

### *The International Journal of Neuropsychopharmacology*

is essential for:

- psychiatrists & pharmacologists
- general physicians & practitioners
- psychopharmacologists
- neurologists & neuroscientists

Eight issues per year  
Volume 12, 2009  
ISSN 1461-1457  
E-ISSN 1469-5111

Individuals, print only: \$226 / £130  
Institutions, print + online: \$867 / £498  
Institutions, online only: \$651 / £363

# *The International Journal of Neuropsychopharmacology*

**Editor:**

**Alan Frazer, San Antonio, USA**

*The International Journal of Neuropsychopharmacology (INJP)* serves as a major forum for the rapid publication and wide dissemination of high quality, influential research in neuropsychopharmacology, in the basic and clinical domains. The central focus of the journal is on research which advances understanding of existing and new neuropsychopharmacological agents, including their mode of action and clinical application, or which provides insights into the biological basis of neuropsychiatric disorders and thereby advances their pharmacological treatment. Such research might derive from the full spectrum of biological and psychological fields of inquiry, encompassing classical and novel techniques in neuro-psychopharmacology, as well as strategies such as neuroimaging, genetics, psycho-neuroendocrinology and neuropsychology. *INJP's* rapid publication policy is facilitated by web-based submission and review, and the journal publishes the definitive versions of papers online, ahead of the printed issues. All papers are indexed in PubMed and ISI Journal Citation Reports.

*The official scientific journal of the Collegium Internationale Neuro-Psychopharmacologicum*

# Ageing & Society

...is an interdisciplinary and international journal devoted to the understanding of human ageing and the circumstances of older people in their social and cultural contexts. It draws contributions and has readers from many academic social science disciplines, and from clinical medicine and the humanities. In addition to original articles, *Ageing & Society* publishes book reviews, occasional review articles and special issues.

**Editor:**

Tony Warnes  
University of Sheffield, UK

**...is important reading for:**

lecturers and researchers in social sciences & cultural studies

social gerontologists

students of ageing

social service health professionals

governmental departments

# Cambridge Quarterly of Healthcare Ethics

The International Journal for Healthcare Ethics and Ethics Committees

**Cambridge Quarterly of Healthcare Ethics** is designed to address the challenges of biology, medicine and healthcare and to meet the needs of professionals serving on healthcare ethics committees in hospitals, nursing homes, hospices and rehabilitation centres.

The aim of the journal is to serve as the international forum for the wide range of serious and urgent issues faced by members of healthcare ethics committees, physicians, nurses, social workers, clergy, lawyers and community representatives.

*Cambridge Quarterly of Healthcare Ethics* is published by Cambridge University Press and is a partner journal of the American Society for Bioethics and Humanities

The International Journal of Technology Assessment in Health Care  
is the official journal of HTAi.

## Health Technology Assessment International

Health Technology Assessment International (HTAi) is **the** international society  
for the promotion of Health Technology Assessment.

### *As an HTAi member you will:*

*Receive reduced price access to the International Journal of Technology  
Assessment in Health Care, the leading peer reviewed journal of HTA.*

*Be able to attend the annual HTAi conference to meet with peers, participate in  
panel discussions on critical issues in HTA, and present your research topics.*

*Build collaborative work spaces on the HTAi website to network  
with HTA producers and users.*

*Receive unparalleled access to a network of 1,000 HTA peers world wide.*

*Join a Special Interest Group on specific aspects of HTA.*

# International Journal of Technology Assessment in Health Care

## Instructions for Contributors

The editors welcome submissions of articles that deal with the wide range of topics related to assessment for health care policy and practice, including issues of technology diffusion, economics, ethics, law, and social and cultural perspectives. All manuscripts are screened by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 10 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Spelling, capitalization, and punctuation should conform to the 15th Edition of *The Chicago Manual of Style* (University of Chicago Press). Articles and correspondence should be sent *by email only* to **Egon Jonsson** at the following email address: [ejonsson@ihe.ca](mailto:ejonsson@ihe.ca); Egon Jonsson Ph.D, Professor; Executive Director and CEO; Institute of Health Economics; 1200, 10405 Jasper Avenue; Edmonton, Alberta; Canada T5J 3N4; Email address: [ejonsson@ihe.ca](mailto:ejonsson@ihe.ca); Telephone: +1-780-448-4881; Fax: +1-780-448-0018.

