NEW

LASER AND PARTICLE BEAMS

Physics of High Energy Densities
Editor in Chief
Heinrich Hora, *Department of Theoretical Physics, University of New South Wales*

Laser and Particle Beams is a new international journal which covers the generation of high intensity laser and particle beams, their interaction with materials and the physics of systems of very high densities. The fields covered have applications to nuclear fusion and to material treatment, laboratory astrophysics, plasmas and spectroscopy at extreme conditions. As well as publishing original articles the journal also publishes occasional review articles and surveys of research at particular laboratories.

Volume 1 Number 1 includes the following articles

D. D. RYUTOV and G. V. STUPAKOV Generation of High Power Ion Beams by the Oscillating Electrons

K. I. GOLDEN Strong Ion Coupling Effects at High Density of Inertial Confinement Fusion Plasmas

S. NAKAI, K. IMASAKI, S. MIYAMOTO, S. HIGAKI, T. OZAKI, A. YOSHINOUCHI, H. FUJITA, K. MIMA, K. NISHIHARI, I. YABE, S. IDO, Y. OHGAKI and C. YAMANAKA Inertial Confinement Fusion Research by Particle Beams

P. LÄDRACH A Model for Heating and Expansion of Picosecond Laser-Plasma Including Ponderomotive Force Effects

B. I. HENRY Spectral Line Limiting and Polarization Shift in Plasmas of High Particle and Energy Density

Book Reviews

Volume 1: February, May, August and November 1983
£50.00 per volume Single parts: £15.00
Airmail £15.00 extra

JOURNAL OF PLASMA PHYSICS

Volume 30 Part 2 October 1983

CONTENTS

Linear conversion in a magnetized plasma with density gradient parallel to the magnetic field
E. MJØLHUS *page* 179

Nonlinear Rayleigh–Taylor instability in hydromagnetics
B. B. CHAKRABORTY, A. R. NAYAK AND H. K. S. IYENGAR 193

Effect of finite spectral width on the modulational instability of Langmuir waves
J. C. BHAKTA AND D. MAJUMDER 203

Nonlinear variations of the reflexion coefficient for lower-hybrid heating
V. A. PETRŽÍLKA, R. KLÍMA AND P. PAVLO 211

A retarded time superposition principle and the relativistic collision operator
K. HIZANIDIS, K. MOLVIG AND K. SWARTZ 223

On the negative resistance of double layers
M. A. RAADU AND M. B. SILEVITCH 249

On the existence of a free boundary solution of the Grad–Shafranov equation
NOBUO FUJII AND MASAHIDE HIRAI 255

Guided modes between upper-hybrid and plasma resonance
G. J. MORALES AND J. E. MAGGS 267

Large-amplitude disturbances caused by ion-rich sheath motion
A. J. COATES, P. D. EDGLEY AND J. E. ALLEN 275

The effect of thermal anisotropy on the propagation of whistler waves in mixed hot–cold electron plasmas
HIROMITSU HAMABATA 291

Asymptotic solution for field-line reconnexion. Compressible case of Petschek's model
V. S. SEMENOV, I. V. KUBYSHKIN AND M. F. HEYN 303

Field-line reconnexion in the two-dimensional asymmetric case
V. S. SEMENOV, I. V. KUBYSHKIN, M. F. HEYN AND H. K. BIERNAT 321
