
Journal of Applied Bacteriology

Published by the Society for Applied Bacteriology

Journal Editors

F.A. Skinner *Harpenden*

C.H. Collins *Dulwich*

M. Sussman *Newcastle upon Tyne*

The Society for Applied Bacteriology launched the *Journal of Applied Bacteriology* in 1954 and since that time the journal has grown in size, in prestige and in the subject matter covered. It has established an international reputation with readers and authors; indeed each number of the journal contains papers from worldwide sources. The Society's interest in the systematics and ecology of groups of microorganisms is reflected in the journal, which publishes five types of article:

Review articles: a substantial survey with an adequate historical perspective

Observation articles: a succinct discussion of current concepts and developments in applied microbiology

Full-length papers: the development of concepts as well as the recording of facts

A note on ...: research having narrow, readily defined limits, or contributions to the knowledge but not the development of concepts

Technical notes: details of new methods, techniques or apparatus

Subscription Information

Journal of Applied Bacteriology is published bi-monthly. Subscription rates for 1984 are: £68.00 (U.K.), £82.00 (overseas), \$165.00 (U.S.A. & Canada) post free. Subscriptions and free specimen copies are available from:

Blackwell Scientific Publications Ltd, P.O. Box 88, Oxford, England

DAWKINS, H. C., BOLTON, F. J. and HUTCHINSON, D. N. A study of the spread of <i>Campylobacter jejuni</i> in four large kitchens	357
GRAY, J. S. <i>Aeromonas hydrophila</i> in livestock: incidence, biochemical characteristics and antibiotic susceptibility	365
CAUGANT, D. A., LEVIN, B. R. and SELANDER, R. K. Distribution of multilocus genotypes of <i>Escherichia coli</i> within and between host families	377
GUSTAFSON, R. H. and KOBLAND, J. D. Factors influencing salmonella shedding in broiler chickens	385
JEGATHESAN, M. Salmonella serotypes isolated from man in Malaysia over the 10-year period 1973-1982	395
BETTELHEIM, K. A., MASKILL, W. J., METCALFE, R. V. and PEARCE, J. L. The use of the microagglutination technique to determine the antibody status of healthy New Zealanders to <i>Brucella abortus</i>	401

NOTES FOR CONTRIBUTORS

Papers for publication should be sent to Professor J. R. Pattison, Faculty of Clinical Sciences, School of Medicine, University College London, University Street, London WC1E 6JJ. The typescript and two copies should be sent with 3 copies of all tables and illustrations. Authors are requested to include a self addressed envelope for acknowledgement of receipt. Papers forwarded to the Editor for publication are understood to be offered to the *Journal of Hygiene* alone, unless the contrary is stated.

General

Careful preparation of manuscripts will promote rapid publication. Authors are advised to refer to a recent issue of the journal in addition to the notes below, paying particular attention to the form of references, tables and figures and the use of symbols and abbreviations. Papers should be in double-spaced typescript throughout (including reference lists, footnotes and legends) on A4 paper with a left hand margin of at least 4 cm.

Format

Papers must commence with a separate title page indicating the full title, initial(s), surname(s), address(es) of the authors and a short title not exceeding 45 characters. Papers should usually be divided into SUMMARY, INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION and REFERENCES. Some observations are best described in the form of a continuous narrative with the only subsection being a Summary at the beginning. Such papers will also be considered.

Acknowledgements are put at the end of the discussion after a space of one line.

Tables

Tables should be numbered separately with arabic numerals and each table typed on a separate sheet of paper. Whenever possible they should be so designed that they can be printed across the width of a page. Note that columns and lines are not separated by vertical or horizontal lines but are grouped by the use of braces of varying lengths.

Illustrations

Line drawings, diagrams and charts should be accurately drawn on plain white board or paper or faintly blue-lined graph paper and should not be more than twice publication size. Points should be indicated by the following symbols: ○, △, □, ●, ▲, ■. Lettering and numbering will not be directly reproduced but should be clearly shown either in pencil on the drawing or on overlaid transparent paper.

Photographs should be sent as unmounted glossy prints with good contrast. Their position in the text should be indicated by 'Figure ... near here'.

Legends for figures should be typed on separate sheets of paper. Each illustration should bear on the back the author's name and illustration number.

References

In the text references by up to three authors are cited in the form Jones, Smith & Brown (1950) and those by four or more authors in the form Jones *et al.* (1950).

The reference list should be arranged alphabetically and should include authors' names, initials, year of publication in parentheses, title of the paper, name of the journal *in full*, the volume number and first and last page numbers. References to books and monographs should be in the form: authors' names, initials, year of publication in parentheses, title, edition editors (if appropriate), page number(s), place of publication and publisher.