**PREPARATION OF MANUSCRIPT.** The entire manuscript (in word format), including all notes and references, must be typed, *double-spaced* on 8½ × 11 inch or A4 paper, with at least 1-inch (2.54 cm) margins. Manuscript pages should be numbered consecutively. Manuscripts should be arranged as follows: 1) cover sheet with title and short title; 2) abstract and key words; 3) acknowledgments, including source of funding; 4) text; 5) references; 6) tables with titles; and 7) figures, with captions on a separate page. Manuscripts should typically have *no more than 4,000 words*—including the abstract, which should not exceed 250 words. There should be no more than a total of four tables and illustrations together and no more than 25 references. Tables and illustrations exceeding these limits may be posted on the Journal's web site ([www.journals.cambridge.org/thc](http://www.journals.cambridge.org/thc)) as supplementary materials. Supplementary figures and tables should be numbered separately from the figures and tables in the printed issue, beginning with Supplementary Figure 1 and Supplementary Table 1. Where relevant, all manuscripts should include one paragraph on the policy implications of the findings of the study. Acronyms should be clearly spelled out on first use. The use of product trade names should be avoided; generic names should be used except where discussion of proprietary brands is essential to the manuscript.

**COVER SHEET AND COVER LETTER.** A cover letter, signed by all authors, must attest that 1) each named author contributed to both the conception/design and/or analysis/interpretation of the project and the writing of the paper; 2) each has approved the version being submitted; and 3) the content has not been published nor is being considered for publication elsewhere.

As relevant to the content of the paper, the letter should also attest to the fact that any research with human or animal subjects conforms to the legal and standards of the country in which it was performed. *All authors must disclose any financial arrangements with companies whose products are discussed in the paper or their competitors*; such information will not be revealed to reviewers but may be included in a suitable format in the final publication if the manuscript is accepted. The cover letter should also provide all authors' full names, professional degrees, and institutional mailing addresses.

The cover sheet should list the article's title, the name, complete mailing address, telephone and fax numbers, and e-mail ad-

dress of the corresponding author, and a short title (50 characters or less) for the running head.

**ABSTRACT AND KEYWORDS.** A 100- to 250-word abstract, submitted on a separate page, should *summarize* the objectives of the study or analysis, the article's major arguments and/or results, and its conclusions/recommendations. *Abstracts must be submitted in four sections:* Objectives; Methods; Results; and Conclusions, except where the subject and/or format of the article do not permit. Three to five key words, using terms from the Medical Subject Headings from *Index Medicus*, should follow the abstract.

**REFERENCES AND NOTES.** Bibliographic citations in the text should be indicated by numbers in parentheses usually at the end of the sentence after the period. When authors are mentioned in the text, the citation number should immediately follow the name(s) as follows: *In-text citations:* "Jones and Smith (7) maintained that. . ." *The reference list must be in alphabetical order* If a work has more than five authors, the first three authors should be listed, followed by et al. Abbreviate journal titles according to the listing in the current *Index Medicus*.

**Book:** 1. Jones AB, Smith JK. *Computer diagnosis and results*. New York: Penta Publishers; 1998.

**Journal:** 1. Jones AB, Smith JK. The relationship between health needs, the hospital, and the patient. *J Chron Dis*. 1995;32:310-312.

**Article in edited work:** 1. Jones AB, Smith JK. The diagnostic process. In: Brown R, Wilson T, eds. *New technology and its medical consequences*, vol. 1. New York: Apple Publishers; 1992:101-134.

In the reference list, do not include material that has been submitted for publication but has not yet been accepted. This material, with its date, should be noted in the text as "unpublished data" as follows:

**Unpublished data:** "Similar findings have been noted by L. W. Smith (unpublished data, 1998)."

*The Journal does not accept footnotes or appendices.*

**TABLES AND FIGURES.** Tables and figures should be numbered consecutively. All tables and figures must have a caption and must be cited in the text. Abbreviations in tables and figures should be avoided, except in the case of acronyms already used in the text. Table footnotes appear directly after the table; table references follow the footnotes. Figures must be submitted in Excel, PageMaker, or equivalent.

