objectives: Participants will understand the goals and objectives of the PHEER Network.

Participants will learn about how they can be involved in the PHEER Network.
