COVER
 Andrew Carr's analytical view of the Villa Snellman, designed by Erik Gunnar Asplund and built in 1917–18 in Djursholm, Sweden illustrates his exposition of the momentary architecture of Virginia Woolf. See pp. 4–23.

leader	3	The guardians of houses
criticism	4	Cathedrals on the light of a butterfly's wing: the momentary architecture of Virginia Woolf Andrew Carr draws from Virginia Woolf's description of the shape of books as analogous to the 'formed and controlled' structures of buildings, investigating how her writing reveals an architecture that is momentary and precarious.
materials	25	Material nature or perversion: the case of aluminium Paul Emmons and Berrin Terim examine how moral language and reasoning about perversity permeate architectural theories on building materials, suggesting that exposing them allows illuminating the important role culture plays in determining material uses.
theory	37	Analogue structure: structural analogies in the context of evolving body concept Shuaizhong Wang rethinks historical analogues between body and structure, expanding this analogue with new body concepts from cognitive neuroscience to enrich structural analogical design thinking.
structures	49	Structural reality and architectural editing: the four invisible columns of the Sydney Opera House Paolo Tombesi, Paolo Stracchi and Luciano Cardelicchio explore how published descriptions of lauded buildings can include a degree of 'rhetorical editing', suppressing inconvenient truths about a building's eventual physical manifestation to suit a clear narrative.
urbanism	61	The Changi-Marina Bay Corridor: green strategies for Singapore's soft power Silvia Micheli and Johanna Brugman chart the environmental and social consequences of soft-power strategies through the experiential urban design choreography of Singapore's Changi Airport-Marina Bay Corridor.
review	73	Arkkitehti Elissa Aalto / Architect Elissa Aalto Reviewed by Sofia Singler
insight	79	The problem is not runaway climate change. The problem is us. Chris Abel
