This journal is part of the **Cambridge Journals Online** service. Access to online tables of contents and article abstracts is available to all researchers at no cost. Access to full-text articles online is provided to those with online subscription. Online subscriptions must be activated. Once your subscription is activated, free access to past, present, and forthcoming articles is available at:

**Microscopy and Microanalysis website: [journals.cambridge.org/MAM](http://journals.cambridge.org/MAM).**

Instructions for authors submitting manuscripts may be found at [journals.cambridge.org/MAM](http://journals.cambridge.org/MAM). Select "Further Information" then select "Instructions for Contributors." An abbreviated version of these instructions will be published in the first issue (February) of each volume.

High Definition Digital

- TEM Integration
- Extensive Support

*Microscopy and Microanalysis* publishes original research papers dealing with a broad range of topics in microscopy and microanalysis. These include articles describing new techniques or instrumentation and their applications, as well as papers in which established methods of microscopy or microanalysis are applied to important problems in the fields of biology or materials science. Microscopy and microanalysis are defined here in a broad sense, and include all current and developing approaches to the imaging and analysis of microstructure. The criteria for acceptance of manuscripts are the originality and significance of the research, the quality of the microscopy or microanalysis involved, and the interest for our readership.

Four types of communications are published in the Journal. **Regular Articles** are of substantial length and describe the findings of an original research project that satisfies the aims and scope of the Journal, described above. **Review Articles** summarize the current status of an important area within the aims and scope of the Journal. **Letters to the Editor** usually contain comments on recent articles that have appeared in the Journal. **Book Reviews** are also published, but these are solicited only through the Book Review Editor.

### Instructions for Contributors

Instructions for authors contributing manuscripts may be found at <http://mc.manuscriptcentral.com/mam> under "Resources: Instructions and Forms." Authors may also visit [http://www.journals.cambridge.org/jid\\_MAM](http://www.journals.cambridge.org/jid_MAM), select "Further Information," and then select "Instructions for Contributors." An abbreviated version of these instructions will be published in the first issue (February) of each volume.

### Copyright Information

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the Microscopy Society of America; that the manuscript will not be published elsewhere in any language without the consent of the copyright holders; and that written permission of the copyright holder is obtained by the authors for material used from other copyrighted sources.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names lack protection by the relevant laws and regulation.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Cambridge University Press, provided that the appropriate fee is paid directly to Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA (Tel: (508) 750-8400), stating the ISSN (1431-9276), the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

### Disclaimer

The Microscopy Society of America, the other societies stated, and Cambridge University Press cannot be held responsible for errors or for any consequences arising from the use of the information contained in this journal. The appearance of scientific reports and/or workshops, or any other material in *Microscopy and Microanalysis* does not constitute an endorsement or approval by The Microscopy Society of America of the findings, data, conclusions, recommendations, procedures, results, or any other aspect of the content of such articles. The appearance of advertising in *Microscopy and Microanalysis* does not

constitute an endorsement or approval by The Microscopy Society of America of the quality or value of the products advertised or any of the claims, data, conclusions, recommendations, procedures, results, or any other information included in the advertisements.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made.

### Subscription Information

*Microscopy and Microanalysis* is published bimonthly in February, April, June, August, October, and December by Cambridge University Press. Three supplements (*Meeting Guide*, *Program Guide*, and *Proceedings*) are published in June and August.

**Society Rates:** Members of the Microscopy Society of America should contact the MSA Business Office for all subscription inquiries: Microscopy Society of America, Hachero Hill, Inc., 11260 Roger Bacon Drive, Suite 402, Reston, VA 20190, Tel.: (703) 964-1240, Ext. 14, E-mail: [nicoleguy@mindspring.com](mailto:nicoleguy@mindspring.com), URL: [www.msa.microscopy.org](http://www.msa.microscopy.org). Members of other affiliated societies should contact their respective society business offices for all subscription inquiries.

**Subscription Rates:** Institutions print and electronic: US \$1522.00 in the USA, Canada, and Mexico; UK £916.00 + VAT elsewhere. Institutions online only: US \$1128.00 in the USA, Canada, and Mexico; UK £683.00 + VAT elsewhere. Individuals print plus online: US \$466.00 in the USA, Canada, and Mexico; UK £283.00 + VAT elsewhere. Prices include postage and insurance.

