Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 23, 2020 (18 issues):
Internet/print package: £1391/\$2669 Americas only/€2230 EU only
Internet only: £1007/\$1911 Americas only/€1601 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press
1 Liberty Plaza
Floor 20, New York

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

In this Issue

Implications of COVID-19 for nutrition
Allison Hodge 3057

Monitoring and surveillance

The association between nutrition and behavioural health in a US Army population
Kelly L Forsy-Donahue, Raina D Brooks, Matthew R Beymer and Joseph Pecko 3059

Food group intake at self-reported eating occasions across the day: secondary analysis of the Australian National Nutrition Survey 2011–2012
Megan A Rebuli, Gemma Williams, Genevieve James-Martin and Gilly A Hendrie 3067

Assessment and methodology

Developing community-based urine sampling methods to deploy biomarker technology for the assessment of dietary exposure
Amanda J Lloyd, Thomas Wilson, Naomi D Willis, Laura Lyons, Helen Phillips, Hayley G Janssen, Martina Stiegler, Long Xie, Kathleen Taillart, Manfred Beckmann, Leo Stevenson, John C Mathers and John Draper 3081

Validation of a new software eAT24 used to assess dietary intake in the adult Portuguese population
Ana CL Goios, Milton Severo, Amanda J Lloyd, Vânia PL Magalhães, Carla Lopes and Duarte PM Torres 3093

Nutritional status and body composition

Determining a global mid-upper arm circumference cut-off to assess underweight in adults (men and non-pregnant women)
Alice M Tang, Mei Chung, Kimberly R Dong, Paluku Bahwere, Kaushik Bose, Raja Chakraborty, Karen Charlton, Priyanka Das, Mihir Ghosh, Md Iqbal Hossain, Phuong Nguyen, Cecillie B Patsche, Tania Sultana, Megan Deitchler and Zeina Maalouf-Manasseh 3104

Global mid-upper arm circumference cut-offs for adults: a call to action
Zeina Maalouf-Manasseh, Sandra Remancus, Erin Milner, Lindy Fenlason, Timothy Quick, Cecillie B Patsche, Kaushik Bose, Steve Collins, Mija Ververs, Sonia Wallia, Jessica Escobar-Alegria, Mei Chung and Alice M Tang 3114

Nutrition communication

How will the COVID-19 pandemic shape the future of meat consumption?
Sophie Attwood and Cothar Hajat 3116

Behavioural nutrition

Health behaviours during the coronavirus disease 2019 pandemic: implications for obesity
Niyati Parekh and Andrea L Deierlein 3121

Household food insecurity: associations with disordered eating behaviours and overweight in a population-based sample of adolescents
Laura Hooper, Susan Telke, Nicole Larson, Susan M Mason and Dianne Neumark-Sztainer 3126

Relationship between nutrition knowledge, education and other determinants of food intake and lifestyle habits among adolescents from urban and rural secondary schools in Tyrol, Western Austria
Sabrina Egg, Maria Wakolbinger, Anna Reisser, Manuel Schätzer, Birgit Wild and Petra Rust 3136

Nutritional epidemiology

Mediterranean dietary pattern is associated with lower incidence of premenopausal breast cancer in the Seguimiento Universidad de Navarra (SUN) Project
I Gardeazabal, A Romanos-Nanclares, MA Martínez-González, A Castelló, R Sánchez-Bayona, B Pérez-Gómez, C Razquin, JM Aramendia-Beitia, M Pollán and E Toledo 3148

Tree nut snack consumption is associated with better diet quality and CVD risk in the UK adult population: National Diet and Nutrition Survey (NDNS) 2008–2014
Vita Dikariyanto, Sarah E Berry, Gerda K Pot, Lucy Francis, Leanne Smith and Wendy L Hall 3160

The determinants of maternal homocysteine in pregnancy: findings from the Ottawa and Kingston Birth Cohort
Shazia H Chaudhry, Monica Taljaard, Amanda J MacFarlane, Laura M Gaudet, Graeme N Smith, Marc Rodger, Ruth Rennicks White, Mark C Walker and Shi Wu Wen 3170

Prevalence and predictors of hypocalcaemia in severe acute malnutrition
Chabungbam Smilie, Dheeraj Shah, Prerna Batra, Rafat S Ahmed and Piyush Gupta 3181

Severe acute malnutrition, calcium and vitamin D: important interactions
Micaela A Witte and Philip R Fischer 3187

Economics and environment

Healthy and unhealthy food environments are linked with neighbourhood socio-economic disadvantage: an innovative geospatial approach to understanding food access inequities
Shirelle H Hallum, S Morgan Hughey, Marilyn E Wende, Ellen W Stowe and Andrew T Kaczynski 3190

Associations of the consumer food environment with eating behaviours and BMI
Anne W Zhao, Cyanna C McGowan, Shannon N Zenk and Kiarrri N Kershaw 3197

Community nutrition

Household food insufficiency, health status and emergency healthcare utilisation among children with and without special healthcare needs
Rajan A Sonik, Alisha Coleman-Jensen and Susan L Parish 3204

Brazilian immigrant fathers' perspectives on child's eating and feeding practices: a qualitative study conducted in the United States
Ana Cristina Lindsay, Gabriela Vasconcellos de Barros Vianna, Carlos André Moura Aruda, Amanda De Sá Melo Alves, Maria Helena Hasselmann, Márcia MT Machado and Mary L Greaney 3211

Interventions

Effectiveness of mobile produce markets in increasing access and affordability of fruits and vegetables among low-income seniors
Reece Lyerly, Pasquale Rummo, Sarah Amin, Whitney Evans, Eliza Dexter Cohen, Eliza Lawson, Eliza Hallett, Sophia De-Oliveira, Jennifer Rose, Cassandra Suttan Coats and Amy Nunn 3226

Public policies

Poverty and food insecurity may increase as the threat of COVID-19 spreads
Marcos Pereira and Ana Marlucia Oliveira 3236

An exploration of the portrayal of the UK soft drinks industry levy in UK national newspapers
Gemma Bridge, Stuart W Flint and Ralph Tench 3241

Sustainability

Animal-based food systems are unsafe: severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) fosters the debate on meat consumption
Michelle Cristine Medeiros Jacob, Ivanilda Soares Feitosa and Ulysses Paulino Albuquerque 3250
