

Information for Contributors

1. Manuscripts must be written in English. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favourable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Associate Editor or the Editor.
2. The typescript should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, position and affiliations.
3. The title and section headings should highlight the significant points. A short abstract should precede the main text.
4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.
5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy.
6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables.
7. References and footnotes should be cited according to the Harvard (Author/date system), also known as the "British form". In the text, author and year are cited in brackets e.g. "... was found by McCarthy (1980; 1980a) ..." or "(Emmett *et al.* 1972)". Full references are listed in alphabetic order at the end of the paper. References are not numbered. An example of a reference list is:
DEUTSCH, C. & KLARSFELD, S. 1973 *Phys. Rev.* **A7**, 2081.
NICHOLSON, D. R. 1983 *Plasma Theory*, (John Wiley, New York).
OOMURA, H. *et al.* 1982 *Res. Rep ILE*, ILE-8207p.
OOMURA, H. *et al.* 1982a *Trans. ANS*, **43**, 617.
Note that the year of publication appears after the author's name. If possible, all authors names should be listed in preference to "*et al.*" If one author or team is referred to more than once in any year, the letters a, b, etc should be added after the year to distinguish the individual references.
8. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.

LASER AND PARTICLE BEAMS

Volume 6 Part 2 May 1988

Preface 121

- I. B. Foldes** (CRI, Budapest, Hungary), **R. Sigel**, **Chen Shi-Sheng** (Shanghai Inst., Shanghai, P.R.C.), **K. Eidmann**, **R. F. Schmalz**, **G. D. Tsakiris**, **S. Witkowski** (MPI, Garching, Germany): Simultaneous x-ray and optical shadowgraphy of cavities heated by $\lambda = 0.44 \mu\text{m}$ laser light 123
- D. Giulietti** (U. Pisa, Italy, U. Pavia, U. Alger, Alg.), **G. P. Banfi**, **I. Deha**, **A. Giulietti**, **M. Lucchesi**, **L. Nocera**, **Chen Ze Zun** (U. Pavia, U. Alger, Alg.): Second harmonic generation in underdense plasma 141
- K. Niu**, **H. Takeda**, and **T. Aoki** (Tokyo I. T. Yokohama, Japan): Optimization of target for ICF and target gain 149
- L. Cicchitelli**, **S. Eliezer**, **M. P. Goldsworthy**, **F. Green**, **H. Hora**, **P. S. Ray**, **R. J. Stening**, and **H. Szichman** (U. of N. S. Wales, Australia): Volume ignition of laser driven fusion pellets and double layer effects 163
- R. Marchand** (U. Quebec, Canada), **R. Fedosejevs**, **C. E. Capjack** (U. Alberta, Canada) and **Y. T. Lee** (LLNL, USA): Simulation of laser-plasma interactions with atomic and radiation effects 183
- D. Pesme**, **S. J. Karttunen**, **G. Laval**, and **N. Silvestre** (Ecole Polytechnique, France U. of TRC Helsinki, Finland) **R. R. E. Salomaa**: Modulational instability in the beat-wave generation 199
- D. P. Singh**, **M. Vaselli**, and **R. Singh** (Inst. di Fisica, Pisa, Italy): Pondermotive force effect on plasma density profile in the underdense region 211
- V. Kubeček** and **M. Vrbová** (Czech Tech. U., Prague, CSSR): Nd:YAG laser with plasma mirror 219
- A. M. Rogoyski**, **P. Charalambous**, **C. P. Hills**, and **A. G. Michette** (Kings College, London, England): Characterization and optimization of a laser generated plasma source of soft X rays 225
- R. Paul Drake** (LLNL, USA): Laser-plasma-interaction experiments using multi-kilojoule lasers 235
- E. R. Koresheva**, **Yu. A. Mercuriev**, **A. I. Nikitenko**, **I. E. Osipov**, **S. M. Tolokonnikov** (Lebedev Inst., USSR): The peculiarities of laser cryogenic target destruction and their injection into powerful laser focus 245
- S. Vukovic**, **R. Dragila** and **A. M. Smith** (A.N.U., Canberra, Australia): Total absorption of unpolarized radiation in a stratified plasma 255
- E. Mínguez**, **J. F. Serrano**, and **M. L. Gámez** (I.F.N. (DENIM) Spain): Analysis of atomic models for the extinction coefficient calculation 265
- W. Brunner** and **Th. Schlegel** (Akademie der Wissenschaften, Berlin, GDR): Gain and radiation trapping in laser-produced plasmas 277
- T. J. M. Boyd**, **G. A. Gardner** and **G. A. Coutts** (U. W., Wales, UK): Some Anomalies in the Raman spectrum from laser-produced plasmas 287
- J. Limpouch**, **G. Lončar** (Tech. U. of Prague, Prague, CSSR), **I. G. Lebo** and **V. B. Rozanov** (Lebedev P. I., Moscow, USSR): On the dynamics of pondermotive filamentation of laser beams in a plasma 295
- J. Sanz**, **F. Ibáñez**, **J. A. Nicolás** and **S. G. Tagare** (U. Politecnica, Madrid, Spain): Non-uniform irradiation with inverse bremsstrahlung absorption in spherical laser targets 305
- E. M. Gromov** and **V. I. Talanov** (USSR Acad., Gorky, USSR): Trapping and entrainment of electromagnetic wave pulses into supercritical regions in inhomogeneous plasma by ion-acoustic waves 313
- S. Denus**, **H. Fiedorowicz**, **K. Jeziak**, **P. Parys**, **W. Pawłowicz** and **J. Wolowski** (Inst. of Microfusion, Warsaw, Poland): Laser-driven implosion studies using the soft X-ray emission measurements 321