**USA, Canada, and Mexico:** Subscribers in the USA, Canada, and Mexico should send their orders, with payment in US dollars or the equivalent value in Canadian dollars, to: Cambridge University Press, Customer Services Department (Journals), 100 Brook Hill Drive, West Nyack, NY 10994-2133, USA. Tel: (845) 353-7500. Fax: (845) 353-4141. Orders may be phoned direct (toll free): (800) 872-7423. E-mail: [journals\\_subscriptions@cup.org](mailto:journals_subscriptions@cup.org).

**Outside North America:** Subscribers elsewhere should send their orders, with payment in sterling, to: Customer Services Department (Journals), Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, UK. Tel: +44 (0)1223 326070. Fax: +44 (0)1223 325150. E-mail: [journals@cambridge.org](mailto:journals@cambridge.org)

**Change of address:** Allow six weeks for all changes to become effective. All communications should include both old and new addresses (with postal codes) and should be accompanied by a mailing label from a recent issue. Society members should contact their respective society business offices to inform them of address changes.

## SKYSCAN 1272

World's first fully automated micro-CT

free QR-reader app  
is available on the AppStore

- The 16-position automatic sample changer can be populated by samples with different sizes and shapes.
- Scanned samples can be replaced at any time without interrupting the scanning process.
- X-ray energy and filtering can be automatically adjusted for a sample according to x-ray opacity.
- The control software measures sample size / position and can adjust optimal magnification.
- For every object a colour optical image is taken, which is shown on screen during scanning.
- After completing a scan or scans, the system can send you an e-mail with a direct link to the scan images.
- All automatic adjustment steps are optional, and can alternatively be set manually by the operator.
- The scanner and sample changer can run 24 / 7 continuous scanning.

ELYRA P.1 by ZEISS takes three-dimensional, superresolution light microscopy to the limit. Using PALM or dSTORM techniques, you can localize fluorescently-labeled small structures and even single molecules with achievable resolutions of down to 20 nm laterally and 50 nm axially. Correlate your superresolution data with electron microscopy images for in-depth analyses.

<https://doi.org/10.1017/S1431927614000269> Published online by Cambridge University Press

We make it visible.

*Microscopy and Microanalysis* is published bimonthly and contains papers that report original research from the entire interdisciplinary range of microscopy and microanalysis: new microscopy methods and instrumentation and their applications to biological or materials microstructures for determination of structure or chemistry. Four categories of communications are published in the Journal.

**Regular articles** contain reports of new instrumentation and new methods and their applications to microstructural analysis in biology and materials science. **Reviews** have broader technical content than regular articles. Authors contemplating review articles are encouraged to discuss their plans with the appropriate editor. Articles are accepted for publication with the understanding that they, or their substantive contents, have not been and will not be submitted to any other publication.

Readers may send **Letters to the Editor** for publication in the Journal. These must address a specific technical point or points in a published article and must be clearly written and concise. The corresponding author of the paper commented upon will be invited to reply. The author of the Letter to the Editor will not be sent the reply prior to publication. Both the Letter to the Editor and the Reply will be published together. No subsequent letters or replies by the same persons concerning that particular paper will be considered for publication. The Editor-in-Chief will make any necessary decisions concerning suitability for publication of particular Letters to the Editor or Replies. **Book Reviews** are also published, but these are solicited only through the Book Review Editor.

### Manuscript Submission and Review

All manuscript submissions to *Microscopy and Microanalysis* must be made electronically via Manuscript Central, at the following website address:

<http://mc.manuscriptcentral.com/mam>

Complete instructions are provided on this website. Please follow the instructions on the website to avoid delays. The instructions will prompt the author to provide all necessary information, including the corresponding author's contact information, which includes complete mailing address, phone and fax numbers, and an e-mail address. The website also requests preferred reviewers. Please provide the names and email addresses of at least two preferred reviewers. List names of individuals you do not wish to review your manuscript in the Cover Letter.

The website will automatically acknowledge receipt of the manuscript and provide a manuscript reference number. The Editor-in-Chief will assign the manuscript to an Editor who will choose at least two other reviewers. Every effort will be made to provide the author with a rapid review. If the Editor requests that revisions be made to the manuscript before publication, a maximum of 3 months will be allowed for preparation of the revision.

