

of hepatitis vaccine as a case example with Kirsten Johanssen of Denmark as the reactor. Frank DeCharro of the Netherlands presented the assessment of dialysis in end-stage renal disease as a case example with Paul Gross of Australia, Kjeld Pedersen of Denmark, and Stanley Reiser of the U.S. as reactors.

At the business meeting of the new Society, Seymour Perry, U.S. was elected as President; Barbara Stocking, U.K., as Vice President; Johannes Vang, Denmark, as Secretary; and Bruno Horisberger, Switzerland as Treasurer. A Board of Directors of nine individuals was also selected including: Per Buch Andreasen, Denmark; David Banta, the Netherlands; Luigi Donato, Italy; Francis Fagnani, France; Harry Frey, Finland; Paul F. Gross, Australia; José Laguna Garcia, Mexico; Danica Doknic Stefanovic, Yugoslavia; and Judy Wagner, U.S.

It was agreed that the next meeting of the Society would be held in about one year, preferably in the eastern U.S. or Canada. Membership dues combined with a subscription to the new *International Journal of Technology Assessment in Health Care* will be \$45.00. Those interested in joining the Society may request information by writing to Dr. Perry at:

Seymour Perry, M.D.  
Deputy Director  
Institute for Health Policy Analysis  
Georgetown University Medical Center  
Washington, DC 20007  
United States

## ERRATA

The following are corrections to the table in Note 4 (page 50) of the article End-Stage Renal Failure and the Aged in the United Kingdom by Thomas Halper, which appeared in Volume 1, Number 1, of the Journal:

1. In 3rd column ("Subsequent Years"), for £31,650 *substitute* £13,650.
2. "Failed transplant"—the range of costs reflects different graft life as well as different dialysis costs: the parentheses should also contain "or 196 days of working graft followed by 169 days of home dialysis."
3. "Source"—this *should* read ". . . is based upon a sample of 24 patients from each of three renal centers. . . ." (*NB* the "each," *viz.* 72 patients in all).
