

PEACE OF MIND

induced by
'PULVULES'*
'DEXYTAL'

'Sodium Amytal,' 1 grain two or three times daily, has an accepted place in the treatment of the depressive and anxiety neurotic. The patient who needs in addition the elevation of mood which can be obtained from dexamphetamine will often benefit greatly from the combined treatment now available in 'DEXYTAL.'

One capsule of 'DEXYTAL' taken two or three times daily will often prevent the periodic breakdown of the chronic depressive patient. 'DEXYTAL' is of especial value where the underlying cause cannot be removed—enabling such patients to face their difficulties with greater insight and cheerfulness.

* TRADE MARK