### Manuscript Preparation

**General information.** Manuscripts **must** be formatted in Word or LaTeX. **Do not** submit manuscripts as a PDF. Manuscripts **must** be submitted in English. Authors should follow generally accepted rules of grammar and punctuation. Because articles on microscopy attract broad ranges of readers with diverse backgrounds, jargon should not be used; acronyms and abbreviations **must** be clearly defined the first time they are used and then used consistently thereafter throughout the manuscript.

**Format.** All manuscripts **must** be typed double-spaced, including title page, abstract, text, references, tables, and figure legends, in 12 point type. Pages should have margins of about 1 inch (about 2.5 cm). Pages should be numbered at the bottom center.

All manuscript title pages **must** contain:

- A complete title.
- A brief title to be used as a running head.
- Authors' names listed by full given and last names.

- Primary institutions where the research was performed.
- Other institutions involved for each author.
- Permanent or new addresses of all authors. Note: Institutional addresses **must** include the full institutional and department/center name, city, state, postal code, and country.
- A complete corresponding (mailing) address for the author to whom all correspondence should be sent.
- Corresponding author's telephone number, fax number, and e-mail address.

All manuscripts **must** include:

- An abstract not to exceed 200 words and 6 to 10 keywords for indexing.
- The following sections: Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, References, tables, figure legends, figures. Sections may be subdivided to increase clarity.

**Chemical names and mathematical expressions.** Chemical names and methods should be spelled out the first time they are used, followed by the abbreviation in parentheses. After first mention the abbreviation may be used alone. SI units should be used. Mathematical expressions need to be carefully presented, with all symbols defined. Use a type font that clearly differentiates between zero and capital letter O. Equations containing algebraic fractions should use numerator over denominator, separated by a horizontal line, and not typed on a single line separated by a slash. Indicate vector symbols; they will be printed in **bold**.

**References.** References **must** be inserted in the text at the place they are used, by the author's surname and year of publication. All references included in the reference list **must** be cited in the text. References to personal communications, unpublished data, and manuscripts either in preparation or submitted for publication are unacceptable. If essential, such material may be incorporated in the appropriate place in the text. For citations with more than two authors use the first author's surname followed by "et al." and if there is more than one reference in the same year by a single author(s), use *a*, *b*. **For example:** (Roberts, 1981); (Roberts & Johnson, 1983); (Jones et al., 1986); (Johnson, 1998*a*, 1998*b*).

All authors **must** be included in the reference list; "et al." is unacceptable here. The alphabetical list of references begins a new page and must be typed double-spaced. List works by different authors who are cited within the same parentheses in chronological order, beginning with the earlier work according to the *CBE Manual for Authors, Editors, and Publishers*. Abbreviate journal names according to the Chemical Abstracts Service Source Index (CASSI). Only published articles and articles in press should appear in this list. Responsibility for the accuracy of references cited lies with the authors. Brief examples:

#### Journal Articles

HOGAN, J. & PATTON, C. (1976). Variation in intramembrane components of *Trypanosoma brucei* from intact and X-radiated rats: A freeze-cleave study. *J Protozool* **23**, 205–215.

#### Entire Book

RAPPAPORT, R. (1996). *Cytokinesis in Animal Cells*. Cambridge, UK: Cambridge University Press.

#### Chapter in an Edited Book

GARDNER, R.L. & PAPAIOANNOU, V.E. (1975). Differentiation in trophoderm and inner cell mass. In *The Early Development of Mammals*, Balls, M. & Wild, A.E. (Eds.), pp. 107–132. Cambridge, UK: Cambridge University Press.

#### Proceedings Paper

WOOD, J.E., WILLIAMS, D.B. & GOLDSTEIN, J.I. (1981). Quantitative X-ray microanalysis in the analytical electron microscope. In *Quantitative Microanalysis with High Spatial Resolution*, Jacobs, M.H., Lorimer, G.W. & Doig, P. (Eds.), pp. 24–33. London: The Metals Society.

**References to material published online:** These should follow the journal's style, with the URL included at the end of the reference. Authors are requested to print out and keep a copy of any online-only information, in case the URL changes or is no longer maintained, in which case the date accessed should be entered. Examples follow:

WORLD HEALTH ORGANIZATION (2011). WHO Fact Sheet No. 317—Cardiovascular diseases (CVDs). Available at [www.who.int/mediacentre/factsheets/fs317/en/24-05-11](http://www.who.int/mediacentre/factsheets/fs317/en/24-05-11).