**PERMISSIONS.** Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors will be asked to assign their copyrights to Cambridge University Press.

**COPYEDITING AND PROOFREADING.** The publishers reserve the right to copyedit and proofread all accepted articles. Page proofs will be sent to the lead author for final review.

**REPRINTS.** The lead author will receive 25 reprints free of charge; additional numbers may be purchased if ordered at proof stage.

**TECHNOLOGY ASSESSMENT  
IN HEALTH CARE**

---

*Featured in this Issue*

“The Alberta hip and knee replacement project: A model for health technology assessment based on comparative effectiveness of clinical pathways,” by Katherine L. Gooch, Douglas Smith, Tracy Wasylak, Peter D. Faris, Deborah A. Marshall, Hoa Khong, Julie E. Hibbert, Robyn D. Parker, Ronald F. Zernicke, Lauren Beaupre, Tim Pearce, D. W. C. Johnston, and Cyril B. Frank

“How guidance on the use of interventional procedures is produced in different countries: An international survey,” by Jonathan Plumb, Bruce Campbell, and Georgios Lyratzopoulos

“Resource allocation and health technology assessment in Australia: Views from the local level,” by Gisselle Gallego, Kees van Gool, and Dianne Kelleher

“Health technology assessment: A comprehensive framework for evidence-based recommendations in Ontario,” by Ana P. Johnson, Nancy J. Sikich, Gerald Evans, William Evans, Mita Giacomini, Murray Glendining, Murray Krahn, Les Levin, Paul Oh, and Charmaine Perera

“Microvolt T-wave alternans and the selective use of implantable cardioverter defibrillators for primary prevention: A cost-effectiveness study,” by Kristian B. Filion, Xuanqian Xie, Charlotte J. van der Avoort, Nandini Dendukuri, and James M. Brophy

“Cost-effectiveness of human papillomavirus vaccination in Belgium: Do not forget about cervical cancer screening,” by Nancy Thiry, Chris De Laet, Frank Hulstaert, Mattias Neyt, Michel Huybrechts, Irina Cleemput

“Cost-effectiveness of pegylated interferon and ribavirin for patients with chronic hepatitis C treated in routine clinical practice,” by Marina Grishchenko, Richard D. Grieve, Michael J. Sweeting, Daniela De Angelis, Brian J. Thomson, Stephen D. Ryder, William L. Irving, and the Trent HCV Study Group

“Modeling the cost-effectiveness of treatment of rheumatoid arthritis with rituximab using registry data from Southern Sweden,” by Peter Lindgren, Pierre Geborek, and Gisela Kobelt

“Economic evaluation of nonsteroidal anti-inflammatory drug strategies in rheumatoid arthritis,” by András Inotai and Ágnes Mészáros

“Economic evaluation of drug-eluting stents compared to bare metal stents using a large prospective study in Ontario,” by Ron Goeree, James M. Bowen, Gord Blackhouse, Charles Lazzam, Eric Cohen, Maria Chiu, Rob Hopkins, Jean-Eric Tarride, and Jack V. Tu

“Clinical decision rules for the use of liquor diagnostics in hospitalized neurology patients reduced costs without affecting clinical outcomes,” by Elisabeth Haschke-Becher, Uwe Totzke, Shahrzad Afazel, Tim Johansson, Markus Schwarz, Gunther Ladurner, and Claudia Wild

“In search of the evidentiary foundation of published Canadian economic evaluations (2001–06),” by Jean-Eric Tarride, Morgan E. Lim, James M. Bowen, Catherine Elizabeth McCarron, Gord Blackhouse, Robert Hopkins, Daria O'Reilly, Feng Xie, and Ron Goeree

“Can calcium chemoprevention of adenoma recurrence substitute or serve as an adjunct for colonoscopic surveillance?” by Aasma Shaukat, Murtaza Parekh, Joseph Lipscomb, and Uri Ladabaum

“Analyzing multiple learning effects in health care using multilevel modeling: Application to radiotherapy at an early stage of innovation,” by Magali Morelle, Raphaël Remonnay, Philippe Giraud, and Marie-Odile Carrère
