

CONTENTS

Breeding and genetics

- Gill, J. L., Matika, O., Williams, J. L., Worton, H., Wiener, P. and Bishop, S. C.*
Consistency statistics and genetic parameters for taste panel assessed meat quality traits and their relationship with carcass quality traits in a commercial population of Angus-sired beef cattle 1

- Mulder, H. A., Meuwissen, T. H. E., Calus, M. P. L. and Veerkamp, R. F.*
The effect of missing marker genotypes on the accuracy of gene-assisted breeding value estimation: a comparison of methods 9

Nutrition

- Pei, C.-X., Mao, S.-Y., Cheng, Y.-F. and Zhu, W.-Y.*
Diversity, abundance and novel 16S rRNA gene sequences of methanogens in rumen liquid, solid and epithelium fractions of Jinnan cattle 20

- Boguhn, J., Kluth, H., Bulang, M., Engelhard, T. and Rodehutschord, M.*
Effects of pressed beet pulp silage inclusion in maize-based rations on performance of high-yielding dairy cows and parameters of rumen fermentation 30

- Bruininx, E. M. A. M., Koninx, J. F. J. G., Binnendijk, G. P., Zandstra, T., Heetkamp, M. J. W., van der Peet-Schwering, C. M. C. and Gerrits, W. J. J.*
Effects of prefermented cereals or the end products of fermentation on growth and metabolism of enterocyte-like Caco-2 cells and on intestinal health of restrictedly fed weanling pigs 40

- Nielsen, N. I., Hameleers, A., Young, F. J., Larsen, T. and Friggens, N. C.*
Energy intake in late gestation affects blood metabolites in early lactation independently of milk production in dairy cows 52

- Shoveller, A. K., Moehn, S., Rademacher, M., Htoo, J. K. and Ball, R. O.*
Methionine-hydroxy analogue was found to be significantly less bioavailable compared to DL-methionine for protein deposition in growing pigs 61

- Rustas, B.-O., Nørgaard, P., Jalali, A. R. and Nadeau, E.*
Effects of physical form and stage of maturity at harvest of whole-crop barley silage on intake, chewing activity, diet selection and faecal particle size of dairy steers 67

- Dewhurst, R. J., Davies, D. W. R. and Fisher, W. J.*
Effects of forage NDF content and body condition score on forage intake by Holstein-Friesian dairy cows in the dry period 76

Physiology and functional biology of systems

- Digby, S. N., Masters, D. G., Blache, D., Hynd, P. I. and Revell, D. K.*
Offspring born to ewes fed high salt during pregnancy have altered responses to oral salt loads 81

- Fortin, M., Julien, P., Couture, Y., Dubreuil, P., Chouinard, P. Y., Latulippe, C., Davis T. A. and Thivierge, M. C.*
Regulation of glucose and protein metabolism in growing steers by long-chain n-3 fatty acids in muscle membrane phospholipids is dose-dependent 89

Behaviour, welfare and health

- Hötzel, M. J., Machado Filho, L. C. P., Irgang, R. and Alexandre Filho, L.*
Short-term behavioural effects of weaning age in outdoor-reared piglets 102

- Corner, R. A., Kenyon, P. R., Stafford, K. J., West, D. M., Morris, S. T. and Oliver, M. H.*
The effects of pasture availability for twin- and triplet-bearing ewes in mid and late pregnancy on ewe and lamb behaviour 12 to 24 h after birth 108

- Coimbra, P. A. D., Machado Filho, L. C. P., Nunes, P. A., Hötzel, M. J., de Oliveira, A. G. L. and Cecato, U.*
Effect of water trough type on the drinking behaviour of pasture-based beef heifers 116

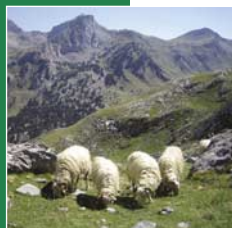

- Williams, A. R., Greeff, J. C., Vercoe, P. E., Dobson, R. J. and Karlsson, L. J. E.*
Merino ewes bred for parasite resistance reduce larval contamination onto pasture during the peri-parturient period 122

Product quality, human health and well-being

- Fernandez, X., Lahirigoyen, E., Auvergne, A., Molette, C. and Bouillier-Oudot, M.*
The effects of stunning methods on product qualities in force-fed ducks and geese. 1. Carcass downgrading and meat quality 128

- Fernandez, X., Lahirigoyen, E., Bouillier-Oudot, M., Vitezica, Z. and Auvergne, A.*
The effects of stunning methods on product qualities in force-fed ducks and geese. 2. Fatty liver quality 139

- Moschini, M., Battaglia, M., Beone, G. M., Piva, G. and Masoero, F.*
Iodine and selenium carry over in milk and cheese in dairy cows: effect of diet supplementation and milk yield 147

