Keywords: party identification; transmission; perception; parent–child; political socialization; corrigendum

During the transfer from an accepted manuscript to the final printed copy, as part of the preparation for the publisher, the tables were reformatted from .png files to Word files. During this process, the authors regret that Table 5 was inadvertently duplicated to both Table 4 and Table 5 and the final and correct Table 4 was overwritten and never made it the printed version. The reviewers and editors always saw the correct tables however, and the error was a typo of sorts, that only occurred after acceptance and in the post-production process. The data, analyses and findings remain unchanged.

The following Table is the original and correct Table 4 that the authors refer to in the published version of the manuscript.

Table 4: Examining the Factors that Moderate Perception of Parental PID

	YPSS Parents	HLS Mothers	HLS Fathers	NLSY Mothers
Party Identification				
Parent/Mother PID	0.394* (.195)	1.605* (.429)	0.807* (.071)	−0.669 (.630)
Spouse/Father PID	0.258* (.061)	0.669* (.071)	1.479* (.421)	
Moderators				
Parent-Child Closeness	−0.570 (.377)	0.105 (.066)	0.075 (.067)	
Parent Value Strength	0.276 (.238)	−0.035 (.036)	−0.014 (.037)	
Child Education	−0.358 (.326)	−0.303 (.202)	−0.229 (.207)	−0.400* (.088)
Household Politicization	−1.406* (.625)			−0.591* (.247)
Interactions				
Parent PID X Closeness	0.110 (.081)	−0.027 (.020)	−0.017 (.019)	
Parent PID X Value Strength	−0.044 (.061)	0.003 (.011)	−0.018 (.011)	
Parent PID X Child Education	0.063 (.079)	0.050 (.060)	0.052 (.059)	0.176* (.048)
Parent PID X Politicization	0.390* (.147)			0.372* (.135)

* $p < .05$, † $p < .10$

Note: Data come from the Youth-Parent Socialization Study (YPSS), the Health & Lifestyles Study (HLS), and the National Longitudinal Study of Youth (NLSY). The dependent variable is the child's perception of the parent's party identification. Models are ordered logistic regression, cell entries are estimated coefficients, and standard errors are listed in parentheses. A table of results that include controls for the child's sex, race, age, education and the parent's sex and education are reported in the SI.

The authors would like to thank Linet Durmuşođlu for bringing the table mismatch to their attention, which led this correction.

The authors and publisher apologise for any inconvenience caused.
