RADIO-AID

NOTED FOR
SERVICE
AND
SATISFACTION

THE "CRYSTAL" RADIO-AID

The Radio-Aid may be used with an accumulator or standard dry battery to supply the low tension current. This is made possible by the Adaptor illustrated on the left of the instrument, and is a patented and exclusive feature of the Radio-Aid.

The Radio-Aid has an appearance of dignity and charm, but being of robust construction will stand up to many years of hard wear, and commends itself to the discerning patient. Its brilliant performance converts even the most hardened sceptic.

SPECIAL TERMS TO HOSPITALS AND CLINICS IN ACCORDANCE WITH THE HEARING AID MANUFACTURERS' ASSOCIATION AGREEMENT

AN AMPLIVOX

YOUR PATIENTS CAN WEAR

- CRYSTAL MICROPHONE
- STANDARD BATTERIES
- WEIGHT ONLY 1½ LBS.
- AVAILABLE IN THREE DIFFERENT TONES

The Model W Amplivox solves the problem of providing a high quality hearing aid with low upkeep costs offering extreme simplicity and reliability to those who want the smallest possible instrument. It will go into a gentleman's hip pocket or lady's hand-bag with ease. It can readily be adapted to the Amplivox inductor system for telephone or theatre listening and so provides the most complete hearing aid ever made. I shall be glad to send you descriptive literature if this is not already in your possession.

A Edwin Stevens

IN 1939
THESE TWO REMARKABLE
INSTRUMENTS ARE THE
MEASURE OF HEARING AID PROGRESS

They are the
SONOTONE AUDICLE 451

and the
SONOTONE PERCEPTON

AND HERE ARE 5 OUTSTANDING FEATURES OF EACH

THE "451"

Has a far greater frequency range than other carbon microphone hearing aids—namely from 300-4,000 cycles.

"Booster" Chambers inserted into the amplifier, and oscillators and ear-piece of varying pitch, provide highly accurate selective amplification.

The actual fitting is carried out by means of the patented SONOTONE Audioscope which provides for over 500 possible combinations of volume, amplification and pitch.

The non-directional transmitter picks up sound with equal facility irrespective of the listener's position relative to the source of sound.

The transmitter is the only one in existence which will function when tilted backwards.

THE "PERCEPTON"

Has a frequency range from 200 to well over 7,000 cycles, making it invaluable for hearing music and long-distance speech.

Can be adapted for use with either bone or air-conduction receiver.

Has a rating in articulation of over 95 per cent.—equal to the average articulation of the normal ear—20 per cent. higher than a good telephone.

The sensitive crystal microphone, crystal ear-piece—or oscillator, and vacuum tube amplifier, provide increased power and intelligibility.

An accurate volume control enables the user to adjust the PERCEPTON to varying hearing conditions, and selective amplification is provided.

The Hospital has **100** beds for In-patients and an annual Out-patient attendance of over **50,000**.

CLINICAL INSTRUCTION

Clinical instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is given in the Out-patient Department from 2 to 5 p.m. daily, and on Tuesdays and Thursdays from 6 to 9 p.m. also. Major operations are performed every morning and afternoon, except Saturdays, in the In-patient Operating Theatres. Minor Operations are performed in the Out-patient Operating Theatre on three mornings a week. Practitioners and Medical Students are admitted to the practice of the Hospital as Post-Graduates. Clinical Assistants, whose duty it is to assist the staff, are appointed as vacancies occur.

For further information apply to the Dean: GILBERT H. HOWELLS.

In addition to the General Wards, there are Semi-private Wards and 11 Private Rooms. The charge for a Private Room is 7 guineas a week, plus a fee for the surgeon.

Further particulars may be obtained from F. P. CARROLL, *Secretary-Superintendent*.

PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

**DeVilbiss
ATOMIZERS**

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

BINDING

Journal of Laryngology & Otology

Subscribers wishing to have their Journals bound can do so by sending them to the Publishers.

Volumes are strongly bound in whole dark blue buckram cases, with gold tops and gold lettering on spine. The cost of binding is 10s. per volume, including postage.

Missing parts can be supplied at 4s. each, or the whole volume, complete in the above binding, for 48s.

Publishers' cases can be supplied for 3s. 6d.

HEADLEY BROTHERS, 109 KINGSWAY, LONDON, W.C.2

BACK NUMBERS OF THE

Journal of Laryngology & Otology

Back numbers of most issues of this Journal can be obtained from the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2. The following, however, are out of print, and no stock is at present available :

1887	January, April-June and August-December.	1896	February and March.
1888	January-March and August.	1897	January, August-October.
1889	November.	1902	February.
1891	January, August and September.	1914	August.
1893	January.	1916	April.
1895	January, February and August.	1920	January and August.
		1921	January, October-December.
		1933	September.

If any subscribers have any of these copies which they do not need, it would be greatly appreciated if they would return them to the Publishers who will refund the full published price.

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.

4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.

8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.

9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.