FIORI, C.E. & SWYT-THOMAS, C.R. (1991). U.S. Patent number 5,299,138, accepted 1994. Desk top spectrum analyzer. Free version available at <http://www.cstl.nist.gov/div837/Division/outputs/software.htm>.

CHANTLER, C.T., OLSEN, K., DRAGOSET, R.A., CHANG, J., KISHORE, A.R., KOTOCHIGOVA, S.A. & ZUCKER, D.S. (2005). X-ray form factor, attenuation and scattering tables (version 2.1). Gaithersburg, MD: National Institute of Standards and Technology. Available at <http://physics.nist.gov/ffast>.

**Tables.** Tables **must** be uploaded individually at the website. Number tables consecutively using Arabic numbers and include concise titles and column headings. Type footnotes under the tables. All tables **must** be cited consecutively in the text.

### Guidelines for Figure Preparation

Figures **must** be uploaded individually at the website. Figures should be professionally drawn and prepared according to the guidelines below. Symbols, letters, numbers, and scale bars should be of sufficient size to be clearly recognizable when the figure is reduced to publication size, usually one column width (84 mm). Figure captions **must** be double-spaced and appear on a separate page in the text document. All figures **must** be cited in the text. Photographs in which human subjects are identifiable must be accompanied by written permission for publication.

Note the following specifications:

- **Black and white figures:** Raster (scanned) images should be submitted in grayscale mode for continuous-tone images and as bitmaps for line art.
- **Color figures:** Color images should be submitted in CMYK color mode. Do not submit files in RGB color. Files should be free of color functions, including PostScript color management, transfer curves, halftone screen assignments, and black generation functions.

- **Digital resolution:** Raster (scanned) image files should be:
  - at least 300 dpi for continuous tone images (grayscale or color);
  - at least 900 dpi for monochrome (1-bit) line art.
- **Image size/crop:** Digital art files should be cropped to remove nonprinting borders. Lettering and axis labels for graphs should remain legible when reduced to an image width of 84 mm. Letters within a word should not touch at this reduction. The submitted image orientation should be the same as intended for print.
- **Lines:** Lines or rules should not be defined as hairline width. The recommended minimum line width is 1/4 point when the file is supplied at the same size as the final print; thicker lines must be used if the figure is to be reduced.
- **File format:** Do not submit figures as JPG or PDF files or embedded in a Powerpoint or Word document. Rastered image files (continuous tone or line art) should be submitted only in ".tif", ".eps", or ".psd" format. For vector ".eps" or ".ai" files, fonts should be embedded or converted to outlines. Images should be flattened prior to submission; this means that files should not contain layers and/or transparent objects.
- **Submission:** Each figure must be uploaded separately from the text document of the manuscript.

### Supplementary File Submission Requirements

#### Audio Files

- Preferred formats: mp3 or mp4
- Accepted formats: AAC, AIFF, or WAV
- Maximum file size 15Mb

#### Video Files

Video files should be submitted according to the following specifications.

- Preferred formats: mpg/mpeg, mp4, or mov
- Acceptable formats: .mov or .avi
- Maximum file size: 15Mb
- Minimum dimensions: 320 pixels wide by 240 pixels deep
- Verify that the videos are viewable in QuickTime or Windows Media Player

For each video, provide a citation in the appropriate place in the manuscript text and include a title and pertinent copy, preferably limited to 20 words.

**Permissions.** All previously published material included in your manuscript **must** be accompanied by permission forms or letters documenting that permission has been obtained to reprint the material in your article in this journal.

Submitting a manuscript to this journal is easy. Just go to the following website:

<http://mc.manuscriptcentral.com/mam>

Once at the login page, you will be asked to register with a User ID and password. Your manuscript can be submitted by following seven simple steps displayed at the site. A help menu in orange (upper right) provides several ways to get support if you have difficulty.

# THE NEW DESK V THE GOLD STANDARD IN SAMPLE PREPARATION

Now upgraded with storage for up to ten recipes and a color touch screen display, the Desk V HP delivers breakthrough electron microscopy sample preparation.
