CONTENTS

NO. PAGE

*1. On the Use of Stress Functions for Solving Problems in Linear Viscoelasticity Theory that Involve Moving Boundaries. By G. A. C. Graham, Department of Mathematics, University of Glasgow. *Communicated by* Professor I. N. Sneddon. Issued September 15, 1965, ... 1

*2. The Effect of Concentration on the Terminal Fall Velocity of Particles in Suspension. By Hugh Rankin Thorpe (formerly Research Student, University of Aberdeen). *Communicated by* Professor Jack Allen. (With Six Text-figures and Two Tables.) Issued September 15, 1965, . . . 9

*3. The Eigenvalue Problem for Boolean Matrices. By D. E. Rutherford. Issued September 15, 1965, ... 25

*4. The Stress in the Vicinity of an Infinite Row of Collinear Cracks in an Elastic Body. By I. N. Sneddon and R. P. Srivastav. (With Six Text-figures.) Issued September 17, 1965, ... 39

*5. Bifurcation of a Parallel-Plate Waveguide by a Unidirectionally Conducting Screen. By R. K. Arora, Department of Electrical Engineering, Queen's College, Dundee. *Communicated by* Professor E. G. Cullwick. (With Two Text-figures.) Issued September 17, 1965, ... 50

6. Neumann-Series Solutions of the Ellipsoidal Wave Equation. By F. M. Arscott. *Communicated by* Professor I. N. Sneddon. Issued September 17, 1965, ... 69

*7. Jacobians of Transformations involving Orthogonal Matrices. By Henry Jack, Queen's College, Dundee. *Communicated by* Professor I. N. Sneddon Issued March 25, 1966, ... 81

*8. An Objective Criterion of the Limit of Useful Sophistication of the Semi-empirical Mass Equation. By N. Feather, Department of Natural Philosophy, University of Edinburgh. (With Two Text-figures and Two Tables). Issued December 16, 1965, ... 104

*9. Orthogonal Boolean Matrices. By D. E. Rutherford. Issued March 25, 1966, ... 126

*10. Nitrogen Dioxide Vapour and the Creation of Condensation Nuclei. By G. R. Evans and A. A. Watson, Department of Natural Philosophy, The University of Edinburgh. Issued March 25, 1966, ... 136

*11. Matrix Analysis of Beam-Columns by the Method of Finite Elements. By R. G. Smith and J. A. Webster, Marischal College, University of Aberdeen. *Communicated by* Professor J. Allen. (With Eleven Text-figures and One Table.) Issued July 7, 1966, ... 156

*12. The Lattice of Congruences on a Bisimple ω-Semigroup. By W. D. Munn, Department of Mathematics, University of Glasgow. Issued December 7, 1966, ... 175

https://doi.org/10.1017/S0080454100008104 Published online by Cambridge University Press

13. The Generating Function of Solid Partitions. By E. M. Wright, University of Aberdeen. Issued December 7, 1966, ... 185

*14. On Eigenvectors of Boolean Matrices. By T. S. Blyth, Department of Mathematics, St Salvator's College, University of St Andrews. *Communicated by* Professor D. E. Rutherford. (With One Text-figure.) Issued December 7, 1966, ... 196

*15. A Matrix Analogue of the Integral $\int_a^b x^a dx$. By Henry Jack. *Communicated by* Professor I. N. Sneddon. Issued January 20, 1967, ... 205

*16. On Certain Numerical Coefficients Associated with Partitions. By D. E. Rutherford. Issued January 20, 1967, ... 215

17. Generalized Hypo-Elasticity. By A. E. Green, University of Newcastle upon Tyne, and B. C. McInnis, Tulane University, New Orleans. *Communicated by* Professor I. N. Sneddon. Issued February 22, 1967, . . 220

18. The Solution of Equations in a Lattice. By R. L. Goodstein, Department of Mathematics, University of Leicester. *Communicated by* Professor I. N. Sneddon. Issued February 24, 1967, ... 231

19. On the Determination of the General Term in Green-type Expansions. By S. Jorna, Institute for Radiation Physics and Aerodynamics, University of California, San Diego, La Jolla, California. *Communicated by* Professor I. N. Sneddon. Issued May 9, 1967, ... 243

*20. Some New Results in Maximum Likelihood Factor Analysis. By D. N. Lawley, Department of Statistics, University of Edinburgh. Issued May 9, 1967, ... 256

21. The Whittaker-Hill Equation and the Wave Equation in Paraboloidal Co-ordinates. By F. M. Arscott, University of Surrey. *Communicated by* Professor I. N. Sneddon. Issued May 17, 1967, ... 265

*22. Tensor Fields and Connections on Cross-Sections in the tangent bundle of a differentiable manifold. By Kentaro Yano, University of Aberdeen. *Communicated by* Professor E. M. Patterson. Issued August 2, 1967, . 277

