

Treatise on Basic Philosophy

by MARIO BUNGE
(in seven volumes)

The **Treatise on Basic Philosophy** expounds the first philosophical synthesis to have been conceived after the end of what has been called the Age of Analysis. Unlike many a system in traditional philosophy, Bunge's is formulated in a clear fashion and with the assistance of formal tools such as elementary modern algebra. Besides, it is science-oriented and its author hopes it may help to understand science as well as to free scientific research from obsolete philosophical maxims. In sum, the **Treatise** presents a new system of philosophy in tune with our time.

Editor: MARIO BUNGE

Editorial Policy:

The series will include original monographs and treatises, advanced textbooks and symposia proceedings. It will seek originality and high quality. Each volume should be between 200 and 350 printed pages long.

- (iii) to stimulate the application of both scientific method and mathematical tools to every domain of research, whether scientific, technological or humanistic;
- (iv) to draw the attention of the academic community to the emerging disciplines, such as mathematical biogeography, mathematical political science, cliometrics, and mathematical philosophy.
