

Earth and Environmental Science

Transactions of the Royal Society of Edinburgh

volume **102** part **4** 2012
(for 2011)

**An archaeocyath–trilobite fauna
from the Falkland Islands**

**Early Carboniferous minor
intrusions of the Cumbrae islands,
Firth of Clyde, Scotland**

**Scombroid fishes from the
Cenozoic of the former USSR**

Published by The RSE Scotland Foundation, 22–26 George Street, Edinburgh EH2 2PQ

The Royal Society of Edinburgh is committed to the widespread dissemination of scientific knowledge and has published the *Transactions of the Royal Society of Edinburgh* since 1785, when James Hutton's 'Theory of the Earth' was published in volume 1. The journal evolved to the *Transactions of the Royal Society of Edinburgh: Earth Sciences* in 1980 and is now (as from 2007) the *Earth and Environmental Science Transactions of the Royal Society of Edinburgh*. Through this journal, the Society continues to encourage and support the international Earth and Environmental Science communities by:

- publishing a journal of international standing and authorship;
- publishing substantial papers on all scientific aspects of the earth and its surface environments;
- publishing without page charges;
- reproducing photographs and artwork to the highest standard, where appropriate at a size larger than is customary; and
- aiming to have papers reviewed within three months by at least two referees of international standing; usually publishing within six months of acceptance.

The Editorial Board welcomes original manuscripts in the Earth and Environmental Sciences. It also welcomes proposals for Special Issues in these areas.

Editorial Board