23. Autocorrelation in Black Body Radiation and in Density Fluctuation Waves in Liquids. By R. Furth (formerly of Birkbeck College, University of London). (With Three Text-figures.) Issued October 25, 1967, . . 289

24. The Spirit of Science. By Sir Lawrence Bragg, C.H., F.R.S., Hon.F.R.S.E. Issued December 1, 1967, ... 303

25. On the Groups of Units of Ternary Quadratic Forms with Rational Coefficients. By J. Mennicke, Mathematisches Institut A, Technische Hochschule, Braunschweig, Germany. *Communicated by* Professor R. A. Rankin. (With Six Text-figures.) Issued March 22, 1968, ... 309

* The thanks of the Society are due to the Carnegie Trust for the Universities of Scotland for grants towards the costs of these papers.

https://doi.org/10.1017/S0080454100008104 Published online by Cambridge University Press

The overall space available for figures and plates is $9\frac{1}{2}'' \times 7\frac{1}{2}''$ in *Transactions* and $7\frac{1}{2}'' \times 4\frac{3}{4}''$ in *Proceedings*.

Photographs should be unmounted glossy black and white prints, marked on the back with the name of the author, number of the figure, and an indication of the top. Prints should not be trimmed or cut out. Authors should suggest the arrangement of the figures on each plate, either by a diagram or a paste-up of rough prints, with indication of any lettering to be inserted.

Lettering must be in black ink in neat and legible style, or lightly written in pencil.

Indicating Lines and Arrows required on wash drawings or photographs should have the point marked by a pin-hole, and must be drawn on the back or on a covering tissue and not on the photograph or drawing. On line drawings such lines should be drawn thin but firmly.

Graphs should be drawn on white Bristol board or on squared paper ruled in faint blue lines: no other colour ruling is suitable. Since blue lines do not appear in reproductions, any cross-lines required must be drawn. If a tracing of a graph constructed on an unsuitable grid is submitted, white tracing paper should be used.

Numerical values. In papers concerned with the biological sciences ALL numerical values must be accompanied by their decimal equivalents.

Tables. Tabular matter must be kept to a minimum. No paper should present both tables and corresponding graphs, except where good reason can be given.

Duplicates. When the author can conveniently do so, it is desirable that duplicates of illustrations should be supplied for the use of the referees.

Proofs of papers will be sent to authors or communicators to the addresses indicated in correspondence or on MSS. The cost of authors' **corrections in excess of 5 per cent.** of the printer's charges for the setting of a particular paper **will be charged to the authors.** Proofs should, if possible, be returned within one week to *The Secretary, Royal Society of Edinburgh, 22 George Street, Edinburgh, 2*, and *not to the printer*. To prevent delay, authors who are abroad should, if possible, appoint someone in this country to correct proofs.

Offprints. As soon as a *Transactions* paper, or the sheet in which the last part of a *Proceedings* paper appears, is ready for press, copies of offprints, in covers bearing the title of the paper and the name of the author, are printed and placed on sale. The date of such separate publication is printed on each paper. Authors of papers will receive twenty-five offprints free, if they so desire. Additional offprints may be obtained at a fixed scale of prices given on a form attached to the first proof. To prevent disappointment, especially if a paper contains plates, authors should, as soon as possible, notify the Secretary of the number of additional copies required.

Indexes. To facilitate the compilation of indexes, and to secure due attention being given to the important points of a paper in Catalogues of Scientific Literature, authors are requested to supply to the Secretary, with the final proofs of papers, a brief index (on the model given below) of the points in a paper which are considered new or important. Indexes will be edited by the Secretary for publication in each volume of the *Transactions* and *Proceedings*.

MODEL INDEX

Houstoun, R. A.—A measurement of the velocity of light. *Proc. Roy. Soc. Edinb.*, A, **63**, 1949–50, 95–104.

Light, A measurement of the velocity of.
R. A. Houstoun. *Proc. Roy. Soc. Edinb.*, A, **63**, 1949–50, 95–104.

Velocity of Light, A measurement of the.
R. A. Houstoun. *Proc. Roy. Soc. Edinb.*, A, **63**, 1949–50, 95–104.

Authors are advised, before submitting papers, to consult *General Notes on the Preparation of Scientific Papers* (2nd Edn., 1965) (Royal Society of London), especially the chapters dealing with symbols, signs, and abbreviations recommended for British Scientific Publications. A copy may be consulted in the Library of the Royal Society of Edinburgh. Personal copies of the *General Notes* may be obtained, price 5s. 6d. per copy, postage included, from the Executive Secretary, Royal Society of London, Burlington House, London, W.1.
