

Plutarch and Rome

C. P. JONES

Plutarch is one of the great ambassadors between the ancient world and the modern. This book places Plutarch clearly against his background, the Roman Empire of the Flavians and their successors. It assembles all that is known of his biography and reviews his social circle, and examines the attitude to Rome revealed in his works, notably the *Parallel Lives*. £2.75

The Senatorial Aristocracy in the Later Roman Empire

M. T. W. ARNHEIM

Was the Later Roman Empire an absolute monarchy? That is the main question tackled in this book, which analyses the position of the senatorial aristocracy to that of the emperor in the period between the accession of Diocletian and the death of Theodosius (284–395). 3 genealogical tables £5.25

Antioch

City and Imperial Administration in the Later Roman Empire

J. H. W. G. LIEBESCHUETZ

In this book the writings of Libanius are used to illustrate trends in the public life of Antioch in the fourth century. Under the impact of the centralizing reforms of the emperors Diocletian and Constantine, civil institutions were caught in a vicious circle. Failures of the curial oligarchy provoked the interference on the part of the imperial governors. This in turn weakened the machinery of civic self-government until eventually the council lost all authority, and the city developed patterns of political behaviour adapted to the new situation. 2 maps £5

Catullus : An Interpretation

KENNETH QUINN

In this important and controversial study the author argues that, contrary to popular belief, the poems of Catullus are not a random collection by some editor who gathered together all that was extant, but a collection put together by Catullus himself. Professor Quinn shows that the fundamental unity is that of a major theme — the poet's passionate love for a worthless mistress.

Divus Julius

STEFAN WEINSTOCK

This book is about Roman religion in the age of Caesar, beginning with the ancestral cults of the Gens Iulia at Bovillae and ending with the new cult of Divus Julius all over the Roman Empire. It deals with the old gods, politico-religious ideas, and the ruler cult. Caesar is at the centre, as religious reformer rather than modern rationalist. 31 plates £9

Virgil: *Aeneid* Book I

With a commentary by

R. G. AUSTIN

There has been no detailed English commentary on the first book of the *Aeneid* since R. S. Conways' edition of 1935. The present editor has tried to take account of the many developments in Virgilian scholarship since that date, and of the changed conception of what is needed in a commentary. The book will be useful to sixth formers and undergraduates as well as to professional scholars. £2

Tertullian

A Historical and Literary Study

TIMOTHY DAVID BARNES

The Christian Tertullian lived and wrote in Roman Carthage during the reigns of Septimius Severus and Caracalla. This book provides the framework without which Tertullian's writings cannot fully be understood, and interprets his intellectual development, his reaction to the society in which he lived, and his place in Latin literature. £6

Rome in Etruria and Umbria

W. V. HARRIS

This book sets out to describe and explain Roman policies in two adjacent areas of Italy from the fourth century B.C. to the beginning of the Empire. The author examines the credibility of the surviving accounts of the wars of conquest, the local political and social conditions to which Rome responded, the forms and realities of Roman control, and the process of Romanization. 2 maps £6.50

PETER BROWN

'The articles, furnished with abundant footnotes and references, express of course the author's historical scholarship and extensive reading. But Peter Brown's writing is far from being simply a matter of scholarship and erudition. He demands of the historian an insight into the relation between men's inner lives and their external expression and environment.'

—FREDERICK COPLESTON, *The Spectator*.

'Anyone interested in the late Roman world, its thought, religion and social structure, will be grateful for this collection, so diverse in scope, yet so consistent in its vision.' —R. A. MARKUS, *Theology*. £3.25

Latin-English dictionaries have hitherto been largely translated or adapted from continental dictionaries, which have themselves been in part derivative. The *O.L.D.* is independent of all other dictionaries, being the first on its scale to be based on a fresh and thorough reading of all the available sources. It is designed to give a full account of the meaning and use of words occurring in Latin from the beginnings to about A.D. 200. The work will be complete in eight fascicles. Paper covers £5

The German Policy of Augustus

An Examination of the Archaeological Evidence

C. M. WELLS

This book examines Augustus' policy towards the Germans in the context of Roman imperialism and the tribal situation on the Rhine and in Germany. The evidence suggests that the conquest of Germany was more systematic and complete than is generally assumed, and that Augustus' aim was not so much the establishment of a defensible frontier as the acquisition of military glory. 15 text figures 1 map £6