journals.cambridge.org

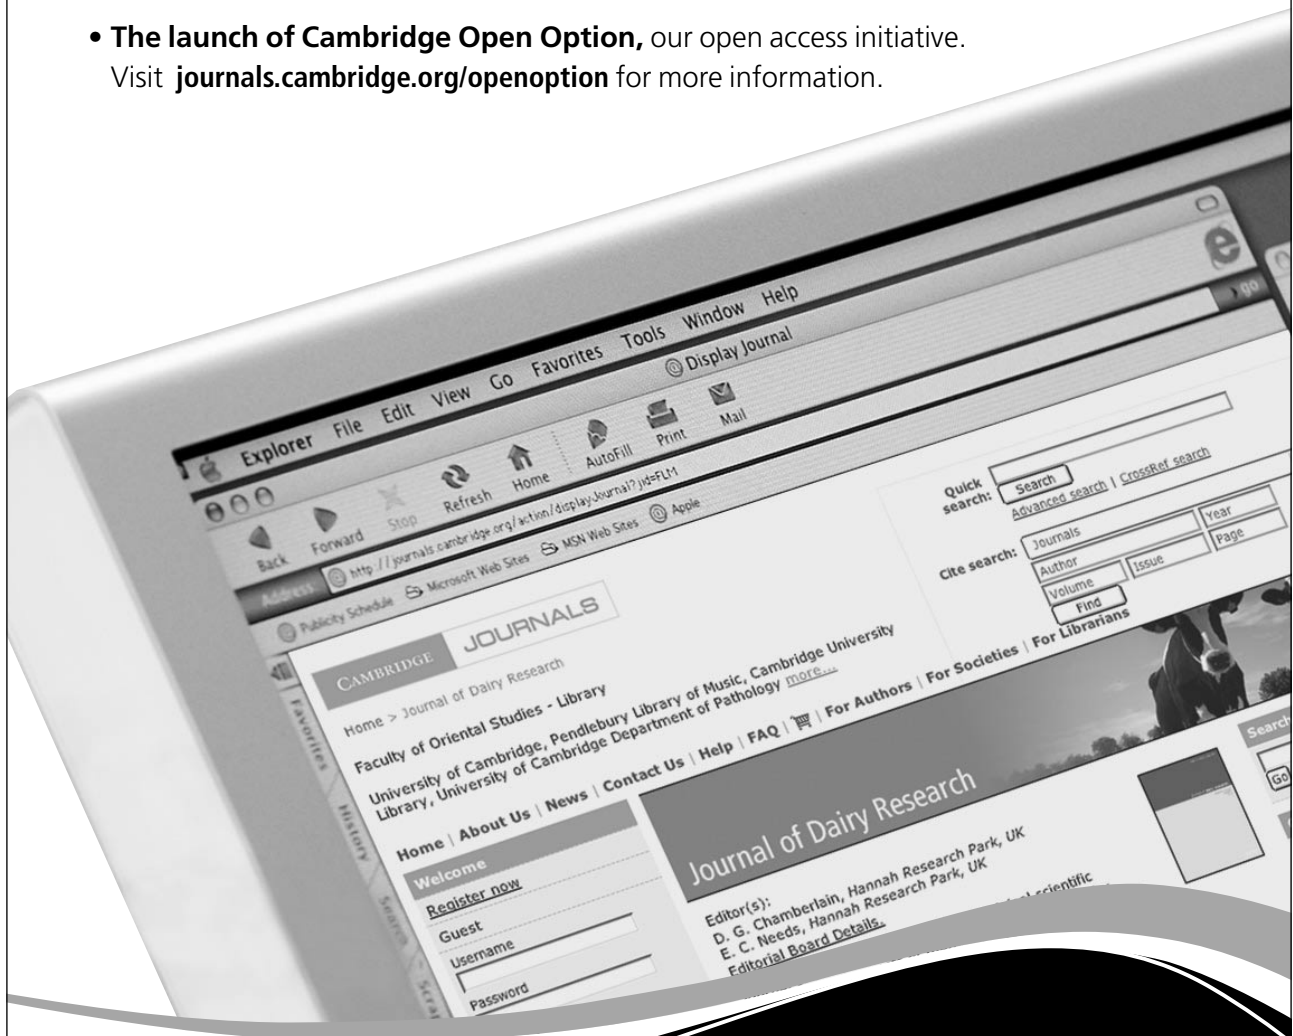

Advancing research. Increasing access.

Informed by detailed consultation with the library and research communities, we are constantly developing our industry-leading online journals platform.

Some recent advances include:

- **Refreshed site design**, facilitating rapid access to the most relevant content.
- **New advanced search interface** and a more detailed, fielded quick search function.
- **Enriched content** in the form of multimedia companions and editorial blogs.
- **The launch of Cambridge Open Option**, our open access initiative.

Visit journals.cambridge.org/openoption for more information.

Senior Editors

Julian Wiseman, University of Nottingham, UK
Animal papers
Robert E. L. Naylor, University of Aberdeen, UK
Crop & Soil papers

The Journal of Agricultural Science publishes papers concerned with the advance of agriculture and the use of land resources throughout the world. It publishes original scientific work related to strategic and applied studies in all aspects of agricultural science and exploited species, as well as reviews of scientific topics of current agricultural relevance.

Editor

John Lewis, Royal Holloway, University of London, UK

Journal of Helminthology publishes original papers and review articles on all aspects of pure and applied helminthology, particularly those helminth parasites of environmental health, medical or veterinary importance. Research papers on helminths in wildlife hosts, including plant and insect parasites, are also published along with taxonomic papers contributing to the systematics of a group. The journal will be of interest to academics and researchers involved in the fields of human and veterinary parasitology, public health, microbiology, ecology and biochemistry.

Senior Executive Editor

T. F. C. Mackay, North Carolina State University, USA

Executive Editors

D. J. Finnegan, University of Edinburgh, UK

W. G. Hill, University of Edinburgh, UK

Shizhong Xu, University of California, USA

Genetics Research is a key forum for original research on all aspects of genetics. Building on the success and history of its previous incarnation, *Genetical Research*, the journal has a publishing remit that provides comprehensive coverage of subjects vital to the field.

The breadth and quality of papers, reviews and book reviews make the journal invaluable to geneticists, evolutionary biologists, plant and animal breeders and molecular biologists.
