

Nutrition Research Reviews, published annually by Cambridge University Press, presents authoritative and critical reviews of research that advance new concepts and encourage fresh thinking on a variety of nutritional problems. The journal's main objective is to encourage the exchange of fundamental ideas on nutritional well-being. The subscription (excluding VAT) to volume 8, 1995, is £49 including postage (US \$89 in USA, Canada and Mexico).

The Proceedings of the Nutrition Society, published by Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The meetings also include sessions at which papers are communicated by members and others on original work. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription (excluding VAT) to the *Proceedings* is £126.00 (US \$240.00 in USA, Canada and Mexico). Single issues are £44.00 (US \$85.00 in the USA, Canada and Mexico) each; postage extra.

Copying. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$11.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/95 \$11.00+.10. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

CONTENTS

Editorial

Times change. *D. A. T. Southgate* 745-746

Ruminant faecal excretion of markers

The effects of diffusion and viscosity on ruminant faecal excretion of markers in a simple compartmental model. *J. H. M. Thornley, J. France, M. S. Dhanoa & R. C. Siddons* 747-763

Diet composition and BMI in adolescents

Relationship between diet composition and body mass index in a group of Spanish adolescents. *Rosa M. Ortega, Ana M. Requejo, Pedro Andrés, Ana M. López-Sobaler, Rosario Redondo & María González Fernández* 765-773

Validation of dietary history in the elderly

Validation of dietary history method in a group of elderly women using measurements of total energy expenditure. *Marjolein Visser, Lisette C. P. G. M. de Groot, Paul Deurenberg & Wija A. van Staveren* 775-785

Arginine supplementation and malnutrition

High doses of dietary arginine during repletion impair weight gain and increase infectious mortality in protein-malnourished mice. *Michael D. Peck, George F. Babcock, J. Wesley Alexander, Timothy Billiar & Juan Ochoa* 787-795

Dietary protein and oxidative phosphorylation

The substrate-specific impairment of oxidative phosphorylation in liver mitochondria from high-protein-fed chickens. *Masaaki Toyomizu, Masahiro Tanaka, Makoto Kojima & Teru Ishibashi* 797-806

Effect of carbohydrate intake on lipid metabolism

Influence of dietary retrograded starch on the metabolism of neutral steroids and bile acids in rats. *Miriam J. F. Verbeek, Emile A. M. De Deckere, Lillian B. M. Tijburg, Johan M. M. van Amelsvoort & Anton C. Beynen* 807-820

Effect of carbohydrate source on lipid metabolism in lactating mice and on pup development. *Amal A. Ghusain-Choueiri & Elizabeth A. Rath* 821-831

Adaptation to diet and polysaccharide digestibility

The influence of the period of adaptation on the digestibility of diets containing different types of indigestible polysaccharides in rats. *G. Brunsgaard, K. E. Bach Knudsen & B. O. Eggum* 833-848

Magnesium, vitamin E and peroxidation

Effect of magnesium deficiency on triacylglycerol-rich lipoprotein and tissue susceptibility to peroxidation in relation to vitamin E content. *Elyett Gueux, Veronique Azais-Braesco, Laurence Bussière, Pascal Grolier, Andrzej Mazur & Yves Rayssiguier* 849-856
