

GENERAL NOTES

ROYAL SOCIETY OF MEDICINE.

1 *Wimpole Street, London, W. 1.*

Section of Laryngology.—The next Meeting of the Section will be held on Friday, 5th February, at 5 P.M. There will be a discussion on "The Common Cold," and papers will be read by Sir Thomas Horder, Sir St Clair Thomson and Dr. Freeman.

President, Mr. Walter Howarth, 21 Devonshire Place, London, W. 1.
Hon. Secretaries, Mr. A. Lowndes Yates, 33 Weymouth Street, London, W. 1,
and Mr. F. J. Cleminson, 32 Harley Street, London, W. 1.

Section of Otology.—The next Meeting of the Section will be held on Friday, 5th February, at 9.30 A.M. There will be a discussion on Deaf-Mutism. Papers will be read by Dr. J. S. Fraser and Dr. Kerr Love. Papers on the Physics of Tuning Forks will be read by Members of the Hearing Tests Committee.

President, Mr. Norman Patterson, 82 Portland Place, London, W. 1.
Hon. Secretaries, Dr. T. B. Jobson, Netherwood, Epsom Road, Guildford,
and Mr. C. Gill-Carey, 106 Harley Street, W. 1.

* * *

The 2nd International Congress of Otology, Rhinology and Laryngology will be held in Madrid from 27th to 30th September 1932, under the presidency of Professor Tapia. The main subjects for discussion are Otosclerosis, Ozæna, and Scleroma, while subsidiary discussions on bronchoscopic and œsophagoscopic subjects and the treatment of malignant disease by penetrating radiations will take place.

To facilitate the preparation of the rapport on otosclerosis, the clinical aspect of which will be dealt with by Dr. Fraser of Edinburgh, a Committee of British otologists has drawn up a questionnaire, and it is hoped that all those to whom it has been sent will do their best to co-operate in filling in the desired particulars and returning the document as soon as possible.

* * *

At the request of many subscribers, a complete Index for the years 1921 to 1930, inclusive, has been prepared. This has been a very considerable undertaking, but it is thought that it should be most valuable for purposes of reference, and it is hoped that all subscribers will order a copy as a great deal of money has been expended on its production. The price of the Index is 10s., which is considerably below the cost of production. It will be ready early in the New Year.

It would be a convenience if subscribers would order their copies as soon as possible.

INDEX

Peroral Endoscopy Table

Designed and built at Chiron Works for King's College Hospital

This table is arranged for nasal and aural operations as well as for endoscopic work.

The back rest is adjustable from the dependant position shown in the illustration to one nearly at right angles to the top of the table for nasal operations, in which case a suitable head rest is attached.

The table is adjustable in height and can be tilted in either direction and is absolutely rigid in any position. Further particulars furnished on request.
