EDITORIAL POLICY

The Journal of the Marine Biological Association UK (JMBA) is an international journal, publishing original research and reviews on all aspects of marine biology, to support the aims of the MBA. The topics of present interest for JMBA are:

- Marine ecology, behaviour and fisheries;
- Biodiversity and population studies of marine ecosystems, especially potential impacts of global warming, ocean acidification and climate change on ecosystem resilience;
- Physiology, biochemistry, genetics and molecular biology of marine organisms, including microbiology, particularly related to the integrative ecophysiology of marine organisms;
- Taxonomic syntheses, including molecular phylogenies;
- Morphology, life history and developmental biology of marine organisms, especially model systems;
- Chemical and physical oceanography, as directly relevant to marine biology;
- Marine environmental health, and in particular its relationship to human health and well-being.

In addition to papers describing original research, the journal will also publish short reviews and original viewpoints on topics of current marine biological interest.

Papers describing work involving experimental procedures on living animals will be published only if they comply with the legal requirements of the UK Home Office. In the case of species not covered by the current law, papers will be published only if it is judged that the experiments have been conducted in a humane manner and adequate precautions taken to minimize stress.

Authors may like to know that papers published in the JMBA are covered by the following abstracting or indexing services: *Animal Breeding Abstracts, ASEA, Biological Abstracts, Biological and Agricultural Index, Chemical Abstracts, Current Advances in Ecological Sciences, Current Contents, Current Titles in Oceanography, FISHLIT, Geological Abstracts, GeoRef, Helminthological Abstracts, Lead Abstracts, Nutrition Abstracts, Oceanic Abstracts, Selected Water Resources Abstracts, Zinscan.*
